Tarragona Vortex Lawrence J. McCrank, 2022-09-30 This extensive bibliographic essay underpins the entire Tarragona Vortex study by focusing on this arena as one of the most contested frontiers in Western history comparable to Jerusalem in the East for broad issues of Romanization Westernization Islamization and Christianization Its book length chapters treat 1 diverse historiographies from local and Spanish to comparative Mediterranean and Crusade History and especially Ethno historiography and the explanatory concept of frontiers 2 the phenomena of religion conversion and reform and the conditioning agents of Islam and Latin Christianity in practice and adversity 3 religious universalism and violence especially religious war 4 the Crusade and Reconquest paradigms and century long debate 5 the environment on land and sea and setting for this History Although these themes are explored to include due reconsideration but avoid major digressions in its telling about Tarragona and the Tarraconensis they underly so much of Late Antique and Medieval historical research that this discussion pertains to the whole field of historical cultural and religious studies *Rome in America* Haein Park, 2005

The History and Future of Technology Robert U. Ayres, 2021-07-27 Eminent physicist and economist Robert Ayres examines the history of technology as a change agent in society focusing on societal roots rather than technology as an autonomous self-perpetuating phenomenon With rare exceptions technology is developed in response to societal needs that have evolutionary roots and causes In our genus *Homo* language evolved in response to a need for our ancestors to communicate both in the moment and to posterity A band of hunters had no chance in competition with predators that were

larger and faster without this type of organization which eventually gave birth to writing and music The steam engine did not leap fully formed from the brain of James Watt It evolved from a need to pump water out of coal mines driven by a need to burn coal instead of firewood in turn due to deforestation Later the steam engine made machines and mechanization possible Even quite simple machines increased human productivity by a factor of hundreds if not thousands That was the Industrial Revolution If we count electricity and the automobile as a second industrial revolution and the digital computer as the beginning of a third the world is now on the cusp of a fourth revolution led by microbiology These industrial revolutions have benefited many in the short term but devastated the Earth's ecosystems Can technology save the human race from the catastrophic consequences of its past success That is the question this book will try to answer The Book of the Sword Sir Richard Francis Burton, 1884 Theatres Of Violence Philip Dwyer, Lyndall Ryan, 2012-04-01 Massacres and mass killings have always marked if not shaped the history of the world and as such are subjects of increasing interest among historians The premise underlying this collection is that massacres were an integral if not accepted part until quite recently of warfare and that they were often fundamental to the colonizing process in the early modern and modern worlds Making a deliberate distinction between massacre and genocide the editors call for an entirely separate and new subject under the rubric of Massacre Studies dealing with mass killings that are not genocidal in intent This volume offers a reflection on the nature of mass killings and extreme violence across regions and across centuries and brings together a wide range of approaches and case studies
