

Music Learning Theory

- is the outline of logical, fundamental principles for understanding music learning
- is an explanation of how students of all ages learn music
- is concerned specifically with the tonal and rhythm dimensions of music
- offers a specific description of the ways in which the types and stages of audiation ideally occur
- **MLT addresses the process, not the product, of learning**
- thus it reveals information about how music might best be sequentially taught
- provides teachers a comprehensive and sequential method for teaching essential audiation skills

"Because of the open-ended nature of the paradigm, Music Learning Theory lays the groundwork for a myriad of teaching and learning settings" (C.Azzara)
