## Serpent Circus:

The Serpent's Last Secret Gail Logan, 2017-06-29 A missing gem containing the secrets of the universe becomes a cause célèbre when the nearest solar system powers intervene in planet Earth's future. Included in the effort to obtain the ruby known as the Serpent's Last Secret is Earth's twenty-first century time traveler John Pelletier, the giant mole Murdock, first minister of Mars, Earth physicist Prof Whitfield, and the sorcerer Vorelis who, with his two lovely daughters, presides over a fragment of the lost continent of Mu. Written with humor and wit, the novel comes to a stunning conclusion when the nearest solar system powers gather on Mars sixteen thousand years ago in a last ditch effort to save twenty-second century planet Earth and their own worlds too. *Dust Be the Serpent's Meat* Carver Wendell Waters, 2003-10-16 Set in a small town near the Gulf of Mexico, this novel is both social commentary on the lives of Black folk as well as an examination of the lives of five Black boys during the summer of 1954. The adult Black folk in Riverville are keenly aware of family histories which have developed under segregation but which are interrelated to the white community. The diversity, resilience, and faults of these characters do not hinder their progress towards equality. Birds of Prey José Hernán Sarasola, Juan Manuel Grande, Juan José Negro, 2018-06-30 This book will provide the state of the art on most of the topics involved in the ecology and conservation of birds of prey. With chapters authored by the most recognized and prestigious researchers on each of the fields, this book will become an authorized reference volume for raptor biologists and researchers around the world. *A World Checklist of Birds* Burt L. Monroe, Charles G. Sibley, 1997-02-27 Many field ornithologists record where and when they identify species of birds, especially when they encounter a species out of its normal range or for the first time. Until now, however, a checklist based on the Sibley-Ahlquist-Monroe classification has not been available. In this book, Burt L. Monroe Jr. and Charles G. Sibley provide a list of 9,702 living avian species based on their 1990 book *Distribution and Taxonomy of Birds of the World* and its 1993 Supplement. Raptors of the World David A. Christie, James Ferguson-Lees, 2010-07-30 Covering every species of raptor on the planet, this book is perfect for anyone with an interest in birds of prey. *Birdwatch* This guide covers all the world's 313 raptor species, illustrated with adult, juvenile, and selected immature plumages as well as main geographical races. There are illustrations of over 2,000 perched and flying birds, some with typical prey and facing texts summarizing length, wingspan, male to female proportion, shape, and flight. The text is further enhanced with line drawings illustrating specific points about identification and behaviour. Raptors of the World James Ferguson-Lees, David A. Christie, 2001 Plates 1-3 illustrate representatives in flight of all 78 genera, grouped by size and zoogeographical regions. **Photographic Guide to the Birds of India** Bikram Grewal, Bill Harvey, Otto Pfister, 2014-11-04 Periplus is proud to present the first comprehensive photographic guide to the birds of the Indian subcontinent.
