Sense Of Direction:

Why People Get Lost Paul A. Dudchenko, 2010 At some point in our lives most of us have been lost How does this happen What are the limits of our ability to find our way Do we have an innate sense of direction How people get lost reviews the psychology and neuroscience of navigation It starts with a history of studies looking at how organisms solve mazes It then reviews contemporary studies of spatial cognition and the wayfinding abilities of adults and children It then considers how specific parts of the brain provide a cognitive map and a neural compass This book also considers the neurology of spatial disorientation and the tendency of patients with Alzheimer s disease to lose their way Within the book the author proposes that we get lost because our brain s compass becomes misoriented This book is written for anyone with an interest in navigation and the brain It assumes no specialised knowledge of neuroscience but covers recent advances in our understanding of how the brain represents space

Memory in the Real World Gillian Cohen, 1996 This fully revised and updated third edition of the highly acclaimed *Memory in the Real World* includes recent research in all areas of everyday memory Distinguished researchers have contributed new and updated material in their own areas of expertise The controversy about the value of naturalistic research as opposed to traditional laboratory methods is outlined and the two approaches are seen to have converged and become complementary rather than antagonistic The editors bring together studies on many different topics such as memory for plans and actions for names and faces for routes and maps life experiences and flashbulb memory and eyewitness memory Emphasis is also given to the role of memory in consciousness and metacognition New topics covered in this edition include life span development of memory collaborative remembering *deja vu* and memory dysfunction in the real world *Memory in the Real World* will be of continuing appeal to students and researchers in the area

Intuition, Theory, and Anti-theory in Ethics Sophie Grace Chappell, 2015 What form or forms might ethical knowledge take In particular can ethical knowledge take the form either of moral theory or of moral intuition If it can should it A team of experts explore these central questions for ethics and present a diverse range of perspectives on the discussion

FOUNDATIONS OF ESOTERICISM Rudolf Steiner, 2019-04-25 It is a cosmic law that what has once taken place can never vanish but must reappear later in a metamorphosed form Every thought feeling and action brought about by man does not only affect the world around him but will reappear in the future From the Preface This course of lectures was originally offered as private strictly verbal instruction to a select group of esoteric pupils In an atmosphere of earnest study Rudolf Steiner translated from the Akashic Script valuable concepts of human and cosmic knowledge into words of earthly language content that is often not to be found in his later lectures Although working within the Theosophical Society Steiner was an independent spiritual teacher I would only bring forward the results of what I beheld in my own spiritual research The manifold exact and detailed descriptions of the events of evolution in these lectures form a background to the evolving figure of the human being The mighty event of the moon leaving the Earth vividly described took place according to Rudolf Steiner in order to provide an environment suited to human progress The wonderful moment when the higher being of man descended in a bell like form and enveloped the lower human body still on a level with the animals depicts what eventually provided human beings with a

body suited to the development of the self or I Spiritual beings and the great initiates led humanity along the path it was destined to tread Rudolf Steiner presents a sweep of occult knowledge including the phases of planetary evolution various myths and symbols human physical and spiritual organs illness reincarnation and much more Also included are unexpected insights into specific phenomena such as dinosaurs bacteria radiation black and white magic the Sphinx and Freemasonry
