Defining Technological Literacy J. Dakers, 2006-04-29 Never before have we so needed a new literacy that will enable us to meaningfully participate in the rapidly evolving technologically mediated world This collection offers a solid basis for defining this new technological literacy by bringing together theoretical work encompassing philosophy design and pedagogy

What Things Do Peter-Paul Verbeek, 2010-11-01 How are all these things affecting us How can their role in our lives be understood *What Things Do* answers these questions by focusing on how technologies mediate our actions and our perceptions of the world *Subject Guide to Books in Print* , 1993 **Technology, Media Literacy, and the Human**

Subject Richard S. Lewis, 2021-06-03 Media literacy is often focused on evaluating the message rather than reflecting on the medium Bringing together postphenomenology media ecology posthumanism and complexity theory Richard Lewis's book offers a method for such a reflection and shows how our everyday media environments constitute us as post human subjects one that is becoming and constitutes through relations also with our media technologies An original interdisciplinary effort including for example the term intrasubjective mediation and a must read book for everyone interested in how we become with and through technologies Prof Mark Coeckelbergh University of Vienna *Technology Media Literacy and the Human Subject* is a clearly and concisely written book that employs a fruitful transdisciplinary approach It at once offers an excellent grounding in the literature whilst simultaneously developing a useful tool for students to reflect deeply and critically upon their own engagement with media Thoroughly recommended Alexander Thomas University of East London What does it mean to be media literate in today's world How are we transformed by the many media infrastructures around us We are immersed in a world mediated by information and communication technologies ICTs From hardware like smartphones smartwatches and home assistants to software like Facebook Instagram Twitter and Snapchat our lives have become a complex interconnected network of relations Scholarship on media literacy has tended to focus on developing the skills to access analyze evaluate and create media messages without considering or weighing the impact of the technological medium how it enables and constrains both messages and media users Additionally there is often little attention paid to the broader context of interrelations which affect our engagement with media technologies This book addresses these issues by providing a transdisciplinary method that allows for both practical and theoretical analyses of media investigations Informed by postphenomenology media ecology philosophical posthumanism and complexity theory the author proposes both a framework and a pragmatic instrument for understanding the multiplicity of relations that all contribute to how we affect and are affected by our relations with media technology The author argues persuasively that the increased awareness provided by this posthuman approach affords us a greater chance for reclaiming some of our agency and provides a sound foundation upon which we can then judge our media relations This book will be an indispensable tool for educators in media literacy and media studies as well as academics in philosophy of technology media and communication studies and the post humanities

Postphenomenological Methodologies Jesper Aagaard, Jan Kyrre Berg Friis, Cathrine Hasse, Jessica Sorenson, Oliver Tafdrup, 2018-08-15 This edited volume is the first publication to tackle the issue of researching human technology relations from a methodological postphenomenological perspective While the traditional phenomenology of the 20th century with figures like Husserl Heidegger and Merleau Ponty provided valuable insights into the formal structures of essence being and embodiment etc their mode of philosophizing mostly involved abstract pure thinking Although rooted in this tradition the postphenomenological approach to the study of human technology relations emphasizes the empirical turn and interdisciplinary work in the field of philosophy and reaches out to other disciplines like anthropology education media studies and science and technology studies STS The contributors discuss what it means for the field of postphenomenology to be empirically based and what kind of methodology is required in order for researchers to go out and study human technology relations in this perspective In many disciplines methodology refers to the analytical approach taken e g the analytical concepts you employ to make an analysis in postphenomenology these might include concepts such as multistability variation or mediation In a discipline like anthropology it also refers to reflections over the methods researchers use to approach an empirical field Methods can include interviews of different kinds participant observations surveys and auto ethnography Furthermore methodology can include ethical issues tied to doing research in an empirical field These practical aspects are not separate from but rather connected to theoretical approaches This book ties together the methods ethics and theories of postphenomenology in a groundbreaking volume on methodology With postphenomenological studies of education digital media biohacking health robotics and skateboarding as points of reference the authors of this volume in twelve chapters provide new perspectives on what a comprehensive postphenomenological research methodology must consist of

Design for Behaviour Change Kristina Niedderer, Stephen Clune, Geke Ludden, 2017-08-23 Design impacts every part of our lives The design of products and services influences the way we go about our daily activities and it is hard to imagine any activity in our daily lives that is not dependent on design in some capacity Clothing mobile phones computers cars tools and kitchenware all enable and hold in place everyday practices Despite design's omnipresence the understanding of how design may facilitate desirable behaviours is still fragmented with limited frameworks and examples of how design can effect change in professional and public contexts This text presents an overview of current approaches dedicated to understanding how design may be used intentionally to make changes to improve a range of problematic social and environmental issues It offers a cross disciplinary and cross sectoral overview of different academic theories adopted and applied to design for behaviour change The aim of the volume is twofold firstly to provide an overview of existing design models that integrate theories of change from differing scientific backgrounds secondly to offer an overview of application of key design for behaviour change approaches as used across case studies in different sectors such as design for health and wellbeing sustainability safety design against crime and social design Design

for Behaviour Change will appeal to designers design students and practitioners of behavioural change

The Philosophy of Imagination Galit Wellner, Geoffrey Dierckxsens, Marco Arienti, 2024-04-18 Combining perspectives from both continental and analytic philosophy this timely volume explores how imagination today both shapes and is shaped by technology art and ethics Imagination is one of the most significant and broadly examined concepts in contemporary philosophy and is frequently understood as a basic human faculty that enables complex activities This book shows however that imagination is more than a mere enabler Whilst imagination shapes our experiences it is at the same time shaped by our environments Some of the most creative manifestations of imagination are the result of its two way interaction with art or technology or both In short imagination co shapes us Beyond the traditional perspectives of Kant and Heidegger The Philosophy of Imagination Technology Art and Ethics examines our dynamic relationship with imagination from contemporary technological advancements such as AI that transform the whole ecosystem to imagination in the context of videogames and literary fiction Analysing societal imagination it addresses the relationship between the racial imaginary and white ignorance as well as the effects that societal mechanisms such as lockdowns can have on our imagination Taking its cue from the here and now this volume brings together leading international scholars to investigate how the concept of co shaping allows us to see imagination and its crucial role in society in new and productive ways

