Sense Of Being Stared At:

The Sense of Being Stared At Rupert Sheldrake, 2013-06-22 Explores Rupert Sheldrake's more than 25 years of research into telepathy, staring and intention, precognition and animal premonitions. Shows that unexplained human abilities such as the sense of being stared at and phone telepathy are not paranormal but normal part of our biological nature. Draws on more than 5 000 case histories, 4 000 questionnaire responses and the results of experiments carried out with more than 20 000 people. Reveals that our minds and intentions extend beyond our brains into the world around us and even into the future. Nearly everyone has experienced the feeling of being watched or had their stare result in a glance in their direction. The phenomenon has been cited throughout history in nearly every culture along with other commonplace paranormal occurrences such as premonitions and telepathy. In this newly updated edition, Sheldrake shares his more than 25 years of research into telepathy, the power of staring, remote viewing, precognition and animal premonitions. Drawing on more than 5 000 case histories, 4 000 questionnaire responses and the results of experiments on staring, thought transference, phone telepathy and other phenomena carried out with more than 20 000 people as well as reports and data from dozens of independent research teams, Sheldrake shows that these unexplained human abilities such as the sense of being stared at are not paranormal but normal part of our biological nature. He reveals that telepathy depends on social bonds and traces its evolution from the connections between members of animal groups such as flocks, schools and packs. Sheldrake shows that our minds and intentions extend beyond our brains into our surroundings with invisible connections that link us to each other, to the world around us and even to the future.

The Sense of Being Stared at Rupert Sheldrake, 2003 Drawing on case histories and more than a decade of controlled experiments, the author explores some of the mysteries of the human mind including intuition, precognition, telepathy and the familiar sense of being stared at. **The Sense of Being Stared At** Rupert Sheldrake, 2011-07-20 Most of us know it well, the almost physical sensation that we are the object of someone's attention. Is the feeling all in our heads? What about related phenomena such as telepathy and premonitions? Are they merely subjective beliefs? In **The Sense of Being Stared At**, renowned biologist Rupert Sheldrake explores the intricacies of the mind and discovers that our perceptive abilities are stronger than most of us could have imagined. Sheldrake argues persuasively in this compelling book that such phenomena are in fact real. He rejects the label of paranormal and shows how these psychic occurrences are in fact a normal part of human nature. Combining the tradition of pragmatic experimentation with a refusal to accept the conventional answers to explain such phenomena, Sheldrake pioneers an intriguing new inquiry into the mysteries of our deepest nature. Rigorously researched yet completely accessible, this groundbreaking book provides a refreshing new way of thinking about ourselves and our relationships with other people, animals and the world around us. From the Trade Paperback edition.

anomalous phenomena clearly exist highlighting that the prevailing view of consciousness purely as a phenomenon of the brain fails to account for the empirical findings David Vernon provides essential coverage of information and evidence for a variety of anomalous psi phenomena calling for a paradigm shift in how we view consciousness from seeing it as something solely reliant on the brain to something that is enigmatic fundamental and all pervasive The book examines the nature of psi research showing that despite claims to the contrary it is clearly a scientific endeavour It explores evidence from telepathy and scopaesthesia clairvoyance and remote viewing precognition psychokinesis fields of consciousness energy healing out of body experiences near death experiences and post death phenomena showing that not only do these phenomena exist but that they have significant implications for our understanding of consciousness Featuring discussion on scientific research methods reflections on the fields of dark cognition and end of chapter questions that encourage critical thinking this book is an essential text for those interested in parapsychology consciousness and cognitive psychology *First Sight* James C. Carpenter, 2015-07-08 Often seen as supernatural unpredictable illusory and possibly dangerous ESP telepathy clairvoyance and other parapsychological activities are actually happening all the time and help us make sense of everyday experiences *First Sight* provides a new way of understanding such experiences and describes a way of thinking about the unconscious mind that makes it clear that these abilities are not rare and anomalous but instead are used by all of us all the time unconsciously and efficiently Drawing upon a broad array of studies in contemporary psychology the author integrates a new model for understanding these unusual abilities with the best research in psychology on problems as diverse as memory perception personality creativity and fear In doing so he illustrates how the field of parapsychology which historically has been riddled with confusion skepticism and false claims can move from the edges of science to its center where it will offer fascinating new knowledge about unmapped aspects of our nature The author demonstrates that the new model accounts for accumulated findings very well and explains previous mysteries resolves apparent contradictions and offers clear directions for further study *First Sight* also ventures beyond the laboratory to explain such things as why apparent paranormal experiences are so rare why they need not be feared and how they can be more intentionally accessed Further study of this theory is likely to lead to a technology of parapsychological processes while drastically revising our conception of the science of the mind toward a new science more humane and more replete with possibility than we have imagined in the past **The Sixth Sense Reader** David Howes, 2024-11-01 What is the sixth sense Is it physical mental or spiritual Do we all possess it or is it unique to exceptional individuals Might there be a seventh sense and an eighth sense as well What role does culture play in determining the range of our perceptual abilities The search for a supplementary sense has taken many directions and yielded numerous possibilities for an additional faculty of perception from magnetism and movement to dreaming and clairvoyance Stimulating reflection and debate *The Sixth Sense Reader* explores the cultural contexts which give rise to such reports of psychic and other powers that exceed the ordinary bounds of sense In this groundbreaking volume leading

scholars in history anthropology and biology take the reader on a tour of the far borderlands of consciousness From the world beneath to the world beyond the five senses every potential avenue of sensation is opened up for investigation

