Roots Of Capitalism In Western Civilization A Socioeconomic Assessment:

The Roots of Capitalism in Western Civilization Irving S. Michelman, 1983 **In Search of the Republic** Richard Vetterli, Gary Bryner, 1996 When *In Search of the Republic* was originally published in 1987 scholarly interpretations of the concept of virtue in the American founding were considered peripheral to mainstream political theory Since then the authors arguments that public virtue civic responsibility and private morality were at the heart of the Founding Fathers political thought is now accepted by a growing number of contemporary political theorists This revised edition includes a new preface that places *In Search of the Republic* within the context of contemporary debates over the role of virtue and religion in early American political discourse This is a superb introduction for students and scholars interested in learning about the moral political and constitutional theories of the Founding Fathers *The March to Capitalism in the Transition Countries* Irving S. Michelman, 2019-05-23 First published in 1998 this book analyses and reconsiders one of the great economic dramas of Western history the march to capitalism in Russia Hungary Poland and the Czech Republic The period is from 1989 after the fall of the Berlin Wall when the liberated countries rushed headlong into democracy and capitalism Special emphasis is on the role often misunderstood played by the Western dominated aid agencies the International Monetary Fund and the World Bank They were called in while the Western countries dawdled and made empty promises They basically financed and guided the transition their own funds amounting to 50 billion while issuing free market strictures in the process This reflected the supremacy of such ideology in the Thatcher Reagan era Russia in its agony offers a laboratory for the conflicting claims of free market theory against a more pragmatic experimental approach China s hybrid capitalism is also analyzed and compared

Michelman, 1994 Michelman claims that capitalism must seek moral as well as practical justification much as democracy has done A venture in moral philosophy as well as in economics the book claims that moral ideas precede fundamental economic change **The Origins of Capitalism and the "Rise of the West"** Eric Mielants, 2008-03-15 In this study Eric Mielants provides a novel interdisciplinary interpretation of the origins of modernity and capitalism in particular He argues that contrary to popular thinking the Rise of the West should not be analyzed in terms of the Industrial Revolution or the

colonization of the New World but viewed from long term developments that occurred in the Middle Ages A fascinating overview of different civilizations in East Asia South Asia and Northwestern Africa is provided and systematically compared and contrasted with Western Europe This book addresses some of the major debates that have recently unfolded in world history comparative sociology political economy sociological theory and historical sociology Mielants indicates how many existing theories such as Marxism World Systems Theory and Smithian Modernization Theory have suffered from either Eurocentric or limited temporal and spatial analyses which prevents them from a complete understanding of why the origins of capitalism and citizenship emerged in Western Europe **Book Review Digest** ,1985 *The Western Humanities Review* ,1984

Constitutional Sovereignty and Social Solidarity in Europe Jeffrey Ellsworth,Johan van der Walt,2015-05-21 The essays in this book respond in different ways to questions regarding sovereignty constitutionality and social solidarity in the European Union A common theme in the book is a perception that the people and peoples of the European Union have drifted into a quagmire of political paralysis within which essential features of the paralysis lack of constitutionality lack of sovereignty and lack of social solidarity feed off one another Some of the essays put forward a more positive view They associate the demise of sovereignty in Member States of the European Union with an emergence of new forms of democracy or new formations of political legitimacy in the complex structures of multi level governance in the European Union Between them the essays provide the reader with a comprehensive study of the key issues of European politics and law today

International Handbook of Interpretation in Educational Research Paul Smeyers,David Bridges,Nicholas C. Burbules,Morwenna Griffiths,2015-01-06 This handbook focuses on the often neglected dimension of interpretation in educational research It argues that all educational research is in some sense interpretive and that understanding this issue belies some usual dualisms of thought and practice such as the sharp dichotomy between qualitative and quantitative research Interpretation extends from the very framing of the research task through the sources which constitute the data the process of their recording representation and analysis to the way in which the research is finally or provisionally presented The thesis of the handbook is that interpretation cuts across the fields both philosophically organizationally and methodologically By covering a comprehensive range of research approaches and methodologies the handbook gives early career researchers what they need to know in order to decide what particular methods can offer for various educational research contexts fields An extensive overview includes concrete examples of different kinds of research not limited for example to teaching and learning examples as present in the Anglo Saxon tradition but including as well what in the German Continental tradition is labelled *pädagogisch* examples from child rearing and other contexts of non formal education with full description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise of the choice combined in each case with consideration of the role of interpretation in the process The handbook includes examples of a large number of methods traditionally classified as qualitative interpretive and quantitative

used across the area of the study of education Examples are drawn from across the globe thus exemplifying the different opportunities and constraints that educational research has to confront in different societies

The European Idea in History in the Nineteenth and Twentieth Centuries Alexander Tchoubarian, 2014-04-08 First Published in 1995 One of the principal inferences of this book is that Russia was and remains an inalienable part of European civilization and culture After the French Revolution and the Napoleonic Wars Russian society was quick to grasp ideas of Enlightenment liberty equality and fraternity while other thinkers rejected this and insisted on Russian exclusivity The book concludes with a view of the future of Europe as the twenty first century approached

Russia as Civilization Kåre Johan Mjør, Sanna Turoma, 2020-05-18 Analyzing the use of civilization in Russian language political and media discourses intellectual and academic production and artistic practices this book discusses the rise of civilizational rhetoric in Russia and global politics Why does the concept of civilization play such a prevalent role in current Russian geopolitical and creative imaginations The contributors answer this question by exploring the extent to which discourse on civilization penetrates Russian identity formations in imperial and national configurations and at state and civil levels of society Although the chapters offer different interpretations and approaches the book shows that Russian civilizationism is a form of ideological production responding to the challenges of globalization The concept of civilization while increasingly popular as a conceptual tool in identity formation is also widely contested in Russia today This examination of contemporary Russian identities and self understanding will be of particular interest to students and scholars of Russian area studies and Slavic studies intellectual and cultural history nationalism and imperial histories international relations discourse analysis cultural studies media studies religion studies and gender studies
