The Semiotic Sphere Thomas A. Sebeok, Jean Umiker-Sebeok, 2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to bloom only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the literate globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is inherent in the advent ure of the search itself Handbook of Semiotics Winfried Noth, 1990-09-22 History and Classics of Modern Semiotics Sign and Meaning Semiotics Code and the Semiotic Field Language and Language Based Codes From Structuralism to Text Semiotics Schools and Major Figures Text Semiotics The Field Nonverbal Communication Aesthetics and Visual Communication

Semiotic Theory of Learning Andrew Stables, Winfried Nöth, Alin Olteanu, Sébastien Pesce, Eetu Pikkarainen, 2018-05-15 Semiotic Theory of Learning asks what learning is and what brings it about challenging the hegemony of psychological and sociological constructions of learning in order to develop a burgeoning literature in semiotics as an educational foundation Drawing on theoretical research and its application in empirical studies the book attempts to avoid the problematization of the distinction between theory and practice in semiotics It covers topics such as signs significance and semiosis the ontology of learning the limits of learning ecosemiotics ecology and sexuality The book is written by five of the key figures in the semiotics field each committed to the belief that living is a process of interaction through acts of signification with a signifying environment While the authors are agreed on the value of semiotic frameworks the book aims not to present an entirely coherent line in every respect but rather to reflect ongoing scholarship and debates in the area In light of this the book offers a range of possible interpretations of major semiotic theorists unsettling assumptions while offering a fresh and still developing series of perspectives on learning from academics grounded in semiotics Semiotic Theory of Learning is a timely and valuable text that will be of great interest to academics researchers and postgraduates working in the fields of educational studies semiotics psychology philosophy applied linguistics and media studies The Semiotic Web 1989 Thomas A. The Semiotic Web 1989 *Global Semiotics* Thomas A. Sebeok, 2001 The study of semiotics underwent a gradual but radical paradigm shift during the past century from a glottocentric language centered enterprise to one that encompasses the whole terrestrial biosphere In this collection of 17 essays Thomas A Sebeok one of the seminal thinkers in the field shows how this progression took place His wide ranging discussion of the evolution of the field covers many facets including discussions of biosemiotics semiotics as a bridge between the humanities and natural sciences semiosis nonverbal communication cat and horse behavior the semiotic self and women in semiotics This thorough account will appeal to seasoned scholars and neophytes alike **The Semiotic Web 1986** Thomas A. communications became accessible to ordinary populations with Telstar jumbo jets the pc and mobile devices that humans have been able to experience their own world as planetary in extent What does it mean to be one species on one planet rather than a patchwork of scattered combative and mutually untranslatable cultures One of the most original and prescient thinkers to tackle cultural globalisation was Juri Lotman 1922-93 *On the Digital Semiosphere* shows how his general model of the semiosphere provides a unique and compelling key to the dynamics and functions of today's globalised digital media systems and in turn their interactions and impact on planetary systems Developing their own reworked and updated model of Lotman's evolutionary and dynamic approach to the semiosphere or cultural universe the authors offer a unique account of the world scale mechanisms that shape media meanings creativity and change both productive and destructive In so doing they re-examine the relations among the contributing sciences and disciplines that have emerged to explain these phenomena seeking to close the gap between biosciences and humanities in an integrated cultural science approach *Fact and Fiction* Albrecht Koschorke, 2018-04-23 How can we develop a cultural theory starting with the basic insight that human beings are storytelling animals Within literary studies narratology is a highly developed field However literary historians have not paid much attention to the large and small stories abounding in everyday discourse guiding all kinds of social activity and providing common ground for whole societies but also fueling controversies and hostilities Moreover narrative is not only a scholarly category but has come into use in many fields of social activity as a tool for cultural self-fashioning This book is based on the assumption that to a large extent social dynamics is modeled in an aesthetic manner via narratives It explores the narrative organization of cultural spaces and time frames the mythological shaping of communities and adversaries and the co-production of narratives and institutions aimed at stabilizing social life In this framework the epistemological problem looms large of how an instrument as unreliable as narrative can participate in the creation of a social consensus regarding truth This problem endows the general topics explored in this book with a particularly contemporary dimension *Theories of Information, Communication and Knowledge* Fidelia Ibekwe-SanJuan, Thomas M Dousa, 2013-08-30 This book addresses some of the key questions that scientists have been asking themselves for centuries what is knowledge What is information How do we know that we know something How do we construct meaning from the perceptions of things Although no consensus exists on a common definition of the concepts of information and communication few can reject the hypothesis that information whether perceived as object or as process is a pre-condition for knowledge Epistemology is the study of how we know things anglophone meaning or the study of how scientific knowledge is arrived at and validated francophone conception To adopt an epistemological stance is to commit oneself to render an account of what constitutes knowledge or in procedural terms to render an account of when one can claim to know something An epistemological theory imposes constraints on the interpretation of human cognitive interaction with the world It goes without saying that different epistemological theories will have more or less restrictive criteria to distinguish what

constitutes knowledge from what is not If information is a pre condition for knowledge acquisition giving an account of how knowledge is acquired should impact our comprehension of information and communication as concepts While a lot has been written on the definition of these concepts less research has attempted to establish explicit links between differing theoretical conceptions of these concepts and the underlying epistemological stances This is what this volume attempts to do It offers a multidisciplinary exploration of information and communication as perceived in different disciplines and how those perceptions affect theories of knowledge Semiotics and its Masters. Volume 2 Alin Olteanu,Paul Cobley,2023-01-30
