Virilio Live John Armitage, 2001-08-21 Edited by one of the leading Paul Virilio authorities this book offers the reader a guide through Virilio's work Using the interview form Virilio speaks incisively and at length about a vast assortment of cultural and

theoretical topics including architecture and speed space chronopolitics art and technoculture modernism postmodernism and hypermodernism the time of the trajectory and the information bomb His thoughts on Foucault Baudrillard Deleuze and Guattari the performance artist Stelarc the Persian War and the Kosovo War are also gathered together Crepuscular Dawn Paul Virilio, Sylvère Lotringer, 2002-11-08 The genetic bomb marks a turn in the history of humanity The accident is a new form of warfare It is replacing revolution and war Sarajevo triggered the First World War New York is what Sarajevo was September 11th opened Pandora's box The first war of globalization will be the global accident the total accident including the accident of science And it is on the way In 1968 Virilio abandoned his work in oblique architecture believing that time had replaced space as the most important point of reflection because of the dominance of speed We were basically on the verge of converting space time into space speed Speed facilitates the decoding of the human genome and the possibility of another humanity a humanity which is no longer extra territorial but extra human Crepuscular Dawn expands Virilio's vision of the implosion of physical time and space onto the micro level of bioengineering and biotechnology In this cat and mouse dialogue between Sylvère Lotringer and Paul Virilio Lotringer pushes Virilio to uncover the historical foundations of his biotech theories Citing various medical experiments conducted during World War II Lotringer asks whether biotechnology isn't the heir to eugenics and the science for racial improvement that the Nazis enthusiastically embraced Will the endocolonization of the body come to replace the colonization of one's own population by the military Both biographical and thematic the book explores the development of Virilio's investigation of space architecture urbanism and time speed and simultaneity that would ultimately lay the foundation for his theories on biotechnology and his startling declaration that after the colonization of space begins the colonization of the body Security, Technology and Global Politics Mark Lacy, 2014-02-05 This book analyses some of the key problems explored in Paul Virilio's theorising on war and security Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military security technologies and how technologies of security and acceleration have transformed society economy and politics His examination of the connections between geopolitics war speed technology and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty first century interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer faster networked and more efficient Security Technology and Global Politics examines some of the key concepts and concerns in Virilio's writings on security society and technology endo colonization fear and the war on terror cities and panic cinema and war ecological security and integral accidents universities and ideas of progress Critics often point to an apocalyptic or fatalistic element to Virilio's writings on global politics but this book challenges this apocalyptic reading of Virilio's work suggesting that while he doesn't provide us with easy solutions to the problems we face the political force in Virilio's work comes from the questions he leaves us with about speed security and global politics in times of crisis terror and fear This book will be of interest to

Theoretical Approach to Modern American History and Literature W. Lawrence Hogue, 2020-01-10 This book reconfigures the history of modern America showing how multiple and at times vulnerable social economic literary and political movements levels divisions and conditions such as the emergent middle class the labor movement the Progressive Movement the socialist and communist parties the Women s movements the NAACP the Garvey movement Asian and Native American resistance movements writers artists and intellectuals seized upon social gender economic and racial inequalities and challenged a singularly defined modern America This book re represents the modern American novel accenting the different critical literary voices that come out of the mainstream consumer society but also out of the various unequal social economic gender and political movements and situations In including racial gender sexual colonial class and ethnic others who reject the rigidity the repression the racial and ethnic stereotyping the external and internal colonialism the complication rejection of the past nature and the violence of the institutionalized conformist norm in a discussion of the modern American novel it effects a fundamental recasting of the modern Americanist paradigm one that is de centered richer more complex and more diverse **The American Politics of French Theory** Jason Demers, 2019-01-01 Working from the premise that May 68 is a shorthand that delimits an intensive decade of global revolt Jason Demers documents the cross pollination of French philosophy international activist movements and American countercultures From the assassinations of Martin Luther King Jr and George Jackson to the revolt at Columbia University the 1968 Democratic National Convention Woodstock and the Weather Underground Demers writes French theory into a constellation of American events and icons uncontained by national borders More than a compelling new take on the history of theory The American Politics of French Theory develops concepts gleaned from the work of Derrida Deleuze Guattari and Foucault providing new tools for thinking about translation theory and politics By recontextualizing French theory within a complex fabric of mass communication and global revolt Demers demonstrates why it is politically potent and methodologically necessary to think of translation associatively
