The Problem with Feeding Cities Andrew Deener, 2020-10-10 For most people grocery shopping is a mundane activity Few stop to think about the massive global infrastructure that makes it possible to buy Chilean grapes in a Philadelphia supermarket in the middle of winter Yet every piece of food represents an interlocking system of agriculture manufacturing shipping logistics retailing and nonprofits that controls what we eat or don't

The Problem with Feeding Cities is a sociological and historical examination of how this remarkable network of abundance and convenience came into being over the last century It looks at how the US food system transformed from feeding communities to feeding the entire nation and it reveals how a process that was once about fulfilling basic needs became focused on satisfying profit margins It is also a story of how this system fails to feed people especially in the creation of food deserts

Andrew Deener shows that problems with food access are the result of infrastructural failings stemming from how markets and cities were developed how distribution systems were built and how organizations coordinate the quality and movement of food He profiles hundreds of people connected through the food chain from farmers wholesalers and supermarket executives to global shippers logistics experts and cold storage operators to food bank employees and public health advocates It is a book that will change the way we see our grocery store trips and will encourage us all to rethink the way we eat in this country

Movable Markets Helen Tangires, 2019-05-07 The untold story of America's wholesale food business

In nineteenth century America municipal deregulation of the butcher trade and state incorporated market companies gave rise to a flourishing wholesale trade

In *Movable Markets* Helen Tangires describes the evolution of the American wholesale marketplace for fresh food from its development as a bustling produce district in the heart of the city to its current indiscernible place in food industrial parks on the urban periphery Tangires follows the middlemen those intermediaries who became functional necessities as the railroads accelerated the process of delivering perishable food to the city Tracing their rise and decline in the wake of a deregulated food economy she asks How did these people who occupied such key roles as food distributors and suppliers to the retail trade end up exiled to urban outskirts

Moving into the early twentieth century she explains how progressive city planners and agricultural economists responded to anxieties about the high cost of living traffic congestion and disruptions in the food supply by questioning the centrality aging infrastructure and organizational structure of wholesale markets Tangires combines economic and cultural history by analyzing popular literature innovative scholarship and USDA publications Detailing the legal physical and organizational means behind the complex exodus of food wholesaling from the urban core Tangires also reveals how the trade adjusted to life beyond the city limits as it created new channels of distribution product lines and markets
