Race Identity And Representation In Education:

Race, Identity, and Representation in Education Cameron McCarthy, 1993 Despite differing orientations the contributors here all share a common concern for stressing the importance of social context nuance and language in understanding the dynamics of race relations

Playing the Race Card George Jerry Sefa Dei, Leeno Luke Karumanchery, Nisha Karumanchery-Luik, 2004 Playing the Race Card reflects and engages the dynamic nature of racialized experience in Western contexts It examines today's anti racism project to discern how it might benefit from integrating strategies that work toward the development of critical consciousness as its main goal So that the privileged and the oppressed alike may reflexively examine their own subject positions this book identifies and addresses the need to develop a working model for anti racism strategies Given the need to understand and move beyond static conceptions of race and racism Playing the Race Card offers both a critique of mainstream privileged perceptions of racial oppression as well as a direction forward within a more organic approach to social reform

Comparative and Global Pedagogies Joseph Zajda, Lynn Davies, Suzanne Majhanovich, 2008-06-26 A major aim of Comparative and Global Pedagogies Equity Access and Democracy in Education which is the second volume in the 12 volume book series Globalisation Comparative Education and Policy Research edited by Joseph Zajda and his team is to present a global overview of recent trends in equity and access in education globally By examining some of the major education policy issues particularly in the light of recent shifts in education and policy research dealing with equity and access the editors aim to provide a comprehensive picture of the intersecting and diverse discourses of globalization education and policy driven reforms The impact of globalization on education policy and reforms is a strategically important issue for us all More than ever before there is a need to understand and analyse both the intended and the unintended effects of globalization on educational systems the state and relevant policy changes especially in terms of equity and access as they affect individuals educational bodies such as universities policy makers across the globe Current education policy research dealing with equity and social inequality reflects a rapidly changing world where citizens and consumers are experiencing a growing sense of uncertainty exclusion and loss of flexibility Yet globalization exposes us also to opportunities generated by a fast changing world economy

Researching Race in Education Adrienne D. Dixon, 2014-06-01 In traditional educational research race is treated as merely a variable In 1995 Gloria Ladson Billings and William F Tate IV argued that race is under theorized in

education and called for educational researchers to pay closer attention to the relationship between race and educational inequity Ladson Billings and Tate 1995 In particular they argued drawing on legal scholar Derrick Bell's notion of Racial Realism Bell 1995 that racialized inequities are not accidental or aberrant rather racialized educational inequities are the result of particular and specific policies and practices that are designed to maintain particular forms of dominance and marginalization More specifically Bell and later Ladson Billings and Tate argue that racial inequity persists despite liberal policies and legislation that were ostensibly designed to eradicate it The Racial Realist perspective takes into the consideration the longevity and history of racism racial inequity and White supremacy in the U S and serves as a mirror to reflect back the limitations of proposed policies and legislation that fail to address those issues In this way Critical Race Theory and the scholars who draw on CRT view our work as an important check and balance in the effort toward racial equality

examining the persistence of Whiteness even as it shape shifts Chapters are comprehensive theoretically rich and anchored in personal experience Authors reflections on the seven years since publication of the first edition of this book complexify how we understand Whiteness while simultaneously driving home the need not only to grapple with it but to work against it Christine Sleeter Professor Emerita California State University Monterey Bay Our understanding of racial inequities in education will be impoverished unless we look deeply at White privilege its variation in different contexts and resistances to change Such is the call in this important book by Lund Carr and colleagues whose analyses within Canadian contexts framed and re framed for this captivating revised edition will be useful to educators and scholars around the world Read this book today Kevin Kumashiro Dean School of Education University of San Francisco President National Association for Multicultural Education Darren Lund and Paul Carr have given the contributors to their original 2007 text the opportunity to revisit rethink reconceptualize and reframe their earlier work The result is an interesting invigorating and unsettling group of chapters that challenge readers to also revisit and rethink their own ideas about Whiteness privilege and power Teachers administrators policymakers and researchers will all benefit from this critical work Sonia Nieto Professor Emerita Language Literacy and Culture College of Education University of Massachusetts Amherst Lund and Carr bring together a superb collection of authors who collectively challenge readers to go beyond liberal platitudes about race until educators confront the political social and economic consequences of inequitably distributed privilege the path towards equality and freedom will remain elusive By immersing us in the discourse of Whiteness the essays in this book illuminate that very path Joel Westheimer University Research Chair Professor Faculty of Education University of Ottawa

Critical Voices in Teacher Education Barry Down,John Smyth,2012-04-28 We live in dangerous times when educational policies and practices are debated largely in terms of how they fit with the needs of the free market This volume is a collection of writing by teacher educators that draws on their unique biographies experiences and perspectives to denounce these misguided norms It explores what it means practically and intellectually to teach for social justice in conservative times In a globalised world where the power of capital holds sway the purposes of social institutions such as universities and schools is being refashioned in ways that are markedly instrumental and technicist in nature The consequence is that teachers work is increasingly constrained by regimes of control such as standardised testing accountability transparency and national curricula In the meantime large numbers of students and teachers are disengaging physically emotionally and intellectually from learning The contributors to this edited volume present both a powerful critique of these developments and a counter hegemonic vision of teacher education founded on the principles and values of social justice democracy and critical inquiry Teacher education they argue involves a commitment to critical intellectual work that subjects some deeply entrenched assumptions beliefs habits routines and practices to closer scrutiny The contributing authors expose how ideology and power operate in seemingly blameless rational ways to perpetuate social hierarchies based on class gender sexuality race and culture

The Ocean in the School Rick Bonus, 2020-02-07 In The Ocean in the School Rick Bonus tells the stories of Pacific Islander students as they and their allies struggled to transform a university they believed did not value their presence Drawing on dozens of interviews with students he taught advised and mentored between 2004 and 2018 at the University of Washington Bonus outlines how despite the university's promotion of diversity and student success programs these students often did not find their education to be meaningful leading some to leave the university As these students note they weren't failing school the school was failing them Bonus shows how students employed the ocean as a metaphor as a way to foster community and to transform the university into a space that valued meaningfulness respect and critical thinking In sharing these students' insights and experiences Bonus opens up questions about measuring student success the centrality of antiracism and social justice to structurally reshaping universities and the purpose of higher education
