Readings In Urban Analysis Perspectives On Urban Form And Structure:

Readings in Urban Analysis Robert W. Lake, 2017-07-05 This important work brings together a range of perspectives in contemporary urban analysis. The field of urban analysis is characterized by the multiplicity of approaches, philosophies and methodologies employed in the examination of urban structure and urban problems. This fragmentation of perspectives is not simply a reflection of the multifaceted and complex nature of the city as subject matter. Nor is it a function of the variety of disciplines such as geography, planning, economics, history and sociology. Cross-cutting all of these issues and allegiances has been the emergence in recent years of a debate on fundamental issues of philosophy, ideology and basic assumptions underlying the analysis of urban form and structure. The notion of urban analysis Robert W. Lake discusses focuses on the spatial structure of the city, its causes and its consequences. At issue is the city as a spatial fact, a built environment with explicit characteristics and spatial dimensions, a spatial distribution of population and land, uses, a nexus of locational decisions, an interconnected system of locational advantages and disadvantages, amenities and disamenities. Beginning with landmark articles in neo-classical and ecological theory, the reader covers the latest departures and developments. Separate sections cover political approaches to locational conflict, institutional influences on urban form and recent Marxist approaches to urban analysis. Among the topics included are community strategies in locational conflict, the political economy of place, the role of government and the courts, institutional influences in the housing market and the relationship between urban form and capitalist development. This is a valuable introductory text for courses in urban planning, urban geography and urban sociology.

relationship between urban form and capitalist development This is a valuable introductory text for courses in urban planning urban geography and urban sociology Provided by publisher *Community as Urban Practice* Talja Blokland, 2017-05-11 Community is a central idea in urban studies but remains conceptually vague and empirically difficult to work with Building on existing theories of community Talja Blokland offers an important contribution to defining and understanding this key theme Blokland argues that there has been too much focus on community as a stable construct formed by durable relationships with kin friends social groups or neighbours She draws attention to the non durable fluid encounters that constitute community theorizing communities as shared urban practices in a globalizing world The book proposes two core ways of thinking about community the dimension of familiarity defined by our ability to construct identities and the dimension of access defined by our freedom to enter and leave urban spaces These dimensions form various urban configurations which enable us to experience and practise community in diverse ways As this book maintains community is after all an urban practice not a fixed state of affairs *Analysis and Development of Sustainable Urban Production Systems* Max Juraschek, 2021-07-23 Manufacturing of products in urban production sites is connected to unique potentials yet also to specific challenges Urban factories can provide functional diversity and contribute positive impacts to a city The concept of urban production receives rising attention in research and industry and it is recognized in its interdisciplinary nature With a holistic approach from both the urban perspective and the factory perspective negative impacts can be minimized positive effects enabled and mutually beneficial symbiotic combinations created The presented framework and methods for the evaluation and implementation of sustainable urban production systems allow the assessment of impacts and provide the means to control and utilize the unique strengths of urban factories for cities and industry This will allow a structured derivation of methods and measures from the concept of urban production for producing enterprises and the urban stakeholders

Planning Politics in Toronto Aaron Alexander Moore,2013-02-26 The Ontario Municipal Board is an independent provincial planning appeals body that has wielded major influence on Toronto s urban development In this book Aaron A Moore examines the effect that the OMB has had on the behavior and relationships of Toronto s main political actors including city planners developers neighbourhood associations and local politicians Moore s findings draw on a quantitative analysis of all OMB decisions and settlements from 2000 through 2006 as well as eight in depth case studies The cases which examine a variety of development proposals that resulted in OMB appeals compare the decisions of Toronto s political actors to those typified in American local political economy analyses A much needed contribution to the literature on the politics of urban development in Toronto since the 1970s

Planning Politics in Toronto challenges popular preconceptions of the OMB s role in Toronto s patterns of growth and change

The Linguistic Landscape of Chinatown Jackie Jia Lou,2016-05-12 This book presents a sociolinguistic ethnography of the linguistic landscape of Chinatown in Washington DC The book sheds a unique light on the impact of urban development on traditionally ethnic neighbourhoods and discusses the various historical social and cultural factors that contribute to this area s shifting linguistic landscape Based on fieldwork interviews with residents and visitors and analysis of community meetings and public policies it provides an in depth study of the production and consumption of linguistic landscape as a cultural text Following a geosemiotic analysis of shop signs it traces the multiple historical trajectories of discourse which shaped the bilingual landscape of the neighbourhood Turning to the spatial contexts it then compares and contrasts the situated meaning of the linguistic landscape for residents community organisers and urban planners

The Public Realm Lyn H. Lofland,2017-07-12 This book is about the public realm defined as a particular kind of social territory that is found almost exclusively in large settlements This particular form of social psychological space comes into being whenever a piece of actual physical space is dominated by relationships between and among persons who are strangers to one another as often occurs in urban bars buses plazas parks coffee houses streets and so forth More

specifically the book is about the social life that occurs in such social psychological spaces the normative patterns and principles that shape it the relationships that characterize it the aesthetic and interactional pleasures that enliven it and the forces anti urbanism privatism post war planning and architecture that threaten it The data upon which the book s analysis is based are diverse direct observation interviews contemporary photographs historic etchings prints and photographs and historical maps histories of specific urban public spaces or spatial types and the relevant scholarly literature from sociology environmental psychology geography history anthropology and architecture and urban planning and design Its central argument is that while the existing body of accomplished work in the social sciences can be reinterpreted to make it relevant to an understanding of the public realm this quintessential feature of city life deserves much more u it deserves to be the object of direct scholarly interest in its own right Choice noted that The author s writing style is unusually accessible and the often fascinating narrative is generously supported by well chosen photos **Mapping Desire** David Bell,Gill
