Sensuous Architecture The Art Of Erotic Building:

Sensuous Architecture Christian Werner Thomsen, Angela Krewani, 1998 Architecture comprises sensuous even erotic elements In this ground breaking book the authors undertake the first ever examination of this aspect of architecture Having introduced us to the concept of sensuous architecture the book presents us with a chronological analysis starting with the summer residences on the Loire and in Germany and continuing with discussions on English landscape garden and the Marquis de Sade's torture chambers before coming full circle with immaterial media architecture and cybersex Sensuous Architecture The Art of Erotic Building lends insights into the cultural history of the bathroom the erotic symbolism of towers and grottoes in various cultures and anthropomorphic architecture Examples of particularly sensuous residential buildings are certain to provide architects and their clients with stimulating ideas In a chapter on present day urban ambiances the author argues that personal well being and the general quality of life in our cities depend on architecture satisfying both the mind and the senses in equal measure Painting sculpture and wrapping art as well as the relationship between architecture and eroticism in film are examined The book concludes with a plea for an architecture of the senses

Sensuous architecture; the art of erotic building C.W. Thomsen, 1998 The Everyday and Architecture, 1998 **New Wombs** Maria Luisa Palumbo, 2000-08-01 A sense of harmony and proportion has traditionally been achieved in architectural compositions by using the dimensions of the human body as the starting point Modern technology now enables us to go beyond these physical dimensions into a virtual world and this poses a challenge to architecture as we usually perceive it Interactive flexible and intelligent models are being called for Whilst technology is taking us into the realms of virtual reality architecture on the other hand is becoming more corporeal Postorganic is the term being used to express this merging of the body and architecture brought about by electronic media A radical change in perspective is blurring the distinction between the organic and mechanic and the artificial logic of the computer and the natural logic of man are fusing together

Flexible Forming for Fluid Architecture Arno Pronk, 2021-10-11 This book on flexible formwork for fluid architecture is a multi faceted research that covers a broad field from design to material and technology and from history to future developments It offers a pragmatic approach that can be extended with more cases materials techniques and methods for fluid architecture and provides a better understanding of the main aspects of fluid architecture and to help them find the most suitable combinations of all aspects The book is a challenging experience with many new discoveries including two patents one on moulding of fluid surfaces and one on 3D printing of fibre reinforced ice It also features two world records the largest span 30 meters and the highest thin shell structure 30.5 meters in ice as well as a method for the construction of a fully laminated shell structure in insulated glass

Primal Perception Kye Anthony Archuleta, 2001 Architecture and Identity Peter Herrle, Erik Wegerhoff, 2008 This book brings together complex fields of knowledge and globally splintered discourses on a subject that is experienced not only by scholars but in the everyday lives of people around the world There is

a common complaint about the loss of identity which to a substantial degree is being associated with the built environment in cities and specifically with their architecture Architecture and Identity takes a global multidisciplinary look on how identities in contemporary architecture are constructed The general hypothesis underlying this book is that in a globalized world identity in architecture cannot be easily derived from distinct indigenous patterns The book presents forty contributions from various disciplines aiming to destroy the myth of an inheritable or otherwise prefabricated identity Some authors dismantle constructs of identity that have long been considered as solid and unbreakable while others meticulously unravel the construction process of identities in *Books In Print 2004-2005* Ed Bowker Staff,Staff Bowker, Ed,2004 Sensing Cities Monica Montserrat Degen,2008 As cities globally re design their urban landscapes they produce a different urban aesthetic and create new experiential milieus Urban regeneration processes generate radical physical social and cultural changes in neighbourhoods that demand new conceptual frameworks to address their impact upon daily urban life Sensing Cities investigates the reconfiguration of contemporary public space and life through the prism of the senses The book explores how the increased stylization of cityscapes requires an understanding of public life as a spatial sensuous encounter Degen examines how power relations in public spaces are embedded in exercised and resisted through the sensuous geography of place This sensory paradigm is then applied to compare two emblematic regeneration projects namely el Raval in Barcelona and Castlefield in Manchester By combining detailed ethnographic analysis and interviews with those involved in planning regeneration processes and those experiencing them the book argues that a changing sensuous landscape is crucial in redefining people s social practices attachments and experiences in places Focusing on two European cities at the forefront of urban design Barcelona and Manchester Degen draws on sociology geography anthropology cultural and architectural studies to provide a critical account of the politics of publicness in the entrepreneurial city With numerous photographs and maps this book stresses the ongoing embodied and active nature of regeneration as a lived social process rather than merely a physical or economic exercise Ultimately Sensing Cities examines how urban regeneration is made effective through the organisation of sensory experience This book is essential reading for students and researchers of Architecture Urban Studies and Human Geography *Sex and Buildings* Richard J. Williams,2013-07-15 Massive modern skyscrapers obelisks towers all are structures that thanks to their phallic shape are often associated with sex But other buildings are more subtly connected as they provide the frameworks for our sexual lives and act as reminders of our sexual memories This relationship between sex and buildings mattered more than ever in the United States and Europe during the turbulent twentieth century when a culture of unprecedented sexual frankness and tolerance emerged and came to dominate many aspects of public life Part architectural history part cultural history and part travelogue Sex and Buildings explores how progressive sexual attitudes manifest themselves in architecture asking what progressive sexuality might look like architecturally and exploring the successes and failures of buildings attempts to reflect it In search of structures that reflect the sexual mores of their