Randi's Prize Robert McLuhan,2010 James The Amazing Randi is a stage magician who says he has a million dollars for anyone who can convince him they have psychic powers No one has even come close to winning proof say sceptical scientists that there is no such thing as the paranormal But are they right In this illuminating and often provocative analysis Robert McLuhan examines the influence of Randi and other debunking sceptics in shaping scientific opinion about such things as telepathy psychics ghosts and near death experiences He points out that scientific researchers who investigate these things at first hand overwhelmingly consider them to be genuinely anomalous But this has shocking implications for science for society and for even perhaps for ourselves as individuals Hence the sceptics insistence that they should rather be attributed to fraud imagination and wishful thinking However this extraordinary and little understood aspect of consciousness has much to tell us about the human situation McLuhan suggests And at a time when militants are polarising the debate about religion its mystical spiritual element offers an optimistic and enlightened way forward Randi s Prize is aimed at anyone interested in spirituality or those curious to know the truth about paranormal claims It s an intelligent and readable analysis of scientific research into the paranormal which uniquely also closely examines the arguments of well known sceptics **One Mind**

Can people really feel a phantom amputated arm These questions and more form the basis of Sheldrake's look at the world of contemporary science as he puts some of the most cherished assumptions of established science to the test What Sheldrake discovers is that certain scientific beliefs are so widely taken for granted that they are no longer regarded as theories but are seen as scientific common sense In the true spirit of science Sheldrake examines seven of these beliefs Refusing to let intellectual dogmatism influence his search for the truth Sheldrake presents simple experiments that allow the curious and the skeptical to join in his journey of discovery His experiments look at how scientific research is often biased against unexpected patterns that emerge and how a researcher's expectations can influence the results He also examines the taboo of taking pets seriously and explores the question of human extrasensory perception Perhaps most important he questions the notion that science must be expensive in order to achieve important results showing that inexpensive methods can indeed shake the very foundations of science as we know it In this compelling and intelligent book Sheldrake offers no preconceived wisdom or easy answers just an open invitation to explore the unknown create new science and perhaps even change the world

Real Magic Dean Radin PhD, 2018-04-10 The chief scientist at the Institute of Noetic Sciences IONS turns a critical eye toward such practices as telepathy clairvoyance precognition and psychokinesis Are such powers really possible Science says yes According to noted scientist and bestselling author of *The Conscious Universe* Dean Radin magic is a natural aspect of reality and each of us can tap into this power with diligent practice But wait aren't things like ESP and telepathy just wishful thinking and flights of the imagination Not according to the author who worked on the US government's top secret psychic espionage program known as Stargate Radin has spent the last forty years conducting controlled experiments that demonstrate that thoughts are things that we can sense others emotions and intentions from a distance that intuition is more powerful than we thought and that we can tap into the power of intention think *The Secret* only on a more realistic and scientific level These dormant powers can help us to lead more interesting and fulfilling lives Beginning with a brief history of magic over the centuries what was called magic two thousand years ago is turning out to be scientific fact today a review of the scientific evidence for magic a series of simple but effective magical techniques the key is mental focus something elite athletes know a lot about Radin then offers a vision of a scientifically informed magic and explains why magic will play a key role in frontiers of science

Entangled Minds Dean Radin, 2009-11-24 Is everything connected? Can we sense what's happening to loved ones thousands of miles away? Why are we sometimes certain of a caller's identity the instant the phone rings? Do intuitive hunches contain information about future events? Is it possible to perceive without the use of the ordinary senses? Many people believe that psychic phenomena are rare talents or divine gifts. Others don't believe they exist at all. But the latest scientific research shows that these phenomena are both real and widespread and are an unavoidable consequence of the interconnected, entangled physical reality we live in. Albert Einstein called entanglement "spooky action at a distance" the way two objects remain connected through time and space without communicating in any conventional way long after their initial interaction has taken place. Could a similar entanglement of minds explain our apparent psychic abilities? Dean Radin, senior scientist at the Institute of Noetic Sciences, believes it might. In this illuminating book, Radin shows how we know that psychic phenomena such as telepathy, clairvoyance, and psychokinesis are real based on scientific evidence from thousands of controlled lab tests. Radin surveys the origins of this research and explores among many topics the collective premonitions of 9/11. He reveals the physical reality behind our uncanny telepathic experiences and intuitive hunches and he debunks the skeptical myths surrounding them. **Entangled Minds** sets the stage for a rational scientific understanding of psychic experience.

The Psi Connection: A Personal Voyage of Discovery David L.

Brown, 2024-06-01 A few years ago the author of *The Psi Connection* had a disturbing experience while experimenting with self-hypnosis. He saw a vision of a past life in which it appeared he had lived as a farmer in the 1800s. He tried twice more and each time had a similar vision that seemed to be from the same time and place. Frightened by the implications, he strongly rejected the possibility that these experiences were real. As a journalist with a scientific background, he could not accept the reality of this bizarre phenomenon and explained it to himself as having come from his unconscious mind, similar to dreams. But he still had doubts. Finally, when he began to talk about the subject, he learned that others also had experienced visions of past lives. Launched on a voyage of discovery, he began to realize that many events in his life could not be explained by science or common sense but only through the manifestation of paranormal powers. He continued to interview others who shared their experiences in such things as telepathy, psychokinesis, distance viewing, precognition, near-death experiences, and other uncanny events. He began to research the subject and learned that there is a large body of evidence to support the reality of paranormal powers. And strikingly, he began to see other manifestations of his own mental powers. He became aware of the possibility that there are quantum connections between human minds and the universe itself. This is his story.
