Die Auswirkungen von kreativem Tanzunterricht auf die Graphomotorik von Erstklässlern Nicole Mühlporfte, 2009 Handschriftliches Schreiben besitzt auch in der heutigen Gesellschaft einen hohen Stellenwert Umso mehr muss man bei Berichten aufhorchen die von Schwierigkeiten beim Erwerb dieser Kulturtechnik berichten Die Gründe für diese Schwierigkeiten sind sehr vielfältig Bereits geringe Entwicklungsstörungen der Motorik der Perception oder des komplexen

Integrationsprozesses können zu Komplikationen im Schriftspracherwerb führen. Wie kann man diesen Prozess unterstützen? Seit ein paar Jahren wird in Deutschland in wachsendem Maße der Bereich Tanz in der Schule diskutiert. In dieser Studie wurde untersucht, inwiefern kreativer Kindertanz die SchülerInnen im Sinne einer ressourcenorientierten Förderung beim Erwerb der Graphomotorik unterstützen kann. Die quasiexperimentelle Feldstudie im Pre-Posttestdesign mit Kontrollgruppe fand über dreieinhalb Monate an zwei Grundschulen statt. Als Berührungsmaterialien dienten ein allgemeiner Motoriktest (Zimmer 2005) und zwei Tests zur Graphomotorik (Rudolf 1986, Mai-Marquardt 2004/06) sowie ein selbst entwickelter Fragebogen zur Erfassung der Tanzmotivation. Die Auswertung ergab hinsichtlich qualitativer Schriftaspekte für die Tanzgruppe eine signifikante Mehrverbesserung. Die computergestützte Analyse ergab eine positive Tendenz für die Korrektheit der Formenwiedergabe. Cumulated Index Medicus, 1991 **HCI International 2019 - Posters** Constantine

Gero, 2014-09-03 Design thinking: the label given to the acts of designing has become a paradigmatic view that has transcended the discipline of design and is now widely used in business and elsewhere. As a consequence, there is an increasing interest in design research. This is because of the realization that design is part of the wealth creation of a nation and needs to be better understood and taught. The continuing globalization of industry and trade has required nations to re-examine where their core contributions lie, if not in production efficiency. Design is a precursor to manufacturing for physical objects and is the precursor to implementation for virtual objects. At the same time, the need for sustainable development requires the design of new products and processes which

feeds a movement towards design innovations and inventions The papers in this volume are from the Fifth International Conference on Design Computing and Cognition DCC 12 held at Texas A M University USA They represent the state of the art of research and development in design computing and design cognition They are of particular interest to researchers developers and users of advanced computation in design and those who need to gain a better understanding of designing
