**Send in the Idiots** Kamran Nazeer, 2007-04-03 A candid surprising and moving portrait of four autistic men and women who were enrolled alongside a dozen other children in a small New York City school where they received care that was at the cutting edge of psychology at the time explores the texture of autistic lives and the pressures and limitations that the condition presents Reprint 35 000 first printing Send in the Idiots Kamran Nazeer, 2006 In 1982 when he was four years old Kamran Nazeer was enrolled in a small school in New York City alongside a dozen other children diagnosed with autism Calling themselves the Idiots these kids received care that was at the cutting edge of developmental psychology Twenty three years later the school no longer exists *Send in the Idiots* is the always candid often surprising and ultimately moving investigation into what happened to those children Now a policy adviser in Westminster Kamran decides to visit four of his old classmates to find out the kind of lives that they are living now how much they've been able to overcome and what remains missing A speechwriter unable to make eye contact a messenger who gets upset if anyone touches his bicycle a depressive suicide victim and a computer engineer who communicates difficult emotions through the use of hand puppets these four classmates reveal an astonishing thought provoking spectrum of behaviour Bringing to life the texture of autistic lives and the pressures and limitations that the condition presents Kamran also relates the ways in which those can be eased over time and with the right treatment Using his own experiences to examine such topics as the difficulties of language conversation as performance and the politics of civility *Send in the Idiots* is also a rare and provocative exploration of the way that people all people learn to think and feel Written with unmatched insight and striking personal testimony Kamran Nazeer's account is a stunning invaluable and utterly unique contribution to the literature of what makes us human

of understanding about special schools the work they do and the children they educate the sector is largely invisible Jarlath O'Brien has become increasingly frustrated by this and the varying quality of provision for children with learning difficulties and SEN in mainstream schools The successes of special schools and pupil referral units in Ofsted inspections are just not celebrated or analysed in the same way that mainstream schools are While mainstream schools have their hands tied by fears over progress measures There is a human cost to the accountability culture that reduces schooling to data and judgements this is felt most profoundly by children with SEN and their families Jarlath shares some of the problems he's witnessed with inclusion and exclusion mainstream schools actively encouraging children with SEN to look elsewhere parents reporting their children have been formally or informally excluded from school and socially excluded by the parents of other children children asked to leave their mainstream schools because of their behaviour usually behaviour that is caused by their needs not being adequately addressed children who are in school but isolated from their peers If a child can't participate in activities or trips with the rest of the class or spends much of the day working one to one with a teaching assistant is this really inclusion The Pupil Premium has been established to ensure that children in receipt of free school meals are not disadvantaged why does something similar not exist for children with SEN Every health and wealth indicator that you could use to measure people with learning difficulties and special educational needs SEN reveals something alarming They die younger They work less They are more likely to live in poverty or end up in prison or face mental health difficulties They are much more likely to be excluded from school They are more likely to be bullied at school This has to end We all have to choose to commit to recognising that society as it is today is a difficult place for young people to thrive When you have autism or Down syndrome or any physical or learning difference it's even harder and the system as it stands isn't helping We need to acknowledge that this is not right that such a state of affairs must change and that we all have a part to play in making that change happen Jarlath offers suggestions for politicians Ofsted local authorities head teachers SENCOs teachers and teaching assistants about what they can do to make a difference For all politicians head teachers SENCOs teachers and parents

**Idiocy** Patrick McDonagh, 2008-01-01 In ancient Athens idiots were those selfish citizens who dishonorably declined to participate in the life of the polis and whose disavowal of the public interest was seen as poor taste and an indication of judgment Over time however the term idiot has shifted from that philosophically uncomplicated definition to an ever changing sociological signifier encompassing a wide range of meanings and beliefs for those concerned with intellectual and cognitive disability Idiocy A Cultural History offers for the first time a analysis of the concept drawing on cultural sociological scientific and popular representations ranging from Wordsworth's Idiot Boy and Dickens Barnaby Rudge to Down's Ethnic classification of idiots It tracks how our changing definition of idiocy intersects with demography political movements philosophical traditions economic concerns and the growth of the medical profession
