Mineral Assessment Report ,1982 **Energy, Mineral, and Ground-water Resources of Carbon and Emery Counties, Utah** R. W. Gloyn,D.E. Tabet,B.T. Tripp,C.E. Bishop,C.D. Morgan,J.W. Gwynn,R.E. Blackett,2003 This report provides information for use in both short and long term land planning decisions particularly at the county level and an indication of the present and future economic impact of mineral and energy development The report discusses eight major commodity groups 1 oil and gas 2 coal and coal resin 3 coal bed methane 4 other energy resources oil impregnated rock oil shale geothermal 5 uranium and vanadium 6 metallic minerals 7 industrial rocks and minerals and 8 ground water resources In general for each group or commodity within a group the following aspects are discussed 1 known occurrences and characteristics 2 past production and trends 3 current production and exploration activity and 4 geologic potential Plates accompany each of the major commodity groups and show the locations of known resources and areas of geologic potential In addition to the commodity discussions the report contains a brief summary of land ownership status and concludes with a summary of commodities having the best potential for discovery and development 161 pages 14 plates **Proceedings: Mining and petroleum geology** Michael John Jones,1970 **U.S. Geological Survey Bulletin** ,1983 **Mineral Resources Review** ,1980 Report of Investigations - Minnesota Geological Survey ,1963 *The Geology of Scotland, 4th edition* N. H. Trewin,2003-02-24 This 4th edition of The Geology of Scotland is greatly expanded from the previous edition with 34 authors contributing to 20 chapters A new format has been adopted to provide a different perspective on the geology of Scotland A brief introduction is followed by a chapter outlining some of the important historical aspects that in the 19th century placed Scottish geologists in the forefront of a new science Scotland is constructed from a number of terranes that finally combined in roughly their present positions prior to about 410 million years ago Thus the geology of each terrane is described up the time of amalgamation providing chapters on the Southern Uplands Midland Valley Highlands Grampian and Hebridean terranes At the end of this section a brief synthesis summarizes the events that resulted in the amalgamation of the various terranes into the present configuration Traditional practice is followed in the description of the Old Red Sandstone Carboniferous Permo Trias Jurassic Cretaceous tertiary and Quaternary strata A separate chapter covers Tertiary igneous rocks An attempt is made to tell the story of the geological evolution of Scotland rather than catalogue all areas and formations Priority is given to the onshore geology encouraging the reader to go into the field and visit some of the world class geology on show in Scotland The chapters are broadly based attempting to integrate the sedimentary and igneous histories and summarize changes in palaeogeography and palaeoenvironments Economic aspects are covered with chapters on Metalliferous Minerals Bulk Resources Coal and Hydrocarbons A new departure is the chapter on aspects of Environmental Geology and sustainability Additionally this publication contains a colour section of 32 plates illustrating aspects of Scottish Geology as well as a coloured geological map of Scotland Annual Report of the State Board of

Comparative Climatology of Terrestrial Planets Stephen J. Mackwell, Amy A. Simon-Miller, Jerald W. Harder, Mark A. Bullock, 2014-01-25 The early development of life a fundamental question for humankind requires the presence of a suitable planetary climate Our understanding of how habitable planets come to be begins with the worlds closest to home Venus Earth and Mars differ only modestly in their mass and distance from the Sun yet their current climates could scarcely be more divergent Only Earth has abundant liquid water Venus has a runaway greenhouse and evidence for life supporting conditions on Mars points to a bygone era In addition an Earth like hydrologic cycle has been revealed in a surprising place Saturn s cloud covered satellite Titan has liquid hydrocarbon rain lakes and river networks Deducing the initial conditions for these diverse worlds and unraveling how and why they diverged to their current climates is a challenge at the forefront of planetary science Through the contributions of more than sixty leading experts in the field *Comparative Climatology of Terrestrial Planets* sets forth the foundations for this emerging new science and brings the reader to the forefront of our current understanding of atmospheric formation and climate evolution Particular emphasis is given to surface atmosphere interactions evolving stellar flux mantle processes photochemistry and interactions with the interplanetary environment all of which influence the climatology of terrestrial planets From this cornerstone both current professionals and most especially new students are brought to the threshold enabling the next generation of new advances in our own solar system and beyond

Geology's Significant Sites and their

Contributions to Geoheritage R. M. Clary, E.J. Pyle, W.M. Andrews, 2024-07-23 The contributions in this book explore several geologically significant sites and in doing so acknowledge and explore not just the geological exposures themselves but also the people and issues that are fundamentally intertwined with the history of our science and its impact on our society Through selective examples of outcrops and locales integral to the history of geology we explore the evolution of modern geology as well as the geodiversity and geoheritage of our planet While the volume is far from comprehensive the chapters contained herein detail a range for geoheritage value scale of geoheritage sites and potential for geoheritage opportunities that will promote a broader richer understanding of the complexity of the geoheritage of Earth Importantly many chapters offer a cautionary tale of sites almost lost to posterity and submit their take away lessons for community mobilization towards geoheritage site protection The Geomorphology of North-west England Richard Hugh Johnson, 1985
