Carter, Lieselotte Ahnert, K. E. Grossmann, Sarah B. Hrdy, Michael E. Lamb, 2015-10-06 Scientists from different disciplines including anthropology psychology psychiatry pediatrics neurobiology endocrinology and molecular biology explore the concepts of attachment and bonding from varying scientific perspectives Attachment and bonding are evolved processes the mechanisms that permit the development of selective social bonds are assumed to be very ancient based on neural circuitry rooted deep in mammalian evolution but the nature and timing of these processes and their ultimate and proximate causes are only beginning to be understood In this Dahlem Workshop Report scientists from different disciplines including anthropology psychology psychiatry and behavioral biology come together to explore the concepts of attachment and bonding from diverse perspectives In their studies they seek to understand the causes or the consequences of attachment and bonding in general and their different qualities in individual development in particular They address such questions as biobehavioral processes in attachment and bonding early social attachment and its influences on later patterns of behavior bonding later in life and adaptive and maladaptive or pathological outcomes The studies confirm that social bonds have consequences for virtually all aspects of behavior and may be protective in the face of both physical and emotional challenges

Attachment in Adulthood Mario Mikulincer, Phillip R. Shaver, 2016-04-22 Synthesizing a vast body of empirical research

and organizing it around a comprehensive conceptual model this book is recognized as the definitive reference on adult attachment. The authors explain how what began as a theory of child development is now used to conceptualize and study nearly all aspects of social functioning across the lifespan including mental representations of self and others, emotion regulation, personal goals and strivings, couple relationships, caregiving, sexuality, psychopathology, psychotherapy, and organizational behavior. The origins and measurement of individual differences in adult attachment are examined, as is the question of whether and how attachment patterns can change. New to This Edition: Reflects major advances including hundreds of new studies; Clarifies and extends the authors' influential model of attachment system functioning; Cutting edge content on genetics and on the neural and hormonal substrates of attachment; Increased attention to the interplay among attachment and other behavioral systems such as caregiving and sexuality; Expanded discussion of attachment processes in counseling and psychotherapy; Additional coverage of leadership, group dynamics, and religion.

The Oxford Handbook of Developmental Psychology and the Law Allison D. Redlich, Jodi A. Quas, 2024. In this Handbook, experts across multiple disciplines including psychology, criminology, education, law, and policy focus on the interface between developmental science and law across crucial but also very different periods of development. Coverage includes topics such as prenatal and infant abuse, questioning of minor and elderly victims, witnesses and suspects, treatment of at-risk individuals across multiple settings (e.g., criminal courts, immigration, custody and adoption hearings, experiences in prison, reentry transitions after incarceration, and reproductive and end-of-life legal rights). Insightful and forward-looking, the Handbook provides crucial foundational knowledge of the field and offers concrete suggestions for next steps and conclusions for practitioners and scientists who are working to push the field forward and use the knowledge for more informed decision making.
