Reading Lives:

Reading Texts, Reading Lives Daniel Morris, Helen Maxson, 2012-06-14 Our culture attempts to separate competing ideological factions by denying relationships between multiple perspectives and influences outside of one's own narrow interpretive community. The distinguished essayists in this volume find Daniel R. Schwarz's pluralistic self-questioning approach to what he calls reading texts and reading lives quite relevant to the current historical moment and political situation. A legendary scholar of modernist literature, Schwarz's critical principles are a healthy corrective to cultural hubris. The essayists treat works ranging from fictions by Joyce, Conrad, Morrison, and Woolf to the poetry of Yeats to Holocaust literature to the environmental writings of Wendell Berry to the photographs of Lee Friedlander. The authors focus on different works but they follow Schwarz in stressing formal elements most often associated with traditional realism while keeping an eye on historical and author-centered approaches. The essayists also follow Schwarz in their emphasis on narrative cohesion and in how they look for signs of agency among characters who possess the will to alter their fate even in a seemingly random universe such as the one depicted by Conrad. Readers with eyes to ethics and aesthetics follow Schwarz in encouraging a values-centered approach that leaves room for the reader to address the ways in which reading a text correlates to the reader's ability to find meaning and value in experience outside the text. Like Schwarz, the essays look for intentionality of authorial meaning rather than something called an author function as well as for the relationship between lived experience and the imagined world of the literary work rather than the endless semiotic play of an ultimately indecipherable text.

Reading Our Lives William L. Randall, Elizabeth McKim, 2008-06-03 Against the background of Socrates' insight that the unexamined life is not worth living, *Reading Our Lives: The Poetics of Growing Old* investigates the often overlooked inside dimensions of aging. Despite popular portrayals of mid and later life as entailing inevitable decline, this book looks at aging as potentially a process of poesis, a creative endeavor of fashioning meaning from the ever accumulating texts, memories, and reflections that constitute our inner worlds. At its center is the conviction that although we are constantly reading our lives to some degree anyway, doing so in a mindful manner is critical to our development in the second half of life. Drawing on research in numerous disciplines affected by the so-called narrative turn, including cognitive psychology, neuroscience, and the psychology of aging, authors Randall and McKim articulate a vision of aging that promises to accommodate such time-honored concepts as wisdom and spirituality, one that understands aging as a matter not merely of getting old but of consciously growing old.
