Sublime Dreams of Living Machines Minsoo Kang, 2011-02-28 Historian Minsoo Kang argues that to properly understand the human as machine and the human as fundamentally different from machine we must trace the origins of these ideas and examine how they were transformed by intellectual cultural and artistic appearances of the automaton throughout the history of the West Kang tracks the first appearance of the automaton in ancient myths through the medieval and Renaissance periods marks the proliferation of the automaton as a central intellectual concept in the Scientific Revolution and the subsequent backlash during the Enlightenment and details appearances in Romantic literature and the introduction of the living machine in the Industrial Age He concludes with a reflection on the destructive confrontation between humanity and machinery in the modern era and the reverberations of the humanity machinery theme today

Religion and Transhumanism Calvin Mercer, Tracy J. Trothen, 2014-11-17 Should technology be used to improve human faculties such as cognition and longevity This thought provoking dialogue between transhumanism and religion examines enhancement technologies that could radically alter the human species Transhumanism or human enhancement is an intellectual and cultural movement that advocates the use of emerging technologies to change human traits Although they may sound like science fiction the possibilities suggested by transhumanism are very real and the questions they raise have no easy answers If these enhancements especially major ones like the indefinite extension of healthy human life become

widely available they would arguably have a more radical impact on humankind than any other development in history This book comprises essays that explore transhumanism and the issues that surround it addressing numerous fascinating questions posed by scholars of religion from various traditions How will immortality or extreme longevity change our religious beliefs and practices How might pharmaceuticals enhance spiritual experiences Will post human technologies be available to all persons or will a superior post human race arise to dominate the human species The discussions are as intriguing as the future they suggest **Transmediating the Whedonverse(s)** Juliette C. Kitchens, Julie L.

Hawk, 2019-10-29 This book explores the transmedial nature of the storyworlds created by and or affiliated with television auteur writer and filmmaker Joss Whedon As such the book addresses the ways in which Whedon s storyworlds or verses employ transmedia both intrinsically as texts and extrinsically as these texts are consumed and in some cases reworked by audiences This collection walks readers through fan and scholar fan engagement intrinsic textual transmediality and Whedon s lasting influence on televisual and transmedia texts In closing the editors argue for the need to continue research into how the Whedonverse s lend themselves to transmedial study engage audiences in ways that take advantage of multiple media and encourage textual internalization of these engagements within audiences **H+/-** Gregory R. Hansell, 2011-01-25
