**Frontiers** Rob Collins,Matt Symonds,Meike Weber,2015-11-30 The Roman army was one of the most astounding organizations in the ancient world and much of the success of the Roman empire can be attributed to its soldiers Archaeological remains and ancient texts provide detailed testimonies that have allowed scholars to understand and reconstruct the army s organization and activities This interest has traditionally worked in tandem with the study of Roman frontiers Historically the early imperial period and in particular the emergence of the frontiers has been the focus of research During those investigations however the remains of the later Roman army were also frequently encountered if not always understood Recent decades have brought a burgeoning interest in not only the later Roman army but also late antiquity more widely It is the aim of this volume to demonstrate that while scholars grappling with the late Roman army may want for a rich corpus of inscriptions and easily identifiable military installations research is revealing a dynamic less predictable force that was adapting to a changing world in terms of both external threats and its own internal structures The dynamism and ingenuity of the late Roman army provides a breath of fresh air after the suffocating uniformity of its forbears The late Roman army was a vital and influential element in the late antique empire Having evolved through the 3rd century and been formally reorganized under Diocletian and Constantine the limitanei guarded the frontiers while the comitatenses provided mobile armies that were fielded against external enemies and internal threats The transformation of the early imperial army to the late antique army is documented in the rich array of texts from the period supplemented by a perhaps surprisingly rich archaeological record

*The Roman Cavalry* Karen R. Dixon,Pat Southern,2013-01-11 The cavalry was a vital part of the army of Rome and it played a significant role in the expansion and success of the Roman Empire Karen R Dixon and Pat Southern

describe the origins of the mounted units of the Roman army and trace their development from temporary allied troops to the regular alae and cohorts They have drawn together evidence from a wide variety of sources archaeological epigraphic and literary as well as comparing ancient testimony with more recent experience of the use of cavalry The book covers the subject from the perspective of both the men and the horses How were the horses selected and disposed of how were they trained stabled and fed How were the men recruited organized and equipped and what were the conditions of service for a Roman cavalryman The cavalry had to be employed in peacetime and this is discussed as well as its role in war The image of the Roman cavalry is often one of excitement and glory but the authors are aware that a true picture must not overlook the routine and the suffering This book provides a comprehensive account of the Roman cavalry and the current state of knowledge concerning it The wide selection of illustrations includes original drawings by Karen R Dixon

**The Roman Empire** Peter Garnsey, Richard Saller, 2015 During the Principate roughly 27 BCE to 235 CE when the empire reached its maximum extent Roman society and culture were radically transformed But how was the vast territory of the empire controlled Did the demands of central government stimulate economic growth or endanger survival What forces of cohesion operated to balance the social and economic inequalities and high mortality rates How did the official religion react in the face of the diffusion of alien cults and the emergence of Christianity These are some of the many questions posed here in the new expanded edition of Garnsey and Saller's pathbreaking account of the economy society and culture of the Roman Empire This second edition includes a new introduction that explores the consequences for government and the governing classes of the replacement of the Republic by the rule of emperors Addenda to the original chapters offer up to date discussions of issues and point to new evidence and approaches that have enlivened the study of Roman history in recent decades A completely new chapter assesses how far Rome's subjects resisted her hegemony The bibliography has also been thoroughly updated and a new color plate section has been added *The Army of the Roman Republic* Mike Dobson, 2007-02-08 The main source of archaeological evidence for Late Roman Republican camps is a complex of installations around the Iberian city of Numantia in Spain excavated by Adolf Schulten in the early 1900s This book reassesses Schulten and concludes that much of his interpretation is questionable Radically different alternative

reconstructions making use of recent fieldwork are presented for several of the sites A discussion of dating evidence leads to alternative dates being offered for some of the camps To aid interpreting the sites army organisation and art of encampment for the period of the Numantine Wars is discussed This study gives added importance to the sites at Numantia for they not only form the main source of archaeological evidence for Late Republican camps but provide evidence for the form of camp for both the late manipular army and the early cohort one

**The Roman Fort of Vindolanda** P T Bidwell, 2014-06-15 This work is principally an account of excavations carried out at Vindolanda in 1980 but also reviews the available evidence for the history of the fort and vicus Early timber forts were succeeded by a stone fort in the Hadrianic period perhaps in c 122 4 Reconstruction of some interior buildings were erected in the northern part of the praetentura they are thought to have been houses accommodating a civilian work force under military control West of the fort lay a number of buildings apparently serving as a military annexe rather than civilian vicus The fort was almost entirely rebuilt in c 223 5 retaining only parts of the original west and east walls After a delay of about a decade when part of the garrison was probably posted elsewhere a double barrack block was erected in the north east corner of the fort possibly to accommodate cavalry The building underwent a number of alterations and remained in use until c 400 There are slight indications of activity on the site subsequent to that date Rebuilding of the fort in c 223 5 was accompanied by construction of an extensive vicus which was largely abandoned by the last quarter of the third century Foremost amongst the finds was a fragment of a military diploma issued to a soldier of cohorts Tungrorum There were numerous objects of iron and copper alloy A considerable quantity of pottery was recovered from a sequence of third and fourth century deposits Coin finds from the fort and vicus are compared and their significance discussed
