Semirings For Soft Constraint Solving And Programming:

Semirings for Soft Constraint Solving and Programming Stefano Bistarelli, 2004-07-16 Constraint satisfaction and constraint programming have shown to be very simple but powerful ideas with applications in various areas Still in the last ten years the simple notion of constraints has shown some deficiencies concerning both theory and practice typically in the way over constrained problems and preferences are treated For this reason the notion of soft constraints has been introduced with semiring based soft constraints and valued constraints being the two main general frameworks This book includes formal definitions and properties of semiring based soft constraints as well as their use within constraint logic programming and concurrent constraint programming Moreover the author shows how to adapt existing notions and techniques such as abstraction and interchangeability to the soft constraint framework and it is demonstrated how soft constraints can be used in some application areas such as security Overall this book is a great starting point for anyone interested in understanding the basics of semiring based soft constraints

Advances in Artificial Intelligence Grigori Sidorov, Arturo Hernández Aguirre, Carlos Alberto Reyes Garcia, 2010-10-31 Artificial intelligence AI is a branch of computer science that models the human ability of reasoning usage of human language and organization of knowledge solving problems and practically all other human intellectual abilities Usually it is characterized by the application of heuristic methods because in the majority of cases there is no exact solution to this kind of problem The Mexican International Conference on Artificial Intelligence MICA I a yearly international conference series organized by the Mexican Society for Artificial Intelligence SMIA is a major international AI forum and the main event in the academic life of the country's growing AI community In 2010 SMIA celebrated 10 years of activity related to the organization of MICA I as is represented in its slogan Ten years on the road with AI MICA I conferences traditionally publish high quality papers in all areas of artificial intelligence and its applications The proceedings of the previous MICA I events were also published by Springer in its Lecture Notes in Artificial Intelligence LNAI series vols 1793 2313 2972 3789 4293 4827 5317 and 5845 Since its foundation in 2000 the conference has been growing in popularity and improving in quality

ECAI 2006 Gerhard Brewka, 2006 In the summer of 1956 John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence During the last 50 years AI has seen a tremendous development and is now a well established scientific discipline all over the world Also in Europe AI is in excellent shape as witnessed by the large number of high quality papers in this publication In comparison with ECAI 2004 there is a strong increase in the relative number of submissions from Distributed AI Agents and Cognitive Modelling Knowledge Representation Reasoning is traditionally strong in Europe and remains the biggest area of ECAI 2006 One reason the figures for Case Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS

A Guide to the Literature on Semirings and their Applications in Mathematics and Information Sciences K. Glazek, 2013-06-29 This volume presents a short guide to the extensive literature concerning semirings along with a complete bibliography The literature has been created over many years in variety of languages by authors representing different schools of mathematics and working in various related fields In many instances the terminology used is not universal which further compounds the difficulty of locating pertinent sources even in this age of the Internet and electronic dissemination of research results So far there has been no single reference that could guide the interested scholar or student to the relevant publications This book is an attempt to fill this gap My interest in the theory of semirings began in the early sixties when together with Bogdan W glorz I tried to investigate some algebraic aspects of compactifications of topological spaces semirings of semicontinuous functions and the general ideal theory for special semirings Unfortunately local algebraists in Poland told me at that time

that there was nothing interesting in investigating semiring theory because ring theory was still being developed However some time later we became aware of some similar investigations having already been done The theory of semirings has remained my first love ever since and I have been interested in the results in this field that have been appearing in literature even though I have not been active in this area myself Computer Safety, Reliability, and Security Stuart Anderson, Massimo Felici, Beverley Littlewood, 2003-09-12 This book constitutes the refereed proceedings of the 22nd International Conference on Computer Safety Reliability and Security SAFECOMP 2003 held in Edinburgh UK in September 2003 The 30 revised full papers presented together with two keynote talk abstracts were carefully reviewed and selected from 96 submissions The papers are organized in topical sections on formal methods design for dependability security and formal methods dependability and performance analysis dependability of medical systems fault tolerance tools for dependable design dependability of critical infrastructures hazard and safety analysis and design for dependability
