Sensitive Chaos:

Sensitive Chaos Theodor Schwenk, 1965 The main object of study in this book is water water is not regarded as an indispensable raw material by the author but as a living element whose essential nature has never yet been adequately recognised He studies water in a comprehensive survey of its behaviour in the full range of its activities Sensitive Chaos Theodor Schwenk, 1965 **Foodwise** Wendy E. Cook, 2012-12-17 Wendy Cook's fascination with nutrition began during her war time childhood In the midst of deprivation and food rationing the rich abundance of her mother's organic garden made a profound impression In her twenties married to Peter Cook she discovered the artistic and magical effects that food could have in creating a convivial atmosphere During this period she cooked for many well known names including John Lennon Paul McCartney Dudley Moore Peter Ustinov and Alan Bennett But it was only later through her daughter falling ill that she came to study and understand deeper aspects of nutrition and in particular the effects of different foods on human health and consciousness In *Foodwise* Wendy Cook presents a remarkable cornucopia of challenging ideas advice and commentary informed by the seminal work of the scientist Rudolf Steiner She begins the volume with biographical glimpses relating to her experience of food and how it has influenced her life She then presents an extraordinary perspective on the journey of human evolution relating it to changes in consciousness and the consumption of different foods In the following section she considers the importance of agricultural methods the nature of the human being the significance of grasses and grains the mystery of human digestion and the question of vegetarianism In the next section she analyses the building blocks of nutrition looking in some detail at the nutritional or otherwise qualities of many foodstuffs including carbohydrates minerals fats and oils milk and dairy products herbs and spices salt and sweeteners stimulants legumes the nightshade family bread water and dietary supplements She ends with practical tips on cooking planning menus children's food sharing meals and some mouth watering recipes *Foodwise* presents a treasure of wisdom and experience for anybody with a concern for the content of the food they eat or a desire to discover more about the physical soul and spiritual aspects of nutrition

V. Glasgow,2009 Water is

commonly taken for granted and treated with contempt yet it is the very foundation of human existence Assuming countless forms it is deeply associated both with life and death body and soul purity and pollution creation and destruction The Concept of Water seeks to bring together the various aspects of our deeply ambiguous relationship with water providing a systematic account of its symbolic and philosophical significance This involves looking at how water has been conceived and the role it has played in everyday thought mythology literature religion philosophy politics and science both across cultures and through history R D V Glasgow was born in Sheffield and currently lives in Zaragoza His previous books are Madness Masks and Laughter 1995 Split Down the Sides 1997 and The Comedy of Mind 1999 The Sixth Sense Reader David Howes,2024-11-01 What is the sixth sense Is it physical mental or spiritual Do we all possess it or is it unique to exceptional individuals Might there be a seventh sense and an eighth sense as well What role does culture play in determining the range of our perceptual abilities The search for a supplementary sense has taken many directions and yielded numerous possibilities for an additional faculty of perception from magnetism and movement to dreaming and clairvoyance Stimulating reflection and debate The Sixth Sense Reader explores the cultural contexts which give rise to such reports of psychic and other powers that exceed the ordinary bounds of sense In this groundbreaking volume leading scholars in history anthropology and biology take the reader on a tour of the far borderlands of consciousness From the world beneath to the world beyond the five senses every potential avenue of sensation is opened up for investigation
