

A dirt path leads through a field of tall grass and a fence, with a sunset sky in the background. The path is in the center, flanked by green grass and a fence made of wooden posts and wire. The sky is a mix of orange, yellow, and grey clouds, suggesting a sunset or sunrise. The text is overlaid on the upper part of the image.

## **Reading Poverty:**

*Reading Poverty in America* Patrick Shannon, 2014-03-14 In this book Shannon's major premise remains the same as his 1998 *Reading Poverty*. Poverty has everything to do with American public schooling: how it is theorized, how it is organized, and how it runs. Competing ideological representations of poverty underlie school assumptions about intelligence, character, textbook content, lesson formats, national standards, standardized achievement tests, and business school partnerships, and frame our considerations of each. In this new edition, Shannon provides an update of the ideological struggles to name and respond to poverty through the design, content, and pedagogy of reading education, showing how through their representations and framing, advocates of liberal, conservative, and neoliberal interpretations attempt the ideological practice of teaching the public who they are, what they should know, and what they should value about equality, civic society, and reading. For those who decline these offers, Shannon presents radical democratic interpretations of the relationship between poverty and reading education that position the poor, the public students, and teachers as agents in redistribution of economic, cultural, and political capital in the United States.

**Poverty and Literacy** Nathalis Wamba, 2014-07-16 There is a mutual dependence between poverty and academic achievement: creative pedagogies for low-income pupils, school models that beat the odds, and the resiliency of low-income families dedicated to the academic success of their children. This book examines the connection between poverty and literacy, looking at the potential roles and responsibilities of teachers, school administrators, researchers, and policymakers in closing the achievement gap and in reducing the effects of poverty on the literacy skill development of low-income children. There are numerous suggestions about how to improve schools so that they respond to the needs of low-income children: some argue for school reform, while others advocate social reform, and yet others suggest combining both educational reform and social reform. Without a strong foundation in literacy, children are all too often denied access to a rich and diverse curriculum. Reading and writing are passports to achievement in many other curricular areas, and literacy education plays an important role in moving people out of poverty toward greater self-sufficiency post-graduation. Schools and home environments share responsibility for literacy skill development; in school, literacy equals the acquisition of reading and writing skills, but it is also a social practice key to social mobility. The achievement gap between low-income, middle-class, and upper-middle-class students illustrates the power of socioeconomic factors outside school. This book was originally published as two special issues of *Reading Writing Quarterly: Overcoming Learning Difficulties*.

The Failure of the Neo-Liberal Approach to Poverty Brian Caterino, 2022-09-06 This book examines the foundation and progress of the Rochester Monroe Anti Poverty Initiative RMAPI Poverty has once again become a major issue in American cities and nowhere more so than Rochester which has one of the highest rates of poverty in the nation RMAPI was established to reduce poverty yet in the five years since its formation the poverty rate is essentially unchanged Analyzing the reasons behind its failure this book argues that the very nature of the organizational framework is part of the problem and that RMAPI's project is caught up with contradictory imperatives of neo liberal welfare reforms More than just a study of local interest the book uses Rochester as a case study to illuminate the limits of the neo liberal approach to poverty It will appeal to all those interested in political science urban politics community studies welfare policy and public administration
