Minds At War Nuclear Reality And The Inner Conflicts Of Defense Policymakers:

Minds At War Steven Kull,1990-05-14 What must the mind of a defense policymaker be like Can nuclear Holocaust be rationalized Can reality be subverted by patriotism or competition Can an intelligent person think the unthinkable as a viable possibility This investigation into the psychology of defense planners and cabinet members is interesting and frightening Annotation copyrighted by Book News Inc Portland OR Bulletin of the Atomic Scientists ,1989-04 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *The Nuclear Seduction* William A. Schwartz,Charles Derber,2021-01-08 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990 **US Nuclear**

Weapons Policy After the Cold War Nick Ritchie,2008-08-08 This book offers an in depth examination of America s nuclear weapons policy since the end of the Cold War Exploring nuclear forces structure arms control regional planning and the weapons production complex the volume identifies competing sets of ideas about nuclear weapons and domestic political constraints on major shifts in policy It provides a detailed analysis of the complex evolution of policy the factors affecting policy formulation competing understandings of the role of nuclear weapons in US national security discourse and the likely future direction of policy The book argues that US policy has not proceeded in a linear rational and internally consistent direction and that it entered a second post Cold War phase under President George W Bush However domestic political processes and lack of political and military interest in America s nuclear forces have constrained major shifts in nuclear weapons policy This book will be of much interest to students of US foreign policy nuclear proliferation strategic studies and IR in general **Bulletin of the Atomic Scientists** ,1989-04 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **US Military Strategy and the Cold War**

Endgame Stephen J. Cimbala,2014-01-14 At the end of the Cold War security concerns are more about regional and civil conflicts than nuclear or Eurasian global wars Stephen Cimbala argues that deterrence characteristics of the pre Cold War period will in the 21st century again become normative *The State, Society, and Limited Nuclear War* Eric

Mlyn,1995-02-01 Drawing on theories of the state archives and interviews with top defense policymakers this book tells an important story of interest to any reader concerned with how security policy is fashioned in the United States **A Global History of the Nuclear Arms Race** Richard Dean Burns,Joseph M. Siracusa,2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of

key scientists military chiefs and political leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America's nuclear monopoly America's nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime Bridges and Boundaries Colin Elman, Miriam Fendius Elman, 2001-04-13 Bridges and Boundaries offers a conversation between what might loosely be described as traditionalist diplomatic and military historians and political scientists who employ qualitative case study methods to examine international relations The book opens with a series of chapters discussing differences commonalities and opportunities for cross fertilization between the two disciplines To help focus the dialogue on real events and research the volume then revisits three empirical topics that have been studied at length by members of both disciplines British hegemony in the nineteenth century diplomacy in the interwar period and the causes of World War II and the origins and course of the Cold War For each of these subjects a political scientist a historian and a commentator reflect on how disciplinary guild rules have shaped the study of international events The book closes with incisive overviews by Robert Jervis and Paul W Schroeder Bridges and Boundaries explores how historians and political scientists can learn from one another and illustrates the possibilities that arise when open minded scholars from different disciplines sit down to talk **Air University Library Index to Military Periodicals**, 1989 **Bulletin of the Atomic Scientists**, 1988-07 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world

Cultural Realism Alastair Iain Johnston, 2020-05-05 Cultural Realism is an in depth study of premodern Chinese strategic thought that has important implications for contemporary international relations theory In applying a Western theoretical debate to China Iain Johnston advances rigorous procedures for testing for the existence and influence of strategic culture Johnston sets out to answer two empirical questions Is there a substantively consistent and temporally persistent Chinese strategic culture If so to what extent has it influenced China's approaches to security The focus of his study is the Ming dynasty's grand strategy against the Mongols 1368 1644 First Johnston examines ancient military texts as sources of Chinese strategic culture using cognitive mapping symbolic analysis and congruence tests to determine whether there is a consistent grand strategic preference ranking across texts that constitutes a single strategic culture Then he

applies similar techniques to determine the effect of the strategic culture on the strategic preferences of the Ming decision makers Finally he assesses the effect of these preferences on Ming policies towards the Mongol threat The findings of this book challenge dominant interpretations of traditional Chinese strategic thought They suggest also that the roots of realpolitik are ideational and not predominantly structural The results lead to the surprising conclusion that there may be in fact fewer cross national differences in strategic culture than proponents of the strategic culture approach think

National Trauma and Collective Memory Arthur G. Neal, 2018-04-17 A fascinating exploration of our evolving national psyche this book chronicles major traumas in recent American history from the Depression and Pearl Harbor to the assassinations of the Kennedys and Martin Luther King Jr to Ruby Ridge Waco and Columbine how we responded to them as a nation and what our responses mean Reflecting on American popular culture as well as the media this edition includes a new chapter on 9 11 and other acts of terror within the United States as well as coverage of the Columbia space shuttle disaster New student friendly features including discussion questions and Symbolic Events boxes in each chapter give the book added value as a classroom supplement

Armageddon and Paranoia Rodric Braithwaite, 2018-02-09 A comprehensive chronological and gripping account of how nuclear policy has shaped world history

