Reading With Michel Serres An Encounter With Time The Margins Of Literature:

Reading with Michel Serres Maria L. Assad, 1999-01-01 Explores the concept of time in the work of Michel Serres demonstrating close analogies in his work to the discourses of science literature and philosophy **Porous Becomings** Andreas Bandak, Daniel M. Knight, 2024-02-23 The contributors to *Porous Becomings* draw on the work of French philosopher of science Michel Serres 1930 2019 to show how it opens new pathways for anthropological knowledge Mapping Michel Serres Niran Abbas, 2009-12-14 Provides an extremely valuable introduction to the work of Michel Serres for an English speaking audience as well as offering useful critical approaches for those already familiar with its outlines Robert Harrison Stanford University blurb from review pending permission The work of Michel Serres including the books *Hermes* *The Parasite* *The Natural Contract* *Genesis* *The Troubadour of Knowledge* and *Conversations on Science Culture and Time* has stimulated readers for years as it challenges the boundaries of science literature culture language and epistemology The essays in *Mapping Michel Serres* written by the leading interpreters of his work offer perspectives from a range of disciplinary positions including literature language studies and cultural theory Contributors include Maria Assad Hanjo Berressem Stephen Clucas Steven Connor Andrew Gibson Ren Girard Paul Harris Marcel Haff William Johnsen William Paulson Marjorie Perloff Philipp Schweighauser Isabella Winkler and Julian Yates *French Forum*, 2000 **Forthcoming Books** Rose Army, 1999 Bibliografisch Repertorium Van de Wijsbegeerte, 1999 **The Noise of Culture** William Paulson, 2019-06-30 William Paulson believes that as contemporary science extends its influence over areas of thought that have long been the province of the humanities scholars in literary disciplines may suffer for their lack of contact with work in the sciences of mind and information In *The Noise of Culture* he speculates on the role of literature in the post literary culture of the information age and proposes a vital reorientation of the study of literature both affirming its specificity and exploring its developing relationship with modern science Paulson discusses literature in the context of information theory particularly the theory of self organizing and autonomous systems Reviewing and building upon the work of such thinkers as Michel Serres Henri Atlan Francisco Varela and Judith Schlangier Paulson offers a new kind of conceptual vocabulary for literary theory He concludes that literature functions as the noise of culture a source of variety in the circulation and production of ideas and a rich and indeterminate margin through which messages are sent and transformed

Discorrelated Images Shane Denson, 2020-09-18 In *Discorrelated Images* Shane Denson examines how computer generated digital images displace and transform the traditional spatial and temporal relationships that viewers had with conventional analog forms of cinema Denson analyzes works ranging from the *Transformers* series and *Blade Runner 2049* to videogames and multimedia installations to show how what he calls discorrelated images images that do not correlate with the abilities and limits of human perception produce new subjectivities affects and potentials for perception and action Denson's theorization suggests that new media theory and its focus on technological development must now be inseparable

from film and cinema theory There s more at stake in understanding discorrelated images Denson contends than just a reshaping of cinema the development of new technical imaging processes and the evolution of film and media studies discorrelated images herald a transformation of subjectivity itself and are essential to our ability to comprehend nonhuman agency

Contemporary Postcolonial Theory Padmini Mongia,2021-01-07 There is a crisis in contemporary postcolonial theory while an enormous body of challenging research has been produced under its auspices severely critical questions about the validity and usefulness of this theory have also been raised This Reader is positioned at the juncture where it can address these contestations It makes available some of the classics of the field engages with the issues raised by contemporary practitioners but also offers several of the arguments that strongly critique postcolonial theory Although postcolonial theory purports to be inter disciplinary and frequently anti foundationalist traces of disciplinary formations and linearity have continued to haunt its articulations This Reader on the other hand offers a uniquely inter disciplinary mapping It is concerned with three main areas definitional problems and contests including the current challenges to postcolonial theory the disciplining of knowledge where the multiple resonances of the word disciplining are all engaged and the location of practice where the relations between intellectual practice and historical conditions are explored Finally since the guiding principle of this Reader is simultaneous attention to the enabling and constraining mechanisms of historical realities and institutional practices the commentary problematizes the writing of histories the formations of canons and indeed the production of Readers
