

A person's hand is holding a blue clipboard with a white checklist. The checklist has several rows of text and checkboxes. In the background, there is a house with a light-colored stucco wall and a dark brown wooden roof. A satellite dish is mounted on the wall. To the left, there is a green bush and a small patio area with a table and chairs. The sky is blue with some clouds.

Gilroy,2013-06-21 The purpose of this book is to shed some light on the process of purchasing income producing property and to introduce you to a technique of making money derived from public information available in the Probate Court System that not one in one hundred people are aware In other words I will explain in detail two different ways of making money using real estate as the vehicle The first and most popular way being of investing is to purchase real estate to hold for the long term The other method consists of purchasing updating and selling property within a 6 month time frame and generating a 30% return on investment This method can also be expanded into an options situation whereby the investor puts a property under contract to be sold to him by giving the seller a 1 000 00 deposit while signing a P S agreement After the agreement is signed by both parties and the investor has legal footing the investor locates a contractor and proceeds to sell the contract The time for performance in most agreements is ninety days Within that time frame the investor collects the difference between what his agreement says that he is paying and what his purchaser is paying him This transaction is accomplished by using an assignment If the investor sells his agreement for 5 000 00 in ninety days he will have effectively gotten an annualized profit ratio of 20 to 1 The other section of the book explains how to track and capitalize on public information available in the Probate Court System to generate a fantastic income *Real Estate Appraisal, Finance,*

Investment, and Business Management University of Florida. Real Estate Research Center,1979 **Investment Analysis for Appraisers** Jeffrey d. Fisher,Robert S. Martin,1994-10 Designed to develop skills that are essential for analysis or real estate income property investments Contains numerous examples to illustrate the techniques used by investors and appraisers Appraisers real estate brokers property managers consultants and others can benifit from the use of this book to improve their understanding of the nature of income property investments Property Investment Appraisal Andrew E.

Baum,Neil Crosby,Steven Devaney,2021-01-06 Discover an insightful examination of the property investment appraisal process from leaders in the industry This book explains the process of property investment appraisal the process of estimating both the most likely selling price market value and the worth of property investments to individuals or groups of investors investment value Valuations are important They are used as a surrogate for transactions in the measurement of investment performance and they influence investors and other market operators when transacting property Valuations need

to be trusted by their clients and valuers need to produce rational and objective solutions Appraisals of worth are even more important as they help to determine the prices that should be paid for assets even in times of crisis and they can indicate market under or over pricing In a style that makes the theory as well as the practice of valuation accessible to students and practitioners the authors provide a valuable critique of conventional valuation methods and argue for the adoption of more contemporary cash flow methods They explain how such valuation models are constructed and give useful examples throughout They also show how these contemporary cash flow methods connect market valuations with rational appraisals The UK property investment market has been through periods of both boom and bust since the first edition of this text was produced in 1988 As a result the book includes examples generated by vastly different market states Complex reversions over rented properties and leaseholds are all fully examined by the authors This Fourth Edition includes new material throughout including brand new chapters on development appraisals and bank lending valuations heavily revised sections on discounted cash flow models with extended examples and on the measurement and analysis of risk at an individual property asset level The heart of the book remains the critical examination of market valuation models which no other book addresses in such detail
