West Highlands of Scotland Warren Rovetch, 2002-10 On a journey of discovery Warren and Gerda Rovetch both creaky themselves explore the hidden places of Great Britain's last wilderness the rugged and startling coast of Scotland's North West Highlands They bring fresh perspectives to the environmental cultural and spiritual dimensions of their experience as their journey moves at an easy pace from village pubs and croft houses to places of untouched natural beauty and solitude Celtic history and tradition comes alive as our hosts meander their way along Part travelogue part guidebook but all charm and wit this book transports us to another culture where we have much to learn The Reportage of Urban Culture Rolf

Lindner,1996-07-11 The current fascination with urban life has encouraged a growing interest in the Chicago School of sociology by students of sociological history It is generally accepted that the field research practised by the Chicago sociologists during the 1920s the Golden Age of Chicago sociology used methods borrowed from anthropology However Rolf Lindner also argues convincingly that the orientation of urban research advocated by Robert Park the key figure in the Chicago School and himself a former reporter is ultimately indebted to the tradition of urban reportage The Reportage of Urban Culture goes beyond a thorough reconstruction of the relationship between journalism and sociology It shows how the figure of the city reporter at the turn of the century represents a new way of looking at life and reflects a transformation in American culture from rejecting variety to embracing it

Plan Prediction Ray Wyatt,2016-11-19 This book develops an innovative system in the form of an app that harnesses the power of the internet to predict which sorts of people will prefer which policy in ANY planning situation It chronicles the accumulated research wisdom behind the system s reasoning along with several less successful approaches to policy making that have been found wanting in the past including the myth usually peddled by strategic planners that it is possible to find a best plan which optimally satisfies everybody The book lays out an entirely new kind of Planning Support System PSS It will facilitate decision making that is far more community sensitive than previously and it will drastically improve the performance of anyone who needs to plan within socially sensitive contexts which is all of us A standout feature of the system is its commitment to scientific rigour as shown by its predicted plan scores always being graphically presented within error margins so that true statistical significance is instantly observable Moreover the probabilities that its predictions are correct are always shown a refreshing change from most if not all other Decision Support Systems DSS that simply expect users to accept their outputs on faith alone

DNA Profiling Isabelle Denervaud, Olivier Chatin, 2011 This book explores an organic vision of company innovation through an analogy with DNA and its four nitrogenous bases Like all living organisms a company has the fundamental genetic bases of its ability to innovate This DNA mutates under both environmental influences and evolutionary factors allowing a company to develop new patterns of behaviour At the dawn of the 21st century the result of this process is the emergence of what we could call the hyperconnected company Through this ongoing metaphor the book provides decision makers with several paths along which to increase their ability to innovate taking advantage of genetic bases such as their own factors of change The study is based on observations made of large companies for whom innovation is an absolute imperative It alternates theoretical analyses with concrete illustrations and spotlights innovation leaders such as Louis Vuitton 3M Bouygues Telecom BNP Paribas Siemens Danone Air Liquide to name but a few
