## **Rope Law:**

The Roman Law of Obligations Peter Birks, 2014-07-10 The Roman Law of Obligations presents a series of lectures delivered by the late Peter Birks as an introductory course in Roman law. Discovered in complete manuscript form following his death, the lectures are published here in paperback for the first time. The lectures present a clear conceptual map of the Roman law of obligations, guiding readers through the institutional structure of contract, delict, quasi contract, and quasi delict. They introduce readers to the terminology needed to understand the foundations of Roman law and the conceptual framework of the law of obligations that left an enduring legacy on European private law. The lectures offer an invaluable introduction to Roman private law for those coming to the subject for the first time. They will also make stimulating reading for academics and lawyers interested in Roman law, European legal history, and the lasting influence of Roman law on modern private law. **Transvaal Law Reports** Transvaal (Colony). Supreme Court, 1910 The Law-French Dictionary

Alphabetically Digested F. O., 1718 **The Law-Governed Universe** John T. Roberts, 2008-11-27 John T. Roberts presents and defends a radical new theory of laws of nature. His Measurability Account affirms that there is an important sense in which laws govern the universe rather than simply describing it economically. He argues that what is essential to laws is that they guarantee the reliability of methods of measuring natural quantities. *Wisden's The Laws Of Cricket* Don Oslear, 2010-12-15 WISDEN'S THE LAWS OF CRICKET sets out in full the text of the new laws of cricket 42 in number, with permission of the MCC which own the copyright in them. For each law, it provides a commentary covering the reasons for any changes, explaining the background and highlighting how they are likely to affect the way the game is played at every level. Full discussion is devoted to the major contentious issues, such as the introduction of penalty runs for various misdemeanours and the revisions to the no ball law. Don Oslear, the distinguished umpire, has been intimately involved over several years in the process of drafting the new laws and explains why they needed changing, what views his committee received from the governing bodies of all the cricketing nations and from players, spectators, and the media, how these were resolved, and what effect they are expected to have on the future of the game. No one who plays cricket or is seriously interested in the game can afford to miss this book. *A Grammar of the Thangmi Language* Mark Turin, 2011-12 This monograph is a grammar of Thangmi, an endangered Tibeto-Burman language spoken in the districts of Dolakha and Sindhupalchok in central-eastern Nepal. The language is spoken by upwards of 30,000 people belonging to an ethnic group of the same name. The Thangmi are one of Nepal's least documented communities. These two volumes include a grammatical description of the Dolakha dialect of Thangmi, a collection of glossed oral texts, and a comprehensive lexicon with relevant examples. In addition, the reader will find an extensive ethnolinguistic introduction to the speakers and their culture. For students and scholars of anthropology and linguistics, this study is a compelling illustration of the interweaving of these disciplines in the context of Himalayan studies.
