Separation Anxiety Disorder Richard A. Gardner, 1985 **Child and Adolescent Anxiety Psychodynamic Psychotherapy** Sabina E. Preter, Theodore Shapiro, Barbara Milrod, 2018-07-16

Child and Adolescent Anxiety Psychodynamic Psychotherapy CAPP is a new manualized tested 24 session psychotherapeutic approach to working psychodynamically with youth with anxiety disorders. This book describes how clinicians intervene by collaboratively identifying the meanings of anxiety symptoms and maladaptive behaviors and to communicate the emotional meaning of these symptoms to the child. The treatment is conducted from a developmental perspective and the book contains clinical examples of how to approach youth of varying ages. The authors demonstrate that CAPP can help youth reduce anxiety symptoms by developing an understanding of the emotional meaning of symptoms, enhance children's skill of reflection and self-observation of one's own and others' motivations, improve symptom-specific reflective functioning, diminish use of avoidance, dependence, and rigidity by showing that underlying emotions (e.g., guilt, shame, anger) as well as conflicted wishes and desires can be tolerated and understood, understand fantasies and personal emotional significance surrounding the anxiety symptoms to reduce symptoms' magical qualities and impact on the child. The manual provides a description of psychodynamic treatment principles and technique and offers a guide to opening, middle, and termination phases of this psychotherapy. It contains chapters on the historical background of psychodynamic child psychotherapy, on developmental aspects of child psychotherapy, and on the nature of parent involvement in the treatment. It will be useful for clinicians from diverse therapy backgrounds and it will appeal to the student reader as well as to the experienced clinician.

Manual of Panic-focused Psychodynamic Psychotherapy Barbara Milrod, 1997

Despite the enormous progress in the pharmacological and cognitive behavioral treatments of panic disorder over the last 30 years, these treatments often provide only temporary or partial relief and many patients continue to experience persistent anxiety symptoms after the discontinuation of treatment. Substantial evidence exists that intrapsychic conflict and characterological features play a central role in the genesis and onset of panic disorder as well as the frequency of relapse after the termination of treatment. Many clinicians believe that psychodynamic psychotherapy is the best suited approach to address these issues. Based on extensive clinical experience and written by distinguished experts in the field, the Manual of Panic Focused Psychodynamic Psychotherapy is the first manual to

comprehensively examine the usefulness of exploratory psychotherapy in the treatment of panic disorder It suggests that psychodynamic approaches can aid both psychopharmacological and cognitive behavioral treatments and can often resolve panic symptoms in many patients when used as the sole treatment modality The authors catalog psychological factors commonly present in panic disorder patients and describe how to address them within a psychodynamic psychotherapy A wealth of clinical vignettes and a complete case example illustrate the psychodynamic approach to this disorder Other treatment issues including defense mechanisms transference termination of treatment and the use of this method in conjunction with other therapeutic approaches are also covered

Trauma Focused Psychodynamic Psychotherapy Fredric Busch, Barbara Milrod, Cory K. Chen, Meriamne B. Singer, 2021 This chapter provides an introduction to efficacious treatments for PTSD Despite their efficacy many patients do not respond to these treatments or have persistent symptoms PTSD psychotherapy treatments used at the VA including prolonged exposure therapy and cognitive processing therapy are described While these treatments can be helpful many patients are avoidant of trauma processing and homework Furthermore both treatments tend to focus on one central trauma around which to target exposure exercises whereas most Veterans experience multiple traumas An overview of the development and framework of Trauma Focused Psychodynamic Psychotherapy TFPP a PTSD symptom focused brief dynamic therapy is presented A brief background of psychoanalytic and psychodynamic literature and thinking about trauma is provided to further frame the place of TFPP
