## **Separation Of Gases 5th Boc Priestley Conference:**

*Separation of Gases* Royal Society of Chemistry, 1990 Proceedings of the 5th BOC Priestley Conference focusing on techniques for separation of gases Both fundamental scientific aspects of gas separation and the economic engineering and industrial aspects of process design are addressed Separation of Gases, 1980 Adsorption Technology and Design W John Thomas, FEng, Barry Crittenden, 1998-04-27 The aim of this book is to provide all those involved in designing and running adsorption processes with a guide to adsorption technology and design **Industrial Gases** N.A. Downie, 2007-05-08 Industrial gases are inextricably woven into the fabric of modern manufacturing From the primary extraction of raw materials through their intermediate processing to manufacture metals chemicals and ceramics to the fabrication of sophisticated industrial consumer and food products gases are used across the whole spectrum of industry The isolation manufacture and supply of these gases is a major industry in itself the 300 million tones of gas used each year generates sales in excess of 20 billion In terms of tonnage nitrogen has become the most used industrial gas finding applications across the whole range of industry It is still manufactured by liquifying and then distilling air but as applications develop and demand increases newer methods of isolation such as pressure swing absorption and membrane separation will become important This new book introduces the main industrial gases and the gases industry it discusses the main technologies for their isolation separation manufacture and handling In addition the book contains an overview of the main applications of industrial gases and a brief discussion of new production processes and applications Chemists chemical engineers physicists and technologists involved in the research and development production or utilisation of industrial gases will find this concise book an essential and accessible reference source For advanced students of these disciplines the book provides a fascinating overview of this important industry **Separation of Gases** Royal Society of Chemistry (Great Britain), 1990 Proceedings of the 5th BOC Priestley Conference focusing on techniques for separation of gases Both fundamental scientific aspects of gas separation and the economic engineering and industrial aspects of process design are addressed *Pressure Swing Adsorption* Douglas M. Ruthven, S. Farooq, Kent S. Knaebel, 1996-12-17 Pressure Swing Adsorption is the first book that provides a coherent and concise summary of the underlying science and technology of pressure swing adsorption PSA processes at a level understandable to the practising engineer PSA has achieved widespread commercial acceptance as the technology of choice for hydrogen purification air separation and small scale air driers However PSA has numerous other actual and potential uses such as the recovery of methane from landfill gas the production of carbon dioxide and other large scale applications Since the design and optimization of a PSA process requires a somewhat mathematical model two chapters of the book provide in depth information on equilibrium theory and dynamic numerical simulation However this mathematical material will also help the general reader develop an understanding of the principles and strengths and limitations of various approaches PSA engineers chemical engineers environmental chemists academicians
