People of the State of Illinois V. Jones ,1991 **Convicting the Innocent** Brandon L. Garrett,2012-09-03 On January 20 1984 Earl Washington defended for all of forty minutes by a lawyer who had never tried a death penalty case was found guilty of rape and murder in the state of Virginia and sentenced to death After nine years on death row DNA testing cast doubt on his conviction and saved his life However he spent another eight years in prison before more sophisticated DNA technology proved his innocence and convicted the guilty man DNA exonerations have shattered confidence in the criminal justice system by exposing how often we have convicted the innocent and let the guilty walk free In this unsettling in depth analysis Brandon Garrett examines what went wrong in the cases of the first 250 wrongfully convicted people to be exonerated by DNA testing Based on trial transcripts Garrett s investigation into the causes of wrongful convictions reveals larger patterns of incompetence abuse and error Evidence corrupted by suggestive eyewitness procedures coercive interrogations unsound and unreliable forensics shoddy investigative practices cognitive bias and poor lawyering illustrates the weaknesses built into our current criminal justice system Garrett proposes practical reforms that rely more on documented recorded and audited evidence and less on fallible human memory Very few crimes committed in the United States involve biological evidence that can be tested using DNA How many unjust convictions are there that we will never discover Convicting the Innocent makes a powerful case for systemic reforms to improve the accuracy of all criminal cases

Railroad Company V. Butler ,1957 **Transdisciplinary Knowledge Production in Architecture and Urbanism** Isabelle Doucet,Nel Janssens,2011-01-13 The volume addresses the hybridisation of knowledge production in space related research In contrast with interdisciplinary knowledge which is primarily located in scholarly environments transdisciplinary knowledge production entails a fusion of academic and non academic knowledge theory and practice discipline and profession Architecture and urbanism operating as both a discipline and a profession seems to form a particularly receptive ground for transdisciplinary research However this specificity has not yet been developed into a full fledged unique mode of knowledge production In order to dedicate specific attention to transdisciplinary knowledge production this book aims to

explore new hybrid modes of inquiry that allow many of architecture's longstanding schisms to be overcome such as between theory history and practice critical theory and projective design the adoption of an external viewpoint and a view from within often under the guise of bottom up vs top down It therefore offers the reader a mix of contributions that elaborate on knowledge production that is situated in the architectural and urban profession or practice and on practice based approaches in theory
