Survival Skills for Scientists Federico Rosei, T. W. Johnston, 2006

This book provides young scientists from physicists through to sociologists the counsel and tools that are needed to be their own agents and planners to survive and succeed hopefully even thrive in science Making a good career based on peer reviewed science means navigating many stressful phases from graduate school through to permanent employment Performing artists pay agents to help them in this effort In effect this book is designed to allow you to act as your own agent You are counseled to analyze yourself deeply to know clearly what you want and whether you can live with it how to make career choices and what you should then keep in mind when to fight and when to yield The unwritten rules of the science game are explained including how to become published and known the pitfalls of peer review and how to evade them papers and posters job interviews and getting your science funded Interspersed with this are illustrative anecdotes and a fair amount of humor While the book is aimed at young scientists from graduate students and beyond more senior scientists will benefit from seeing the world from the point of view of rising scientists and become aware of the preoccupations of people in a system which has changed much from when the present senior scientists were rather younger

Science and Technology in Central and Eastern Europe Anthony Tillet, Barry Lesser, 2014-02-04 The political upheavals in the former Soviet Union and its satellite states in Central and Eastern Europe have produced profound social educational and economic changes Once a centerpiece of the communist state the study of science and technology in the university has now fallen victim to economic and social disarray Support for the teaching and funding of science and technology is of primary

importance for the economic health of any modern nation The ten chapters of this work examine what happens to a scientific and technological establishment that suddenly has to make its own way as exemplified in many countries worldwide today

Case Studies in Science Education University of Illinois at Urbana-Champaign. Center for Instructional Research and Curriculum Evaluation,1978 **Using Science to Improve the BLM Wild Horse and Burro Program** Committee to Review the Bureau of Land Management Wild Horse and Burro Management Program,Board on Agriculture and Natural Resources,Division on Earth and Life Studies,National Research Council,2013-09-18 Using Science to Improve the BLM Wild Horse and Burro Program A Way Forward reviews the science that underpins the Bureau of Land Management s oversight of free ranging horses and burros on federal public lands in the western United States concluding that constructive changes could be implemented The Wild Horse and Burro Program has not used scientifically rigorous methods to estimate the population sizes of horses and burros to model the effects of management actions on the animals or to assess the availability and use of forage on rangelands Evidence suggests that horse populations are growing by 15 to 20 percent each year a level that is unsustainable for maintaining healthy horse populations as well as healthy ecosystems Promising fertility control methods are available to help limit this population growth however In addition science based methods exist for improving population estimates predicting the effects of management practices in order to maintain genetically diverse healthy populations and estimating the productivity of rangelands Greater transparency in how science based methods are used to inform management decisions may help increase public confidence in the Wild Horse and Burro Program **Science In Medicine** Ushma S.
