Conservation Felix Fuders,Pablo J. Donoso,2020-05-13 This book proposes strategies for improving the resilience and
conservation of temperate forests in South America such that these forests can provide ecosystem services in a sustainable
way As such it contributes to the design of a resilient human forest model that takes into account the multiculturalism of
local communities in many cases including aspects of ecological economics development economics and territorial
development planning that are related to indigenous peoples or first nations Further it provides proposals for public and
territorial policies that improve the state of conservation of native forests and forest ecosystems based on a critical analysis
of the economic factors that lead to the degradation of forest ecosystems in South America today This edition was conceived
by members of the Transdisciplinary Research Center for Social and Ecological Strategies for Sustainable Forest
Management in South America at the Universidad Austral de Chile It includes contributions by distinguished researchers
from around the world combining the fields of economics ecology biology anthropology sociology and statistics It is not
however simply a collection of works written by authors from different disciplines but rather each chapter is in itself
transdisciplinary This approach makes the book a unique contribution to enhancing social managerial and political
approaches to forestry management helping to protect forest ecosystem services and make them more sustainable This in
turn will benefit local communities and society as a whole by reducing the negative externalities of forestry management and
enhancing future opportunities **Journal of the United States Artillery** ,1922
