Serie Servicios Públicos 6 Regulación Y Control:

Regulación y control Gustavo Cresta, Mario Pedersoli, Fernanda Rubio, 2003 *El ecosistema digital y las autoridades de regulación de los sectores audiovisual y TIC* Luz Mónica Herrera Zapata, Jorge Murgueitio Cabrera, Sandra Milena Ortiz Laverde, 2018-02-07 El exponencial cambio tecnológico así como las innovaciones normativas asociadas a este han generado un importante debate doctrinal y jurisprudencial sobre las comisiones de regulación y el concepto mismo de la función de regulación. Estos temas constituyen materia de obligatorio estudio en las Facultades de Derecho Económico de los países. Sin embargo se aprecia una cierta ausencia de obras de investigación sobre la regulación económica de los servicios públicos en general y de los relacionados con las tecnologías de la información y las comunicaciones y el sector audiovisual en particular. Este hecho fue el que nos impulsó y el que dio origen a la presente obra colectiva liderada de manera conjunta por la Sala de Consulta y Servicio Civil del Consejo de Estado y el Departamento de Derecho de las Telecomunicaciones de la Universidad Externado de Colombia.

Derecho de los servicios públicos José Araujo-Juarez, 2023-11-01 La noción jurídica de servicio público resulta ser producto de un laborioso proceso teóricamente rico de elaboración hasta nuestros días en el que participan de consuno la legislación, la jurisprudencia y la doctrina científica de Derecho administrativo comparado. Desde entonces la noción jurídica es empleada tanto por el legislador como también es puesta en obra por el Juez administrativo y también más recientemente por el Juez constitucional. Su invocación justifica la aplicación de reglas de Derecho público específicas denominadas inicialmente como exorbitantes del Derecho común aplicable entre los sujetos privados. Por ello el servicio público es desde sus mismos orígenes una institución emblemática pero también sin duda una de las más controversiales que J. Morand Deviller resume así: El servicio público es sin duda la noción más compleja, evolutiva, controvertida y esencial del derecho administrativo. De cualquier modo hemos de interrogarnos si el servicio público sigue siendo una realidad innegable en los Derechos positivos de algunos países de la Europa Continental y de América Latina que han sido históricamente beneficiarios del Derecho administrativo francés como categoría jurídica de que se sirve el Estado Constitucional que no la niega para cumplir su responsabilidad constitucional indeclinable de satisfacer necesidades o demandas esenciales o vitales de la Sociedad. Por consiguiente la búsqueda de la dimensión jurídica es pues una cuestión de plena actualidad por lo demás apasionante en un ambiente de economía global de mercado y de libre competencia y de procesos de crisis y de consiguiente reconfiguración, revisión y actualización que quizás o sin el quizás como ningún otro sector se ha transformado de modo trascendental en las últimas décadas. En esta obra haremos referencia a la noción jurídica de servicio público en su sentido estricto y propio desde una nueva perspectiva contemporánea en razón de un cambio de fondo jurídico y político del modelo de regulación que ha presidido hasta hoy los sectores calificados con arreglo al Derecho de los Servicios Públicos.

Derecho de la regulación, los servicios públicos y la integración regional: Comparaciones y comentarios Gérard Marcou, Franck Moderne, 2009 **Regionalización de servicios públicos y propiedad municipal** David de la

Torre Vargas, 2015-02-03 Colombia atraviesa desde hace varios años por una grave crisis en materia de agua potable y saneamiento básico que en nuestros días ha concentrado todo tipo de esfuerzos tendientes a mejorar los niveles de calidad y cobertura. La más grande apuesta de los últimos años ha sido el esquema de regionalización denominado Planes departamentales de agua o programa agua para la prosperidad. Este nuevo modelo tiene una justificación económica importante pero con fundamentos jurídicos insuficientes que difícilmente armonizan con el diseño que la Constitución Política de Colombia definió para los servicios públicos domiciliarios: libertad de entrada, libre competencia económica y la asignación de un rol determinante en los municipios. La presente obra hace una detallada investigación académica de dicho esquema y aborda una de las principales implicaciones del mismo desde la perspectiva del derecho de los bienes públicos y la propiedad municipal y pretende con ello materializar la orientación constitucional que tiene al municipio como entidad fundamental de la división político administrativa del Estado.

Routledge Handbook of Consumer Protection and Behaviour in Energy Markets Tina Soliman Hunter, Marcin Kraśniewski, Jurgita Malinauskaite, Marzena Czarnecka, 2024-09-27 The Routledge Handbook of Consumer Protection and Behaviour in Energy Markets provides a comprehensive study of consumer protection and consumer behaviour in selected jurisdictions worldwide. Each chapter is written by experts and provides a contemporary overview of national consumer protection and policy developments in the energy sector. Today energy has become an essential factor in ensuring the socio-economic development of any country and improving the quality of life of society and is now an essential element of life for everyone. The energy market has become a competitive market based on the assumption that generation and sale of energy is not a natural monopoly and that market mechanisms in particular competition between energy companies are the best way to reduce prices and improve customer service. The purchase of energy is inextricably linked with its distribution from the producer to the purchaser. The book shows that well-functioning energy markets need informed and well-protected consumers who can benefit from competition and transparent offers. They are free to choose the most competitive providers and know their rights with access to effective means of redress. Given that the energy market has a specific technical nature, the book analyses the energy market within the scope of free market principles with a focus on the protection of the weaker party to the contract: the consumer. In addition, consumers can also play an active part of the clean energy transition.

El nuevo servicio público, actividades reservadas y regulación de actividades de interés general (electricidad, gas, telecomunicaciones y radiodifusión), 2002 **La guerra y los servicios públicos de carácter industrial** Pablo de Azcarate, 1911 **Anales de las obras públicas del Perú** Peru. Dirección de Obras Públicas, 1920 **Servicios públicos y medio ambiente Tomo II** Varios autores, 2011-10-01 Este libro es el resultado de un proyecto de investigación jurídica y ambiental realizado por el grupo de investigación en Derecho del Medio Ambiente de la Universidad Externado de Colombia con el apoyo de la Asociación de Empresas de Servicios Públicos Domiciliarios y Actividades Complementarias e Inherentes ANDESCO. Con él se busca resaltar la importancia que tiene el

medio ambiente en la prestación de los servicios públicos bien como proveedor de insumos o bien como receptor de sustancias y materiales derivados de la prestación de estos. Adquiera también el primer tomo de esta obra Servicios públicos y regulación Miguel Solanes, 1999 Régimen jurídico de los vertimientos en Colombia María del Pilar García Pachón, 2017-09-01 Los parámetros cuantitativos del agua más que favorables que posee Colombia pueden ser claramente alterados y en muchos supuestos lo son si la calidad de las aguas es degradada por vertimientos sin tratamiento previo y además como muchas veces sucede se trata de actividades clandestinas ya que no cuentan con autorización administrativa. Este libro aborda con rigor jurídico y con múltiple documentación práctica el estado actual de los vertimientos en Colombia y llama la atención sobre la contradicción que se da entre la realidad que describe y las premisas de las que parte su Constitución de 1991 justamente denominada ecológica. A esos efectos y tras el correspondiente estudio se proponen soluciones destinadas a la mejora en el funcionamiento tanto de los servicios públicos como de la situación ambiental de los ríos.
