C. S. Peirce and the Deconstruction of Tradition Gheorghe Jurj,2023-01-20 What professional philosophy needs most today is a new and fresh imagination Only this will enable a move away from the traditional positions and schools such as realism idealism pragmatism and empiricism Nothing much will happen in philosophy as long as its main object is the defense of a position expressed in history As this book argues there is no thinker better positioned to overcome this impasse than Charles Sanders Peirce who through emancipation from the intellectual fortifications of the past made a fresh imagination spring forth This text ably guides the reader through the work and thought of Peirce It first analyses his dialogue with the traditions of philosophy and semiotics from Aristotle to the present day before moving on to a close study of Peirce s own ontology epistemology and logic

includes several definition proposals **Signs in the Dust** Nathan Lyons,2019-02-28 Modern thought is characterized by a dichotomy of meaningful culture and unmeaning nature Signs in the Dust uses medieval semiotics to develop a new theory of nature and culture that resists this familiar picture of things Through readings of Thomas Aquinas Nicholas of Cusa and John Poinsett John of St Thomas it offers a semiotic analysis of human culture in both its anthropological breadth as an enterprise of creaturely sign making and its theological height as a finite participation in the Trinity which can be understood as an absolute cultural nature Signs in the Dust then extends this account of human culture backwards into the natural depth of biological and physical nature It puts the biosemiotics of its medieval sources along with Félix Ravaisson's philosophy of habit into dialogue with the Extended Evolutionary Synthesis that is emerging in contemporary biology to show how all living things participate in semiosis so that that a cultural dimension is present through the whole order of nature and the whole of natural history It also retrieves Aquinas doctrine of intentions in the medium to show how signification can be attributed in a diminished way to even inanimate nature with the ontological implication that being as such should be reconceived in semiotic terms The phenomena of human culture are therefore to be understood not as breaks with a meaningless nature but instead as heightenings and deepenings of natural movements of meaning that long precede and far exceed us Against the modern divorce of nature and culture Signs in the Dust argues that culture is natural and nature is cultural through and through Engrams Johannes Gräff,Steve Ramirez,2024-07-15 This is the first book to extensively explore the current state of the art and promise of engram cells the closest physical approximation of the memory trace to date Converging evidence suggests that memories are stored at least in part as specific populations of engram cells In this book the leading experts in engram biology share their continuously refined insights on how engram cells contribute to information encoding and storage across diverse brain regions and behavioral modalities Engrams A Window into the Memory Trace is broad in scope and spans molecular cellular circuit computational as well as societal philosophical aspects of memory engrams Particular emphasis is placed on their emerging translational value for memory dysfunctions in age and stress related disorders

of thought and inquiry Departing from readings that contrast Peirce s treatment of purpose end and teleology with his early studies of Kant Gabriele Gava instead argues that focusing on Peirce s purposefulness as a necessary regulative in the Kantian sense condition for inquiry and semiotic processes allows for a transcendental interpretation of Peirce s philosophical project The author advances this interpretation through presenting original views on aspects of Peirce s thought including a detailed analysis of Peirce s methodic and speculative rhetoric as well as his critical common sensism a comparison between Peirce s and James pragmatism in view of the account of purposefulness Gava puts forth and an examination of the logical relationships that order Peirce s architectonic classification of the sciences
