**Architecture After Deleuze and Guattari** Chris L. Smith, 2023-05-04 This study illuminates the complex interplay between Deleuze and Guattari's philosophy and architecture Presenting their wide ranging impact on late 20th and 21st century architecture each chapter focuses on a core Deleuzian Guattarian philosophical concept and one key work of architecture which evokes contorts or extends it Challenging the idea that a concept or theory defines and then produces the physical work and not vice versa Chris L Smith positions the relationship between Deleuze and Guattari's philosophy and the field of architecture as one that is mutually substantiating and constitutive In this framework modes of architectural production and experimentation become inextricable from the conceptual territories defined by these two key thinkers producing a rigorous discussion of theoretical practical and experimental engagements with their ideas

*Architecture for a Free Subjectivity* Dr Simone Brott, 2013-06-28 Architecture for a Free Subjectivity reformulates the French philosopher Gilles Deleuze's model of subjectivity for architecture by surveying the prolific effects of architectural encounter and the spaces that figure in them For Deleuze and his Lacanian collaborator Felix Guattari subjectivity does not refer to a person but to the potential for and event of matter becoming subject and the myriad ways for this to take place By extension this book theorizes architecture as a self actuating or creative agency for the liberation of purely impersonal effects Imagine a chemical reaction a riot in the banlieues indeed a walk through a city Simone Brott declares that the architectural object does not merely take part in the production of subjectivity but that it constitutes its own This book is to date the only attempt to develop Deleuze's philosophy of subjectivity in singularly architectural terms Through a screening of modern and postmodern American and European works this provocative volume draws the reader into a close encounter with architectural interiors film scenes and other arrangements while interrogating the discourses of subjectivity surrounding them and the evacuation of the subject in the contemporary discussion The impersonal effects of architecture radically changes the methodology just as it reimagines architectural subjectivity for the twenty first century

*Architecture and the Sciences* Antoine Picon, Alessandra Ponte, 2003-05 Since antiquity the sciences have served as a source of images and metaphors for architecture and have had a direct influence on the shaping of built space In recent years architects have been looking again at science as a source of inspiration in the production of their designs and constructions This volume evaluates the interconnections between the sciences and architecture from both historical and contemporary perspectives *Architecture and the Sciences* shows how scientific paradigms have migrated to architecture through the appropriation of organic and mechanical models Conversely architecture has provided images for scientific and technological discourse Accordingly this volume investigates the status of the exchanges between the two domains Contents

*The Resistant Object of Architecture* Petra Čeferin,2020-12-30 Architecture s role is becoming increasingly limited to serving the all pervasive system of globalised capitalism and becoming a constituent complicit part of its mechanism The Resistant Object of Architecture addresses this problem and does so in a way that represents a marked departure from predominant responses which as the book shows do not address the core issue The book addresses this problem by focusing on the question what is architecture and responds to this question by developing the immanent structural logic of architecture that enables it to work not only as an instrumental thinking practice but as a practice of creative thinking This means that it alone determines its issues problems and priorities and precisely because of that it has the capacity and cogency to destabilise indeed pierce holes in the system in which it operates The Resistant Object of Architecture draws on various theoretical sources from the psychoanalysis of Jacques Lacan and the philosophy of Alain Badiou to contemporary architectural theory In contrast to the predominant view of today it demonstrates that architecture has an affirmative transformative capacity This book is an ideal read for those interested in architectural theory and history analysis of contemporary architecture and philosophy of architecture *Architecture and Spectacle* Gevork Hartoonian,2012 Focusing

on six leading contemporary architects Peter Eisenman Frank Gehry Bernard Tschumi Zaha Hadid Rem Koolhaas and Steven Holl this book puts forward a unique and insightful analysis of neo avant garde architecture It discusses the spectacle and excess which permeates contemporary architecture in reference to the present aesthetic tendency for image making but does so by applying the tectonic of theatricality discussed by the nineteenth century German architect Gottfried Semper In doing so it breaks new ground by opening up a dialogue between the study of the past and the design of the present **Deleuze**

**and Architecture** Helene Frichot,2013-05-31 This collection looks critically at how Deleuze challenges architecture as a discipline how architecture contributes to philosophy and how we can come to understand the complex politics of space of our increasingly networked world *A Critical History of Contemporary Architecture* Elie G. Haddad,David

Rifkind,2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects **The Routledge**
