Experimental Approaches to Roman Archaeology Lee Graña Nicolaou, Tatiana Ivleva, Bill Griffiths, 2024-12-12 This volume is the first comprehensive overview of Roman experimental archaeology exploring its key themes methodologies and applications through a diverse array of international case studies Experiments simulations and reconstructions are important methods for understanding the past from uncovering how ancient objects and structures were made used destroyed deposited and affected underground to illuminating the experiences of tasting ancient foods fighting alongside comrades or living in replicated structures Although the incorporation of experimentation has had great success in prehistoric studies greater reliance on the wealth of literary and material sources remaining from the classical period has meant that its potential for Roman studies has yet to be fully realised The 26 chapters in this book are divided into 5 thematic parts each of which opens with a contextualizing introduction that frames the detailed case studies found in individual chapters and showcases the actual and potential diversity of experimentation as applied to the Roman past by scholars re-enactors and practitioners in the heritage sector In laying out a detailed guide to Roman experimental archaeology the volume as a whole maps its past present and future and provides a firm foundation for further practical research and collaboration In doing so it reasserts that experiments and reconstructions are a significant resource for testing or developing theories rather than merely artistic replicas and that the vast amount of quantifiable data they yield can be invaluable in support of interpretations of relevant archaeological or historical evidence regardless of the period in question and beyond the confines of academia

Roman Passions Ray Laurence, 2010-09-30 In what may be the most in depth study yet published of a film star's body of work Susan Hayward charts the career of Simone Signoret one of the great French actresses of the 20th

Century Signoret who won an Oscar in 1960 for her performance in *Room at the Top* was a key figure in French cinema for 40 years But it is not so much her longevity that impresses as it is the quality of work she produced as her career progressed She started out as a stunningly beautiful woman winning major international awards five times for her roles and yet was only moderately in demand during those years From the 1960s onwards when her looks began to decline significantly Signoret was in greater demand and produced most of her output She insisted on playing roles consonant with her real age and often chose to play roles that portrayed her as even more ugly than she had become Simone Signoret The Star as Cultural Sign is a remarkable achievement a labor of love from one of the world's leading scholars of French cinema Authenticity in the Kitchen Richard Hosking, 2006 The Oxford Symposium on Food and Cookery is a premier English conference on this topic The subjects range from the food of medieval English and Spanish Jews wild boar in Europe the identity of liquamen and other Roman sauces the production of vinegar in the Philippines the nature of Indian restaurant food and food in 19th century Amsterdam A Seven Year Cycle Reading Plan C.S.
