Translation Studies has been the standard reference in the field since it first appeared in 1998. The second extensively revised and extended edition brings this unique resource up to date and offers a thorough critical and authoritative account of one of the fastest growing disciplines in the humanities. The Encyclopedia is divided into two parts and alphabetically ordered for ease of reference. Part I General covers the conceptual framework and core concerns of the discipline. Categories of entries include central issues in translation theory e.g. equivalence, translatability, unit of translation, key concepts e.g. culture, norms, ethics, ideology, shifts, quality, approaches to translation and interpreting e.g. sociological, linguistic, functionalist, types of translation e.g. literary, audiovisual, scientific and technical, types of interpreting e.g. signed language, dialogue, court. New additions in this section include entries on globalisation, mobility, localization, gender and sexuality, censorship, comics, advertising and retranslation among many others. Part II History and Traditions covers the history of translation in major linguistic and cultural communities. It is arranged alphabetically by linguistic region. There are entries on a wide range of languages which include Russian, French, Arabic, Japanese, Chinese and Finnish and regions including Brazil, Canada and India. Many of the entries in this section are based on hitherto unpublished research. This section includes one new entry: Southeast Asian tradition. Drawing on the expertise of over ninety contributors from thirty countries and an international panel of consultant editors, this volume offers a comprehensive overview of translation studies as an academic discipline and anticipates new directions in the field.

**Close to Home** Juan C. Guerra, 1998-10-30. When teachers are familiar with what adults and children bring with them into the classroom they are far better prepared to develop appropriate curricula and pedagogical techniques. Close to Home is a unique portrayal and analysis of the language literacy and cultural resources of a social network of Mexican adults living in a rural community in Mexico and Chicago's inner city. By exploring the ways in which this group's experiences as immigrants have affected their communicative practices, the author provides a basis for understanding how researchers, policy makers and educators can provide these adults and their children with a relevant education that effectively embraces their schooling and lived experience. After establishing a historical and sociocultural context for the author's analysis, this rich ethnographic study presents a variety of oral and written sample texts including tape recordings of everyday oral language use, personal letters and autobiographical writing.

**Linguistic Landscapes** Jeffrey L. Kallen, 2023-06-22. Visible language is widespread and familiar in everyday life. We find it in shop signs, advertising billboards, street and place name signs, commercial logos and slogans and visual arts. The field of linguistic landscapes draws on insights from sociolinguistics, language policy and semiotics to show how these public forms of language relate to multiple issues in language policy, language rights, language and education, language and culture and globalization. Stretching from the

earliest stone inscriptions to posters and street signs and to today's electronic media linguistic landscapes sit at the crossroads of language society geography and visual communication Written by one of the pioneers of the field this is the first book length synthesis of this exciting rapidly developing field Using photographic evidence from across three continents it demonstrates the methodology and approaches used and summarises its findings and developments so far It also seeks to answer common questions from its critics and to suggest new directions for further study     Knowledge & Discourse Colin Barron, Nigel Bruce, David Nunan, 2014-06-06 Knowledge and Discourse presents an ecological approach to the study of discourse in social academic and professional practices It brings together distinguished scholars from diverse cultures India China Australia Canada among others and disciplines linguistics anthropology sociology philosophy The chapters collectively illustrate the ecological approach by exploring how language makes connections between subjective experiences as people construct meaning and action This book offers the reader a holistic interdisciplinary approach to the study of language as discourse questioning traditional views of disciplinary knowledge and the role of discourse in the pursuit construction and compartmentalisation of such knowledge Through the variety of disciplines experiences and approaches the contributors show how the world and word are contingent on each other The notions of connectivity contingency and change are themes that run through the book and in the interweaving of these themes readers will find persuasive illustrations of an ecological approach to applied linguistics     *The British National Bibliography* Arthur James Wells, 2005     **English Teaching Forum**, 1969
