Readings On Ethical And Social Issues In Biomedicine:

Readings on Ethical and Social Issues in Biomedicine Richard W. Wertz, 1973 *Readings on Ethical and Social Issues in Biomedicine* Richard W. Wertz, 1973 **Biomedical Ethics and the Law** James M. Humber, 2013-03-09 In the past few years an increasing number of colleges and universities have added courses in biomedical ethics to their curricula To some extent these additions serve to satisfy student demands for relevance But it is also true that such changes reflect a deepening desire on the part of the academic community to deal effectively with a host of problems which must be solved if we are to have a health care delivery system which is efficient humane and just To a large degree these problems are the unique result of both rapidly changing moral values and dramatic advances in biomedical technology The past decade has witnessed sudden and conspicuous controversy over the morality and legality of new practices relating to abortion therapy for the mentally ill experimentation using human subjects forms of genetic intervention and euthanasia Malpractice suits abound and astronomical fees for malpractice insurance threaten the very possibility of medical and health care practice Without the backing of a clear moral consensus the law is frequently forced into resolving these conflicts only to see the moral issues involved still hotly debated and the validity of the existing law further questioned Take abortion for example Rather than settling the legal issue the Supreme Court's original abortion decision in *Roe v Wade* 1973 seems only to have spurred further legal debate And of course whether or not abortion is a morally acceptable procedure is still the subject of heated dispute **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965-70 *Professional Ethics and Primary Care Medicine* Harmon L. Smith, Larry R. Churchill, 1986 This volume moves beyond ethics as problem solving or ethics as etiquette to offer a look at ethics in primary care as opposed to life or death medical care *Professional Ethics and Primary Care Medicine* deals with the ethics of routine day to day encounters between doctors and patients It probes beneath the hard decisions to look at the moral frameworks habits of thought and customs of practice that underlie choices Harmon Smith and Larry Churchill argue that primary care far from being merely a setting for the rendering of care provides a new understanding of both physician and patient and thereby offers a fresh basis for medical ethics **Medical Ethics for Physicians-in-Training** J.E. Kantor, 2013-06-29 The recent interest in biomedical ethics has resulted in the publication of a great many textbooks in the field As good as many of these texts are their attempts to encompass the ethical issues in all areas of health care have left them wanting in comprehensive treatments of specific areas that are of immediate concern to clinicians and over comprehensive in areas that are peripheral While the numerous anthologies of articles have the merit of not presenting students with a single biased approach they usually have the disadvantage of presenting articles that are narrowly focused criticisms of other narrowly focused articles On the other hand texts by single authors tend to be overly theoretical in their approach The philosopher teaching ethics in a medical school or in a hospital setting must tread a difficult intellectual path There are no desert island

issues in clinical ethics and few of the actual cases can be simply stripped down to clear conflicts between two philosophical theories The horns of vii viii Preface the dilemmas that he encounters are more likely to resemble a stag's horns than a bull's A philosopher working in these settings must quickly change his accustomed approach to philosophical issues if he is to be effective Very often he will be presented with an issue that he would prefer to mull over for a year or two but which will require some sort of immediate direction or resolution because action must be taken

Ethics and Aging James Edward Thornton, Earl Raye Winkler, 2011-11-01 This book is an important and timely look at issues of ethics in aging It reflects the complexity of these questions but develops them in relation to a single general theme that of the involvement of the elderly in the design of social policy and the research which affects them Moral problems involving the elderly are many faceted Accurate understanding and social response demand some integration of experience sensibility and knowledge provided by different perspectives Ethics and Aging incorporates viewpoints from gerontology philosophy law theology sociology psychology medicine nursing and economics

Biopolitics Vandana Shiva, Ingunn Moser, 1995-09-04 Biotechnology is the single most powerful bundle of new technologies currently under development It is also the most intrusive and determinative technology relating to nature generally and the human body specifically This Reader brings together some of the most important work from feminists and environmentalists critical of the headlong rush into what is likely to prove a technological minefield As such it will be essential reading for students scholars and activists in social studies of science women's studies development and environmental studies

Genetics and the Law II Milunsky, 2013-11-11 The law is a mandate and a mirror it both commands and reflects It should not come as a shock that scientists and physicians often prefer the mirror at times when society seems to be demanding a mandate This may be especially true in the rapidly advancing field of medical genetics where recent discoveries leading to potentially startling applications have raised old questions of law in a new light Nevertheless we believe that in general the conflict between the law and science as illustrated in the field of genetics is embroiled with exaggeration The Chief Justice of the United States Supreme Court Warren Burger has noted that the prime function of the law is to protect basic human values individual human values sometimes even at the expense of scientific progress and that it is not the function of the law to keep pace with science While both of these statements are true as far as they go we believe the law must make an affirmative effort to anticipate scientific developments so that those beneficial to society can be nurtured rather than stultified It was to nurture cooperation and understanding that we brought together a distinguished faculty of internationally known experts on law and genetics to discuss their fields in 1975