An Introduction to Qualitative Research

Maria K. E. Lahman,2024-04-17 This engaging introduction to all aspects of qualitative research challenges students to consider how their research can be culturally responsive The first part of the book introduces the foundations including theory ethics and reflexivity with an emphasis on multiple methodologies from traditional to critical and cutting edge The second part covers practical guidance from writing proposals to data collection and includes a chapter dedicated to creating a culturally responsive relationship with research participants Finally readers engage with how the quality of research is enhanced how data are analyzed and how research accounts are created and disseminated Areas vital to the health of qualitative research are addressed including systemic racism and cultural humility with cutting edge suggestions offered in areas like hybrid research harnessing technology and use of social media Multiple identities are centered in examples throughout including race gender and those who are hard to reach or seldom heard in research Textboxes featuring scholars student researchers and community members invite readers into dialogue in an area that is contested swiftly shifting and always vibrant with potential Resources for instructors are available on a website to accompany the book

Emerging Systems Approaches in Information Technologies: Concepts, Theories, and Applications Paradise, David,2009-10-31 This book presents findings utilizing the incorporation of the systems approach into fields such as systems engineering computer science and software engineering Provided by publisher

Children and the Ethics of Creativity Victoria Jane Hargraves,2020-08-26 This book presents a critical reimagining of education and educational research in addressing

practices of representation and their relation to epistemology subjectivity and ontology in the context of early childhood education Drawing on posthumanist perspectives and the immanent materialism of Deleuze Guattari to conceive of early childhood education childhood and indeed adult life in new ways it highlights the powerful role of language in subjectivity and ontology and introduces affectivity as a concept which can be put to work to undo habitual relations and meanings It proposes that ethical becomings require the engagement of an expansion and intensification of a body's affect or capacity and offers readers a provocation for enhancing creative capacity as an ethic This book is an important contribution to the discussions on methods for living and of ways of thinking commensurate with the orientation of a posthuman turn

Theories of Mathematical Learning Leslie P. Kuczewski, Rosa Lynn B. Pinkus, 1999-04-22 This collection of thirty one cases and commentaries addresses ethical problems commonly encountered by the average health care professional not just those working on such high tech specialties as organ transplants or genetic engineering It deals with familiar issues that are rarely considered in ethics casebooks including such fundamental matters as informed consent patient decision making capacity the role of the family and end of life decisions It also provides resources for basic but neglected ethical issues involving placement decisions for elderly or technologically dependent patients rehabilitation care confidentiality regarding AIDS professional responsibility and organizational and institutional ethics The authors describe in detail the perspectives of each party to the case the kind of language that ethicists use to discuss the issues and the outcome of the case A short bibliography suggests useful articles for further reading or curriculum development Easily understood by readers with no prior training in ethics this book offers guidance on everyday problems from across the broad continuum of care It will be valuable for health care professionals hospital ethics committees and for students preparing for careers in health care professions **Resources in Education**, 2001 Daniel Johnston Henry Glassie, 2020-03-03 DANIEL JOHNSTON raised on a farm in Randolph County returned from Thailand with a new way to make monumental pots Back home in North Carolina he built a log shop and a wheel of a kiln for wood firing Then he set out to create beautiful pots grand in scale graceful in form and burned bright in a blend of ash and salt With

mastery achieved and apprentices to teach Daniel Johnston turned his brain to massive installations First he made a hundred large jars and lined them along the rough road that runs past his shop and kiln Next he arranged curving clusters of big pots inside pine frames slatted like corn cribs to separate them from the slick interiors of four fine galleries in succession Then in concluding the second phase of his professional career Daniel Johnston built an open air installation on the grounds around the North Carolina Museum of Art where 178 handmade wood fired columns march across a slope in a straight line 350 feet in length that dips and lifts with the heave while the tops of the pots maintain a level horizon In 2000 when he was still Mark Hewitt s apprentice Daniel Johnston met Henry Glassie who has done fieldwork on ceramic traditions in the United States Brazil Italy Turkey Bangladesh China and Japan Over the years during a steady stream of intimate interviews Glassie gathered the understanding that enabled him to compose this portrait of Daniel Johnston a young artist who makes great pots in the eastern Piedmont of North Carolina

Philosophy and Computing Thomas M. Powers,2017-10-26 This book features papers from CEPE IACAP 2015 a joint international conference focused on the philosophy of computing Inside readers will discover essays that explore current issues in epistemology philosophy of mind logic and philosophy of science from the lens of computation Coverage also examines applied issues related to ethical social and political interest The contributors first explore how computation has changed philosophical inquiry Computers are now capable of joining humans in exploring foundational issues Thus we can ponder machine generated explanation thought agency and other quite fascinating concepts The papers are also concerned with normative aspects of the computer and information technology revolution They examine technology specific

analyses of key challenges from Big Data to autonomous robots to expert systems for infrastructure control and financial services The virtue of a collection that ranges over philosophical questions such as this one does lie in the prospects for a more integrated understanding of issues These are early days in the partnership between philosophy and information technology Philosophers and researchers are still sorting out many foundational issues They will need to deploy all of the tools of philosophy to establish this foundation This volume admirably showcases those tools in the hands of some excellent scholars