inhabitants Richard J Williams visits modernist buildings in Southern California the Westin Bonaventure Hotel the Playboy Mansion in Chicago the Seagram in New York communes from the 1960s and more A fascinating and often funny look at a period of extraordinary social change coupled with aesthetic invention Sex and Buildings will change the way we look at the buildings around us **Bookseller** ,1998 *World Made Sexy* Paul Rutherford,2007-08-11 The cult of eroticism is a pervasive force in modern society affecting almost every aspect of our daily lives In this book Paul Rutherford argues that this phenomenon is a product of one of the major commercial and political enterprises of the twentieth and twenty first centuries the creation of desire for sex for wealth and for entertainment A World Made Sexy examines museum exhibitions art books magazines films and television to explore the popular rise of eroticism in America and across the developed world Starting with a brief foray into the history of pornography Rutherford goes on to explore a sexual liberation movement shaped by the ideas of Marx and Freud the erotic styles of Salvador Dali and pop art the pioneering use of publicity as erotica by Playboy and other media and the growing concerns of cultural critics over the emergence of a regime of stimulation In one case study Rutherford pairs James Bond and Madonna in order to examine the link between sex and aggression He details how television advertising after 1980 constructed a theatre of the libido to entice the buying public and concludes by situating the cultivation of eroticism in the wider context of Michel Foucault's views on social power and governmentality and specifically how they relate to sexuality during the modern era A World Made Sexy is about power and pleasure emancipation and domination and the relationship between the personal passions and social controls that have crafted desire Building Culture Julian Rose,2024-09-03 An insider's look at art museums and how they shape the ways we view art through the eyes of the architects who design them Architects and art lovers everywhere will enjoy this remarkable collection of interviews from sixteen of the world's most celebrated thoughtful and innovative architects who have designed many of the world's greatest museums Spanning generations geographies and methods of architectural practice these architects share the complex and fascinating process of creating spaces for art Building Culture includes interviews with Frank Gehry who reveals how a half century of dialogue with the visual arts influenced his revolutionary Guggenheim Bilbao Kulapat Yantrasast who describes his rethinking of exhibition design and how it expands the presentation of work in venerable institutions like the Metropolitan Museum of Art where he is currently redesigning the galleries for the arts of Africa Oceania and the Americas Walter Hood whose long interest in improvisational techniques in music informed his design for outdoor performance spaces in the Oakland Museum Elizabeth Diller whose conception of the Shed in New York City's Hudson Yards was influenced by decades of work in conceptual and performance art Esteemed architects who have designed renovated or created galleries for MoMA the New Museum and the American Museum of Natural History in New York the National Gallery and the Tate Modern in London the Perez Art Museum Miami the Centre Pompidou in Paris the 21st Century Museum of Contemporary Art Kanazawa in Japan the Museum of West African Art currently under construction in Nigeria and many
