Reading The Past Current Approaches To Interpretation In Archaeology:

Reading the Past Ian Hodder, Scott Hutson, 2003-12-04 Table of contents *Reading the Past* Ian Hodder, 1986 Ian Hodder's controversial new book focuses on meaning in archaeology arguing that the interpretation of meaning needs to be closely integrated with adaptive economic and social factors when we are seeking to explain the behaviour of past societies Symbolism and ideology are discussed in relation to history and social practice and general accounts are provided of systems theory in archaeology of structuralist and Marxist archaeology and of the relationships between archaeology and history The author then defines what he has termed contextual and post processual archaeology and examines their implications for the practice of the discipline In particular he argues that while material culture is not a literary text an analogy with texts offers powerful insights into the nature of archaeological data and into the procedures involved in reading the past

Evolutionary and Interpretive Archaeologies Ethan Cochrane, Andrew Gardner, 2016-09-16 This collection of original articles compares various key archaeological topics agency violence social groups diffusion from evolutionary and interpretive perspectives These two strands represent the major current theoretical poles in the discipline By comparing and contrasting the insights they provide into major archaeological themes this volume demonstrates the importance of theoretical frameworks in archaeological interpretations Chapter authors discuss relevant Darwinian or interpretive theory with short archaeological and anthropological case studies to illustrate the substantive conclusions produced The book will advance debate and contribute to a better understanding of the goals and research strategies that comprise these distinct research traditions [Reader in Archaeological Theory](#) David S. Whitley, 1998 This Reader in Archaeological Theory

presents sixteen articles of key theoretical significance in a format which makes this notoriously complex area easier for students to understand This volume provides an intellectual history of different approaches to archaeology which contextualizes the complex traditions of cognitive archaeology and postprocessualism on which it focuses organizes theories of archaeology the meanings of things the prehistoric mind and cognition gender ideology and social theory and archaeology's relationship to today's society and politics includes lucid section introductions to each section which provide context explain why the papers are so significant and summarize their key points emphasizes research from the New World making archaeological theory especially relevant and accessible to students in North America **A Feminist Companion to**

Reading the Bible Athalya Brenner, Carole Fontaine, 2013-08-16 This valuable resource both presents and demonstrates the numerous developments in feminist criticism of the Bible and the enormous range of influence that feminist criticism has come to have in biblical studies The purpose of the book is to raise issues of method that are largely glossed over or merely implied in most non feminist works on the Bible The editors have included broadly theoretical essays on feminist methods and the various roles they may play in research and pedagogy as well as non feminist essays that have direct bearing on the methods or subject matter that feminists use as well as reading that illustrate the variety of methodological strategies adopted by

feminist scholars Some 30 scholars from North America and Europe have contributed to this Companion

Archaeological Theory in Practice Patricia A Urban, 2017-07-05 In this concise friendly textbook Patricia Urban and Edward Schortman teach the basics of archaeological theory making explicit the crucial link between theory and the actual conduct of archaeological research The first half of the text addresses the general nature of theory as well as how it is used in the social sciences and in archaeology in particular To demonstrate the usefulness of theory the authors draw from research at Stonehenge Mesopotamia and their own long term research project in the Naco Valley of Honduras They show how theory becomes meaningful when it is used by very real individuals to interpret equally real materials These extended narratives exemplify the creative interaction between data and theory that shape our understanding of the past Ideal for introductory courses in archaeological theory

Evaluating Multiple Narratives Junko Habu, Clare Fawcett, John M. Matsunaga, 2008-07-18 Using archaeological case studies from around the world this volume evaluates the implications of providing alternative interpretations of the past These cases also examine if multivocality is relevant to local residents and non Anglo American archaeologists and if the close examination of alternative interpretations can contribute to a deeper understanding of subjectivity and objectivity of archaeological interpretation

The Oxford Handbook of American Indian History Frederick E. Hoxie, 2016-03-16 Everything you know about Indians is wrong As the provocative title of Paul Chaat Smith's 2009 book proclaims everyone knows about Native Americans but most of what they know is the fruit of stereotypes and vague images The real people real communities and real events of indigenous America continue to elude most people The Oxford Handbook of American Indian History confronts this erroneous view by presenting an accurate and comprehensive history of the indigenous peoples who lived and live in the territory that became the United States Thirty two leading experts both Native and non Native describe the historical developments of the past 500 years in American Indian history focusing on significant moments of upheaval and change histories of indigenous occupation and overviews of Indian community life The first section of the book charts Indian history from before 1492 to European invasions and settlement analyzing US expansion and its consequences for Indian survival up to the twenty first century A second group of essays consists of regional and tribal histories The final section illuminates distinctive themes of Indian life including gender sexuality and family spirituality art intellectual history education public welfare legal issues and urban experiences A much needed and eye opening account of American Indians this Handbook unveils the real history often hidden behind wrong assumptions offering stimulating ideas and resources for new generations to pursue research on this topic

His Good Name Christina Geisen, Jean Li, Steven B. Shubert, Kei Yamamoto, 2021-03-20 The wish to affiliate with a specific cultural social or ethnical group is as important today as it was in past societies such as that of the ancient Egyptians The same significance applies to the self presentation of an individual within such a group Although it is inevitable that we perceive ancient cultures through the lens of our time place and value systems we can certainly try to look beyond these limitations Questions of how the ancient Egyptians saw

themselves and how individuals tried to establish and thus present themselves in society are central pieces of the puzzle of how we interpret this ancient culture This volume focuses on the topic of identity and self presentation tackling the subject from many different angles the ways in which social and personal identities are constructed and maintained the manipulations of culture by individuals to reflect real or aspirational identities and the methods modern scholars use to attempt to say something about ancient persons Building on the work of Ronald J Leprohon to whom this volume is dedicated contributions in this volume present an overview of our current state of understanding of patterns of identity and self presentation in ancient Egypt The contributions approach various aspects of identity and self presentation through studies of gender literature material culture mythology names and officialdom

Religion, Ethnicity, and Identity in Ancient Galilee Jürgen Zangenberg, Harold W. Attridge, Dale B. Martin, 2007 What is a Galilean What were the criteria of defining a person as a Galilean archaeologically or with respect to literary sources such as Josephus or the rabbis What role did religion play in the process of identity formation Twenty two articles based on papers read at conferences at Cambridge Wuppertal and Yale by experts from 7 countries shed light on a complex region the pivotal geographic and cultural context of both earliest Christianity and rabbinic Judaism In these papers ancient Galilee emerges as a dynamic region of continuous change in which religion ethnicity and identity were not static monoliths but had to be negotiated in the context of a multiform environment subject to different influences
