Sentence Comprehension:

Sentence Comprehension David J. Townsend, Thomas G. Bever, 2001 Using sentence comprehension as a case study for all of cognitive science David Townsend and Thomas Bever offer an integration of two major approaches the symbolic computational and the associative connectionist The symbolic computational approach emphasizes the formal manipulation of symbols that underlies creative aspects of language behavior The associative connectionist approach captures the intuition that most behaviors consist of accumulated habits The authors argue that the sentence is the natural level at which associative and symbolic information merge during comprehension The authors develop and support an analysis by synthesis model that integrates associative and symbolic information in sentence comprehension This integration resolves problems each approach faces when considered independently The authors review classic and contemporary symbolic and associative theories of sentence comprehension and show how recent developments in syntactic theory fit well with the integrated analysis by synthesis model They offer analytic experimental and neurological evidence for their model and discuss its implications for broader issues in cognitive science including the logical necessity of an integration of symbolic and connectionist approaches in the field

Sentence Processing Roger P. G. van Gompel, 2013-09-11 What are the psychological processes involved in comprehending sentences How do we process the structure of sentences and how do we understand their meaning Do children bilinguals and people with language impairments process sentences in the same way as healthy monolingual adults These are just some of the many questions that sentence processing researchers have tried to answer by conducting ever more sophisticated experiments making this one of the most productive and exciting areas in experimental language research in recent years This book is the first to provide a comprehensive state of the art overview of this important field It contains 10 chapters written by world leading experts which discuss influential theories of sentence processing and important experimental evidence with a focus on recent developments in the area The chapters also analyse research that has investigated how people process the structure and meaning of sentences and how sentences are understood within their context This comprehensive and authoritative work will appeal to students and researchers in the field of sentence processing as well anyone with an interest in psychology and linguistics

Language Processing Simon Garrod, Martin Pickering, 2016-01-28 Language Processing questions what happens when we process language what mental operations occur during processing and how they are organised over time The last decade has seen real advances in the study of language processing that have wide ranging implications for human cognition in general Language Processing gives an account of these developments both as they relate to experimental studies of processing and as they relate to computational modelling of the processes In addition to chapters covering core topics such as lexical processing syntactic parsing and the comprehension of discourse special topics of recent interest are also included

Understanding Complex Sentences N. Chipere, 2003-09-09 Is native speaker variation in understanding complex sentences due to individual

differences in working memory capacity or in syntactic competence The answer to this question has very important consequences for both theoretical and applied concerns in linguistics and education This book is distinctive in giving an historical and interdisciplinary perspective on the rule based and experience based debate and in supporting an integrated account In the study reported here variation was found to be due to differences in syntactic competence and the author argues that sentence comprehension is a learned skill displaying many of the general characteristics of cognitive skills The book will be stimulating reading for psycholinguists theoretical linguists applied linguists and educators The Sage Handbook of Cognitive and Systems Neuroscience Gregory J. Development in Full-term and Premature infants Paula Menyuk, Jacqueline W. Liebergott, Martin C. Schultz, 2014-02-04 Designed to provide practical information to those who are concerned with the development of young children this book has three goals First the authors offer details about patterns of language development over the first three years of life Although intensive studies have been carried out by examining from one to 20 children in the age range of zero to three years there has been no longitudinal study of a sample as large as this 53 children nor have as many measures of language development been obtained from the same children Examining language development from a broad perspective in this size population allows us to see what generalizations can be made about patterns of language development This volume s second goal is to examine the impact of such factors as biology cognition and communication input and the interaction of these factors which traditionally have been held to play an important role in the course of language development The comparative influence of each and the interaction of all three were examined statistically using children s scores on standard language tests at age three The volume s third goal is to provide information to beginning investigators early childhood educators and clinicians that can help them in their practice This includes information about what appear to be good early predictors of language development at three years language assessment procedures that can be used with children below age three how these procedures can be used what they tell us about the language development of young children and what warning signs should probably be attended to and which can most likely be ignored In addition suggestions are made about what patterns of communicative interaction during the different periods of development seem to be most successful in terms of language development outcomes at three years and what overall indications the study offers regarding appropriate intervention

Human Language and Our Reptilian Brain Philip Lieberman, 2009-07-01 This book is an entry into the fierce current debate among psycholinguists neuroscientists and evolutionary theorists about the nature and origins of human language A prominent neuroscientist here takes up the Darwinian case using data seldom considered by psycholinguists and neurolinguists to argue that human language though more sophisticated than all other forms of animal communication is not a qualitatively different ability from all forms of animal communication does not require a quantum evolutionary leap to explain it and is not unified in a single language instinct Using clinical evidence from speech impaired patients functional neuroimaging and evolutionary biology to make his case Philip Lieberman contends that human language is not a single separate module but a functional neurological system made up of many separate abilities Language remains as it began

Lieberman argues a device for coping with the world But in a blow to human narcissism he makes the case that this most remarkable human ability is a by product of our remote reptilian ancestors abilities to dodge hazards seize opportunities and live to see another day
