Readings In Psychology Research And Applications:

Readings in Psychology John Neil Bohannon, 1989-01-01 *Readings in Introductory Psychology* Henry L. Roediger, Kathleen McDermott, Elizabeth D. Capaldi, Scott G. Paris, 1996-01 **Readings in Human-Computer Interaction** Ronald M. Baecker, 2014-06-28

The effectiveness of the user computer interface has become increasingly important as computer systems have become useful tools for persons not trained in computer science. In fact, the interface is often the most important factor in the success or failure of any computer system. Dealing with the numerous subtly interrelated issues and technical, behavioral, and aesthetic considerations consumes a large and increasing share of development time and a corresponding percentage of the total code for any given application. A revision of one of the most successful books on human computer interaction, this compilation gives students, researchers, and practitioners an overview of the significant concepts and results in the field and a comprehensive guide to the research literature. Like the first edition, this book combines reprints of key research papers and case studies with synthesizing survey material and analysis by the editors. It is significantly reorganized, updated, and enhanced; over 90% of the papers are new. An invaluable resource for systems designers, cognitive scientists, computer scientists, managers, and anyone concerned with the effectiveness of user computer interfaces, it is also designed for use as a primary or supplementary text for graduate and advanced undergraduate courses in human computer interaction and interface design. Human computer interaction, historical, intellectual, and social. Developing interactive systems including design evaluation methods and development tools. The interaction experience through a variety of sensory modalities including vision, touch, gesture, audition, speech, and language. Theories of information processing and issues of human computer fit and adaptation.

Readings in Social Psychology Research: Theory and Application Douglas Krull, 2017-03-21

The anthology *Readings in Social Psychology Research: Theory and Application* features concise and engaging articles from diverse experts in the field. The high interest selections allow students to see how research is done and read published material on original research in the discipline. The text features a wide selection of articles on topics such as the self, person perception, and attribution, stereotypes and prejudice, influence and attitudes. Other sections include specific areas of interaction such as attraction and relationships, helping and aggression. The final chapters address a variety of applied topics including psychology and law, industrial, organizational, and consumer psychology, and health psychology. Each unit opens with an original introduction to establish appropriate context and closes with post-reading questions that facilitate lively classroom discussion. The reading selections include both popular readings and research articles that were chosen to illustrate a wide variety of fascinating and important work in social psychology. An engaging anthology that bridges social psychology as an academic discipline to everyday thinking and interaction, *Readings in Social Psychology Research* is well suited to courses in the field, either as the primary course text or as a supplement to a traditional textbook. Douglas Krull holds a Ph.D. in social psychology from the University of Texas at Austin and is a professor at Northern Kentucky University. In

addition to social psychology and social psychology lab Dr Krull has taught courses in consumer psychology the psychology of religion cognitive processes and cognition in the workplace His writing has been published in the Journal of Experimental Social Psychology Personality and Social Psychology Bulletin and the Journal of Applied Social Psychology among others Dr Krull is the author of Introduction to Psychology published by Kona Publishing and Media Group

Handbook of Reading Research Michael L. Kamil, Peter B. Mosenthal, P. David Pearson, Rebecca Barr, 2014-04-08 In Volume III as in Volumes I and II the classic topics of reading are included from vocabulary and comprehension to reading instruction in the classroom and in addition each contributor was asked to include a brief history that chronicles the legacies within each of the volume s many topics However on the whole Volume III is not about tradition Rather it explores the verges of reading research between the time Volume II was published in 1991 and the research conducted after this date The editors identified two broad themes as representing the myriad of verges that have emerged since Volumes I and II were published 1 broadening the definition of reading and 2 broadening the reading research program The particulars of these new themes and topics are addressed

Handbook of Reading Disability Research Anne McGill-Franzen, Richard Allington, 2010-09-17 Bringing together a wide range of research on reading disabilities this comprehensive Handbook extends current discussion and thinking beyond a narrowly defined psychometric perspective Emphasizing that learning to read proficiently is a long term developmental process involving many interventions of various kinds all keyed to individual developmental needs it addresses traditional questions What is the nature or causes of reading disabilities How are reading disabilities assessed How should reading disabilities be remediated To what extent is remediation possible but from multiple or alternative perspectives Taking incursions into the broader research literature represented by linguistic and anthropological paradigms as well as psychological and educational research the volume is on the front line in exploring the relation of reading disability to learning and language to poverty and prejudice and to instruction and schooling The editors and authors are distinguished scholars with extensive research experience and publication records and numerous honors and awards from professional organizations representing the range of disciplines in the field of reading disabilities Throughout their contributions are contextualized within the framework of educators struggling to develop concrete instructional practices that meet the learning needs of the lowest achieving readers
