Hand and Mind David McNeill, 1992-08-15 A research subject is shown a cartoon like the 1950 Canary Row a classic Sylvester and Tweedy Bird caper that features Sylvester climbing up a downspout swallowing a bowling ball and slamming into a brick wall After watching the cartoon the subject is videotaped recounting the story from memory to a listener who has not seen the cartoon Painstaking analysis of the videotapes revealed that although the research subjects children as well as adults some neurologically impaired represented a wide variety of linguistic groupings the gestures of people speaking English and a half dozen other languages manifest the same principles Relying on data from more than ten years of research McNeill shows that gestures do not simply form a part of what is said and meant but have an impact on thought itself

The Opacity of Mind Peter Carruthers, 2013-08 Do we have introspective access to our own thoughts Peter Carruthers challenges the consensus that we do he argues that access to our own thoughts is always interpretive grounded in perceptual awareness and sensory imagery He proposes a bold new theory of self knowledge with radical implications for understanding of consciousness and agency *Quintessence of Dust: The Science of Matter and the Philosophy of Mind* Harry

Redner,2020-03-23 Quintessence of Dust by Harry Redner argues for a science of matter and a philosophy of mind based on emergence Mind emerges from matter through five essential stages quintessence Hamlet Human mind is differentiated from animal mind primarily by reference to art Homo ludens This approach draws support from Donald Edelman and other palaeoanthropologists psychologists and neurologists The emergent relation between two entities is defined as an indissoluble non identity The mind as machine thesis artificial intelligence and cognitivism are criticised The alternative emergentist approach comes close to Spinoza The book attempts a synthesis of the natural sciences social sciences and humanities based on philosophic premises I find the core of the argument as well as its exposition coherent convincing and illuminating I put Quintessence of Dust in the top 5% of books in the field Miguel Candel Sanmartin University of Barcelona in Thesis Eleven August 2022 Diachronic Perspectives on Embodiment and Technology Thiemo Breyer,Alexander Matthias Gerner,Niklas Grouls,Johannes F.M. Schick,2024-03-12 This book investigates the relationships between gestures and artefacts theoretically and historically by analyzing different phenomena stemming from a variety of fields such as robotics archaeology gesture studies anthropology philosophy and gestural practices like choreography music performance and composition It underlines how embodiment and technology change the interplay between maker and artefact over time and appeals to students and researchers in these fields Its goal is to enable the reader to understand that the recurring topics and questions as well as multi level similarities are by no means accidental but can best be understood if one pays attention to the intertwinements of materiality and cognition praxis and techne *Cognitive Models in Palaeolithic Archaeology* Thomas Grant Wynn,Frederick Lawrence Coolidge,2017 Cognitive Models in Palaeolithic Archaeology grew out of a specialized thematic session that we organized for the 2013 meeting of the European Society for the Study of Human Evolution Preface **Choice** ,2005 Advances in Child Development and Behavior ,2017-02-18 Advances in Child Development and Behavior Volume 52 includes chapters that highlight some of the most recent research in the field of developmental psychology Each chapter provides in depth discussions with this volume serving as an invaluable resource for developmental or educational psychology researchers scholars and students Contains chapters that highlight some of the most recent research in the area of child development and behavior Presents a wide array of topics that are discussed in detail *Emergence or Reduction?* Ansgar Beckermann,Hans Flohr,Jaegwon Kim,2011-07-20 No detailed description available for Emergence or Reduction Moving Ourselves, Moving Others Ad Foolen,Ulrike M. Lüdtke,Timothy P. Racine,Jordan Zlatev,2012-04-12 The close relationship between motion bodily movement and emotion feelings is not an etymological coincidence While moving ourselves we move others in observing others move we are moved ourselves The fundamentally interpersonal nature of mind and language has recently received due attention but the key role of e motion in this context has remained something of a blind spot The present book rectifies this gap by gathering contributions from leading philosophers psychologists and linguists working in the area Framed by an introducing prologue and a summarizing

epilogue written by Colwyn Trevarthen who brought the phenomenological notion of intersubjectivity to a wider audience some 30 years ago the volume elaborates a dynamical active view of emotion along with an affect laden view of motion and explores their significance for consciousness intersubjectivity and language As such it contributes to the emerging interdisciplinary field of mind science transcending hitherto dominant computationalist and cognitivist approaches Now Open Access as part of the Knowledge Unlatched 2017 Backlist Collection
