Reading Motivation:

Reading Motivation Joy Dangora Erickson, 2022-12-14 *Reading Motivation A Guide to Understanding and Supporting Children's Willingness to Read* explains the importance of paying careful attention to children's developing motivation to read and offers a step by step guide for conducting rigorous and systematic case studies of children's motivation to read in specific contexts e.g. reading intervention programs The methods described in this book have been used successfully to elicit the perspectives of children as young as five years of age In addition to carefully considering the views of children readers are encouraged to work with peers to carefully select collect and analyze multiple types of data from a variety of sources to answer questions about their students motivation in trustworthy ways Separate chapters explain how to formatively and summatively analyze and interpret qualitative and quantitative data and how to present findings and make changes to programming in response to findings A summary and a guided activity appear at the end of each chapter to support the reader in practicing the skills introduced in the chapter *Maximizing Motivation for Literacy Learning* Barbara A. Guthrie, 2000-03-07 This volume demonstrates how promoting children's engagement with reading can greatly enhance reading achievement From leading literacy researchers and educators the book illuminates what a child needs to become an engaged reader and presents a set of instructional principles designed to facilitate this goal Helping teachers offer a coordinated emphasis on competence and motivation in reading instruction chapters blend research evidence with practical recommendations Topics covered include ways to provide children with a good foundation at the word level help if they are in trouble ample time and materials for reading opportunities to share in a community of learners instruction that is coherent motivating and responsive to each child's strengths and weaknesses school-wide coordination of instruction and continuities between home and school **Reading and Writing Skills: Cognitive, Emotional, Creative, and Digital Approaches** María Isabel de

Vicente-Yagüe Jara,Elena Jiménez-Pérez,Pedro García Guirao,Olivia López Martínez,2023-12-14 **Reading Achievement and Motivation in Boys and Girls** Pelusa Orellana García,Paula Baldwin Lind,2018-05-02 This volume links theoretical and instructional approaches on how reading is motivated and assessed and examines the interrelationship between reading motivation and achievement among boys and girls in culturally and geographically different settings Much of the research on children s reading has focused on cognitive processes however reading is an activity that also requires interest and motivation These attitudes are generally defined as readers affect toward reading and their consequence is that children with more positive attitudes are more motivated to read Taking into account the variability that exists within the notion of gender and age this volume aims to examine and scrutinize previous research on the topic as well as test theories on how the different dimensions of reading motivation vary with gender in relation to cultural issues motivational constructs such as engagement and classroom climate the role of emotions interests and attitudes towards reading among others The book will be of interest to researchers educators graduate students and other professionals working in the area of literacy reading motivation reading achievement and gender differences **Children's Reading Comprehension and Assessment** Scott G. Paris,Steven A. Stahl,2005-03-23 The volume identifies critical issues and cutting edge research in assessing children s reading comprehension **Homework, Learning and Academic Success: The Role of Family and Contextual Variables** Antonio Valle,Susana Rodríguez,Pedro Rosário,Mar Lorenzo Moledo,2020-02-24 The main purpose of this Research Topic is to analyze and identify the main family and contextual variables that are involved in the process of carrying out homework This will require studying the role played by teachers students and families in order to ensure that schoolwork is a useful learning tool Although the role of the student is obviously crucial in homework research has focused on the cumulative time spent by the student carrying out homework However the time spent on homework is not in itself evidence of the student s involvement nor is time spent indicative of quality time Indeed an excess of time can sometimes denote low competence in a field of knowledge while spending less time on homework could be indicative of high competence It is more likely that a high dedication of time spent on homework reflects high motivation or comprehension deficits rather than commitment to learning or academic motivation In tandem with the role of the student teachers as responsible for prescribing homework assignments for students also become central players in the process of completing homework assignments The decisions that teachers make about homework prescriptions and the amount and type of tasks they set will determine to a large extent the quality of the homework process including the student s motivation and the student s level of engagement with homework Furthermore the fact that homework is useful interesting and motivating for students will depend on how the teacher prescribes those tasks and the connection established with classroom learning Teacher feedback also acquires particular relevance for this point by helping the students to accurately estimate the quality of their progress and overcome the difficulties they may have encountered in carrying out their homework Lastly the effectiveness of teacher

feedback depends on its contribution to the student's educational progress and how that student will perform in the future. In addition to the student who performs the task and the teacher who prescribes and corrects it, we must not lose sight of the parent's role. Although there are discrepancies regarding the role that parents play in relation to homework, it is evident that their implication has important consequences not only on the final result of those tasks but also on the very process of carrying them out. Everything seems to indicate that the family environment and more specifically the support and feedback provided by parents is a factor that can determine the involvement of students in school duties. In this way, providing emotional support, encouraging children to get involved, can contribute positively to improving their motivation and interest in the performance of homework. The objective of this Research Topic is to provide researchers and professionals in psychology and education settings with some of the most recent empirical evidence regarding the homework process, its prescription and correction. Overall, we aim to cease making homework a source of conflict and controversy at the socio-educational level in order to provide useful instruments for improving the quality of student learning. This work was developed with the financing of the research projects EDU2013-44062-P (MINECO) and EDU2017-82984-P (MEIC).
