Reading for Storyness Susan Lohafer, 2003-12-22 Reading for Storyness combines cognitive science with literary theory to present a compelling argument for the uniqueness of the short story

Reading for Storyness Susan Lohafer, 2020-03-03 The short story has been a staple of American literature since the nineteenth century taught in virtually every high school and consistently popular among adult readers But what makes a short story unique In Reading for Storyness Susan Lohafer former president of the Society for the Study of the Short Story argues that there is much more than length separating short stories from novels and other works of fiction With its close readings of stories by Kate Chopin Julio Cortázar Katherine Mansfield and others this book challenges assumptions about the short story and effectively redefines the genre in a fresh and original way In her analysis Lohafer combines traditional literary theory with a more unconventional mode of research monitoring the reactions of readers as they progress through a story to establish a new poetics of the genre Singling out the phenomenon of imminent closure as the genre's defining trait she then proceeds to identify preclosure points or places where a given story could end in order to access hidden layers of the reading experience She expertly harnesses this theory of preclosure to explore interactions between pedagogy and theory formalism and cultural studies fiction and nonfiction Returning to the roots of storyness Lohafer illuminates the intricacies of classic short stories and experimental forms of surreal postmodern and minimalist fiction She also discusses the impact of social constructions such as gender on the identification of preclosure points by individual readers Reading for Storyness combines cognitive science with literary theory to present a compelling argument for the uniqueness of the short story

The Classic Short Story, 1870-1925 Florence Goyet, 2014-01-13 The ability to construct a nuanced narrative or complex character in the constrained form of the short story has sometimes been seen as the ultimate test of an author's creativity Yet during the time when the short story was at its most popular the late nineteenth and early twentieth centuries even the greatest writers followed strict generic conventions that were far from subtle This expanded and updated translation of Florence Goyet's influential *La Nouvelle* 1870-1925 *Description d'un genre son apogée* Paris 1993 is the only study to focus exclusively on this classic period across different continents Ranging through French English Italian Russian and Japanese writing particularly the stories of Guy de Maupassant Henry James Giovanni Verga Anton Chekhov and Akutagawa Ryunosuke Goyet shows that these authors were able to create brilliant and successful short stories using the very simple tools of brevity of that period In this challenging and far reaching study Goyet looks at classic short stories in the context in which they were read at the time cheap newspapers and higher end periodicals She demonstrates that despite the apparent intention of these stories to question bourgeois ideals they mostly affirmed the prejudices of their readers In doing so her book forces us to re think our preconceptions about this forgotten genre

The Early Reader in Children's Literature and Culture Jennifer Miskec, Annette Wannamaker, 2015-12-22 This is the first volume to consider the popular literary category of Early Readers books written and designed for children who are just beginning to read independently It argues that Early Readers deserve more scholarly attention and careful thought because they are for many younger readers their first opportunity to engage with a work of literature on their own to feel a sense of mastery over a text and to experience pleasure from the act of

reading independently Using interdisciplinary approaches that draw upon and synthesize research being done in education child psychology sociology cultural studies and children s literature the volume visits Early Readers from a variety of angles as teaching tools as cultural artifacts that shape cultural and individual subjectivity as mass produced products sold to a niche market of parents educators and young children and as aesthetic objects works of literature and art with specific conventions Examining the reasons such books are so popular with young readers as well as the reasons that some adults challenge and censor them the volume considers the ways Early Readers contribute to the construction of younger children as readers thinkers consumers and as gendered raced classed subjects It also addresses children s texts that have been translated and sold around the globe examining them as part of an increasingly transnational children s media culture that may add to or supplant regional ethnic and national children s literatures and cultures While this collection focuses mostly on books written in English and often aimed at children living in the US it is important to acknowledge that these Early Readers are a major US cultural export influencing the reading habits and development of children across the globe

Narrative Progression in the Short Story Michael J. Toolan,2009 One of our most valuable capacities is our ability partly to predict what will come next in a text But linguistic understanding of this remains very limited especially in genres such as the short story where there is a staging of the clash between predictability and unpredictability This book proposes that a matrix of narrativity furthering textual features is crucial to the reader s forming of expectations about how a literary story will continue to its close Toolan uses corpus linguistic software and methods and stylistic and narratological theory in the course of delineating the matrix of eight parameters that he sees as crucial to creating narrative progression and expectation The book will be of interest to stylisticians narratologists corpus
