## **Romanesque Ireland Architecture Sculpture And Ideology In The Twelfth Century:**

**Romanesque Ireland** Tadhg O'Keeffe, 2003 The Romanesque style was a pan European tradition of art and architecture that emerged on the Continent during the 11th century It reached Ireland as the movement to reform the Irish Church gathered pace at the start of the 12th century Executed under secular patronage but for the benefit of ecclesiastics and their churches it became a metaphor for that reform The fashion for Romanesque faltered in eastern Ireland with the arrival of the Anglo Normans in 1169 but it survived into the 13th century west of the Shannon This book is the first substantial analysis of Romanesque Ireland to appear in thirty years Concentrating on architecture and sculpture it examines how Irish artists and builders of the 12th century reconfigured the language of the international Romanesque according to their own aesthetic tastes and it considers the meanings of their art to contemporary spectators In a departure from earlier literature this book also explores the concept of style itself and its value in reconstructing social identity in the past **Medieval Irish**

**Architecture and the Concept of Romanesque** Tadhg O'Keeffe, 2024-02-28 This book presents a fresh perspective on eleventh and twelfth century Irish architecture and a critical assessment of the value of describing it and indeed contemporary European architecture in general as Romanesque Medieval Irish Architecture and the Concept of Romanesque is a new and original study of medieval architectural culture in Ireland The book's central premise is that the concept of a Romanesque style in eleventh and twelfth century architecture across Western Europe including Ireland is problematic and that the analysis of building traditions of that period is not well served by the assumption that there was a common style Detailed discussion of important buildings in Ireland a place marginalised within the Romanesque model reveals the Irish evidence to be intrinsically interesting to students of medieval European architecture for it is evidence which illuminates how architectural traditions of the Middle Ages were shaped by balancing native and imported needs and aesthetics often without reference to Romanitas This book is for specialists and students in the fields of Romanesque medieval archaeology medieval architectural history and medieval Irish studies [A Companion to Medieval Art](#) Conrad Rudolph, 2019-05-07 A fully

**Archaeology and the Pan-European Romanesque** T. O'Keefe,2015-03-02 Romanesque is the style name given to the art and architecture of Europe in the eleventh and twelfth centuries First used in the early nineteenth century to express the perceived indebtedness of the visual artistic and architectural cultures of this period to their Classical antecedents the term has survived two centuries of increasingly sophisticated readings of the relevant medieval buildings and objet d art The study of Romanesque as a stylistic phenomenon is now almost exclusively the preserve of art historians particularly in the English speaking world Here the Romanesque is subjected to a long overdue theoretically informed archaeological inquiry The ideological foundations and epistemological boundaries of Romanesque scholarship are critiqued and the constructs of Romanesque and Europe are deconstructed and alternative strategies for interpreting Romanesque s constituent material are mapped out This book should at the very least illuminate the need for debate

**Romanesque and the Past** John McNeill,Richard Plant,2024-11-01 The nineteen papers collected in this volume explore a notable phenomenon that of retrospection in the art and architecture of Romanesque Europe They arise from a conference organized by the British Archaeological Association in 2010 and reflect its interest in how and why the past manifested itself in the visual culture of the 11th and 12th centuries This took many forms from the casual re use of ancient material to a specific desire to re present or emulate earlier objects and buildings Central to it is a concern for the revival of Roman and early medieval forms spolia selective quotation archaism and the construction of histories The individual essays presented here cover a wide range of topics and media the significance of consecration ceremonies in the creation of architectural memory the rise of pictorial concepts in 12th century chronicles the creation of history in the Paris of Hugh of St Victor and the appeal of the works of Bernward of Hildesheim and of Hrabanus Maurus in the centuries after their deaths There are studies of buildings and the ideological purpose behind them at Tarragona Ripoll Cluny Pannonhalma Hungary La Roccelletta Calabria and Old St Peter s comparative studies of Trier Villeneuve and Glastonbury and of Bury St Edmunds Rievaulx and Canterbury and wide ranging papers on the tantalizing evidence for an engagement with an overseas past in Ireland an Anglo Saxon past in England and a Milanese past among the aisleless cruciform churches of Augustinian Europe The volume concludes with an assessment of the very concept of Romanesque

demonstrate the centrality of the rood to the visual material and devotional cultures of the Middle Ages its richness and complexity The rood was central to medieval Christianity and its visual culture Christ s death on the cross was understood as the means by which humankind was able to gain salvation and depictions of the cross and Christ s death upon it were ubiquitous This volume brings together contributions offering a new perspective on the medieval rood understood in its widest sense as any kind of cross within the context of Britain and Ireland over a wide periodof time which saw significant political and cultural change In doing so it crosses geographical chronological material and functional boundaries which have traditionally characterised many previous discussions of the medieval rood Acknowledging and exploring the capacity of the rood to be both universal and specific to particular locations and audiences these contributions also tease out the ways in which roods related to one another as well as how they related to their physical and cultural surroundings often functioning in dialogue with other images and the wider devotional topography both material and mental in which they were set The chapters consider roods in a variety of media and contexts the monumental stone crosses of early medieval England twelfth century Ireland and spreading further afield late medieval Galicia the three dimensional monumental wooden roods in English monasteries Irish friaries and East Anglian parish churches roods that fit in the palm of a hand encased in precious metals those that were painted on walls drawn on the pages of manuscripts and those that appeared in visions dreams and gesture related to one another as well as how they related to their physical and cultural surroundings often functioning in dialogue with other images and the wider devotional topography both material and mental in which they were set The chapters consider roods in a variety of media and contexts the monumental stone crosses of early medieval England twelfth century Ireland and spreading further afield late medieval Galicia the three dimensional monumental wooden roods in English monasteries Irish friaries and East Anglian parish churches roods that fit in the palm of a hand encased in precious metals those that were painted on walls drawn on the pages of manuscripts and those that appeared in visions dreams and gesture related to one another as well as how they related to their physical and cultural surroundings often functioning in dialogue with other images and the wider devotional topography both material and mental in which they were set The chapters consider roods in a variety of media and contexts the monumental stone crosses of early medieval England twelfth century Ireland and spreading further afield late medieval Galicia the three dimensional monumental wooden roods in English monasteries Irish friaries and East Anglian parish churches roods that fit in the palm of a hand encased in precious metals those that were painted on walls drawn on the pages of manuscripts and those that appeared in visions dreams and gesture related to one another as well as how they related to their physical and cultural surroundings often functioning in dialogue with other images and the wider devotional topography both material and mental in which they were set The