Compound Dilemmas Michael Dean McGinnis, John Taylor Williams, 2001 An explanation of how domestic support for U S defense expenditures was generated during the Cold War

Survival: April - May 2022 The International Institute for Strategic Studies (IISS), 2023-04-21 Survival the IISS s bimonthly journal challenges conventional wisdom and brings fresh often controversial perspectives on strategic issues of the moment In this issue Nigel Gould Davies assesses that Russia s war has not only unleashed countervailing strength among Ukrainians and Ukraine s supporters but also shattered myths about Russia s own strength Paul Meyer considers how an arms race in outer space where orbital debris is already a cause of concern might be restrained Kelsey Davenport contends that the US should embed denuclearisation within a broad set of transformational goals in future negotiations with North Korea Jonathan Yoni Shimshoni examines the North s flawed application of a society centric strategy towards the South during the American Civil War And nine more thought provoking pieces as well as our regular Book Reviews and Noteworthy column Editor Dr Dana Allin Managing Editor Jonathan Stevenson Associate Editor Carolyn West Assistant Editor Jessica Watson Editorial Assistant Charlie Zawadzki

Tokens of Power Ann Hironaka, 2017-03-06 War presents a curious paradox Interstate war is arguably the most carefully planned endeavor by states yet military history is filled with disasters and blunders of monumental proportions These anomalies happen because most military history presumes that states are pursuing optimal strategies in a competitive environment This book offers an alternative narrative in which the pillars of military planning evaluations of power strategy and interests are theorized as social constructions rather than simple material realities States may be fighting wars primarily to gain or maintain power yet in any given historical era such pursuits serve only to propel competition they do not ensure military success in subsequent generations

Allowing states to embark on hapless military ventures is fraught with risks while the rewards are few **US Foreign Policy in the Post-Cold War Era** T. Onea, 2013-10-17 Why has the US proven unable to enact a foreign policy of restraint in the post Cold War era For all but a brief period in the 1990s US foreign policy is marked by an assertive appearance despite relative hegemony This book examines the causes and impact of US foreign policy measuring its successes pitfalls and what the future has in store **Varieties of Sovereignty and Citizenship** Sigal R. Ben-Porath, Rogers M. Smith, 2012-11-29 In Varieties of Sovereignty and Citizenship scholars from a wide range of disciplines reflect on the transformation of the world away from the absolute sovereignty of independent nation states and on the proliferation of varieties of plural citizenship The emergence of possible new forms of allegiance and their effect on citizens and on political processes underlie the essays in this volume The essays reflect widespread acceptance that we cannot grasp either the empirical realities or the important normative issues today by focusing only on sovereign states and their actions interests and aspirations All the contributors accept that we need to take into account a great variety of globalizing forces but they draw very different conclusions about those realities For some the challenges to the sovereignty of nation states are on the whole to be regretted and resisted These transformations are seen as endangering both state capacity and state willingness to promote stability and security internationally Moreover they worry that declining senses of national solidarity may lead to cutbacks in the social support systems many states provide to all those who reside legally within their national borders Others view the system of sovereign nation states as the aspiration of a particular historical epoch that always involved substantial problems and that is now appropriately giving way to new more globally beneficial forms of political association Some contributors to this volume display little sympathy for the claims on behalf of sovereign states though they are just as wary of emerging forms of cosmopolitanism which may perpetuate older practices of economic exploitation displacement of indigenous communities and military technologies of domination Collectively the contributors to this volume require us to rethink deeply entrenched assumptions about what varieties of sovereignty and citizenship are politically possible and desirable today and they provide illuminating insights into the alternative directions we might choose to pursue *Navigating Public Opinion* Jeff Manza, Fay Lomax Cook, Benjamin I. Page, 2002-09-05 Do politicians listen to the public How often and when Or are the views of the public manipulated or used strategically by political and economic elites Navigating Public Opinion brings together leading scholars of American politics to assess and debate these questions It describes how the relationship between opinion and policy has changed over time how key political actors use public opinion to formulate domestic and foreign policy and how new measurement techniques might improve our understanding of public opinion in contemporary polling and survey research The distinguished contributors shed new light on several long standing controversies over policy responsiveness to public opinion Featuring a new analysis by Robert Erikson Michael MacKuen and James Stimson that builds from their pathbreaking work on how public mood moves policy in a macro model of policymaking the volume also includes several

critiques of this model by Lawrence Jacobs and Robert Shapiro another critique by G William Domhoff and a rejoinder by Erikson and his coauthors Other highlights include discussions of how political elites including state level policymakers presidents and makers of foreign policy use or shape public opinion and analyses of new methods for measuring public opinion such as survey based experiments probabilistic polling methods non survey based measures of public opinion and the potential and limitations of Internet polls and surveys Introductory and concluding essays provide useful background context and offer an authoritative summary of what is known about how public opinion influences public policy A must have for all students of American politics public opinion and polling this state of the art collection addresses issues that lie at the heart of democratic governance today
