**The naval war film** Jonathan Rayner, 2013-07-19 This book undertakes a unique coherent and comprehensive consideration of the depiction of naval warfare in the cinema The films under discussion encompass all areas of naval operations in war and highlight varying institutional and aesthetic responses to navies and the sea in popular culture The examination of these films centres on their similarities to and differences from the conventions of the war genre and seeks to determine whether the distinctive characteristics of naval film narratives justify their categorisation as a separate genre or sub genre in popular cinema The explicit factual bases and drama documentary style of many key naval films such as *In Which We Serve* *They Were Expendable* and *Das Boot* also requires the consideration of these films as texts for popular historical transmission Their frequent reinforcement of establishment views of the past which derives from their conservative ideological position towards national and naval culture makes these films key texts for the consideration of national cinemas as purveyors of contemporary history as popularly conceived by filmmakers and received by audiences

[U.S. Navy Against the Axis](#) Vincent O'Hara, 2013-05-11 The U S Navy against the Axis tells the story of the U S Navy's surface fleet in World War II with an emphasis on ship to ship combat The book refutes the widely held notion that the attack on Pearl Harbor rendered battleships obsolete and that aviation and submarines dominated the Pacific War It demonstrates how the surface fleet played a decisive role at critical junctures It was crucial to America's ultimate victory and its story holds many lessons for today's Navy and the nation as a whole The U S Navy against the Axis describes how swift

adaptability and intellectual honesty were fundamental to the Navy's success against Japan. The underlying premise is that the nation cannot assume that in a conflict against conventional or asymmetric enemies it holds title to the same virtues the Navy demonstrated three generations ago. Instead, those lessons need to be constantly studied and affirmed in the face of postwar mythologies lest they be forgotten.

**Making Waves** Scott M Peters, 2015-01-22 Michigan will always be known as the automobile capital of the world, but the Great Lakes State boasts a similarly rich heritage in the development of boat building in America. By the late nineteenth century, Michigan had emerged as the industry's hub, drawing together the most talented designers, builders, and engine makers to produce some of the fastest and most innovative boats ever created. Within decades, gifted Michigan entrepreneurs like Christopher Columbus Smith, John L. Hacker, and Gar Wood had established some of the nation's top boat brands and brought the prospect of boat ownership within reach for American consumers from all ranges of income. More than just revolutionizing recreational boating, Michigan boat builders also left their mark on history, from developing the speedy runabouts favored by illicit rum runners during the Prohibition era to creating the landing craft that carried Allied forces to shores in Europe and the Pacific in WWII. In *Making Waves*, Scott M. Peters explores this intriguing story of people, processes, and products of an industry that evolved in Michigan but would change boating across the world.
