Common Sense and Science from Aristotle to Reid Benjamin W. Redekop,2020-11-05

Common Sense and Science from Aristotle to Reid reveals that thinkers have pondered the nature of common sense and its relationship to science and scientific thinking for a very long time. It demonstrates how a diverse array of neglected early modern thinkers turn out to have been on the right track for understanding how the mind makes sense of the world and how basic features of the human mind and cognition are related to scientific theory and practice. Drawing on a wealth of primary sources and scholarship from the history of ideas, cognitive science, and the history and philosophy of science, this book helps readers understand the fundamental historical and philosophical relationship between common sense and science. A

Sense of the Whole Mark Gonnerman, 2015-06-09 In 1997 Mark Gonnerman organized a yearlong research workshop on Gary Snyder's *Mountains and Rivers Without End* at the Stanford Humanities Center. Members of what came to be known among faculty, students, and diverse community members as the Mountains Rivers Workshop met regularly to read and discuss Snyder's epic poem. Here the poem served as a commons that turned the multiversity into a university once again, if only for a moment. The Workshop invited writers, teachers, and scholars from Northern California and Japan to speak on various aspects of Snyder's great accomplishment. This book captures the excitement of these gatherings and invites readers to enter the poem through essays and talks by David Abram, Wendell Berry, Carl Bielefeldt, Tim Dean, Jim Dodge, Robert Hass, Stephanie Kaza, Julia Martin, Michael McClure, Nanao Sakaki, and Katsunori Yamazato. It includes an interview with Gary Snyder, appendices, and other resources for further study. Snyder once introduced a reading of this work with reference to whitewater rapids, saying most of his writing is like a Class III run where you will do just fine on your own but that *Mountains and Rivers* is more like Class V. If you're going to make it to take it out, you need a guide. As a collection of commentaries and background readings, this companion volume enhances each reader's ability to find their way into and through an adventurous and engaging work of art.

Observations on the Sense of the Beautiful and the Sublime Immanuel Kant, 2024-05-09 A new translation of Immanuel Kant's 1764 *Observations on the Sense of the Beautiful and the Sublime* in modern American English, with the original German in the back. This is Volume II in the Complete Works of Immanuel Kant from LP. Immanuel Kant's 1764 *Observations on the Sense of the Beautiful and the Sublime* (*Beobachtungen über das Gefühl des Schönen und Erhabenen*) is his entry into the philosophic field of Aesthetics and provides the framework of his theories on beauty, which would be fully enumerated in his 1790 *Critique of Judgment*. Kant distinguishes between the beautiful and the Sublime, which are further divided into Attached, mathematical, and Free, dynamic. Beauty is playful and limited to certain forms, while the sublime is serious and limitless. Beauty inhabits life; the sublime is beyond life. This is a more nuanced, developed form of Edmund Burke's popular theories on Aesthetics.

Making Sense of Health, Disease, and the Environment in Cross-Cultural History: The Arabic-Islamic World, China, Europe, and North America Florence Bretelle-Establie,Marie Gaille,Mehrnaz Katouzian-Safadi,2020-01-01 This book has been defined around three important issues the first sheds light on how people in various philosophical religious and political contexts understand the natural environment and how the relationship between the environment and the body is perceived the second focuses on the perceptions that a particular natural environment is good or bad for human health and examines the reasons behind such characterizations the third examines the promotion in history of specific practices to take advantage

of the health benefits or avoid the harm caused by certain environments and also efforts made to change environments supposed to be harmful to human health The feeling and or the observation that the natural environment can have effects on human health have been and are still commonly shared throughout the world This led us to raise the issue of the links observed and believed to exist between human beings and the natural environment in a broad chronological and geographical framework In this investigation we bring the reader from ancient and late imperial China to the medieval Arab world up to medieval modern and contemporary Europe This book does not examine these relationships through the prism of the knowledge of our modern contemporary European experience which still too often leads to the feeling of totally different worlds Rather it questions protagonists who in different times and in different places have reflected on their own terms on the links between environment and health and tries to obtain a better understanding of why these links took the form they did in these precise contexts This book targets an academic readership as well as an informed audience for whom present issues of environment and health can be nourished by the reflections of the past **A Sense of Place** Mark A.
