**Services in the Global Market** Jacques A.E. Nusbaumer,2012-12-06 Service activities are at the heart of a major economic revolution taking place all around us This new economic revolution is equivalent to the Industrial Revolution in the eighteenth century the rise of the guilds in the Middle Ages and the shift from a hunter gatherer economy to an agricultural pastoral economy at the dawn of recorded history when organized agriculture first led to the development of towns and the invention of writing In this new revolution computers factory robots and completely automated factories are rapidly reducing the need for physical labor in production At the same time sophisticated agricultural machinery fertilizers pesticides and biogenetic engineering have reduced and will continue to reduce the physical labor involved in growing food In the new economy that will emerge from this revolution most people will earn their living by working in services Like all revolutions the new economic revolution is troublesome because it brings with it major changes in everyday life both at home and in the workplace Change creates uncertainty about the future and ambiguity in the interpretation of economic trends The new revolution is also troublesome because it adds to the complexity of economic organization and removes more people from the direct production of physical goods In the new economy more and more jobs will be based on the application of specialized knowledge and the manipulation of information with computers a long step away from real jobs like growing wheat and assembling cars      **The Rise of Transnational Corporations from Emerging Markets** Karl P.

Sauvant,2009-01-01 Having undertaken billions of FDI in many continents and nations between Argentina and the PRC I consider Dr Sauvant's book an eye opener a new page showing us a new super highway The OFDI volume of emerging markets today surpassing the entire FDI volume of not even 20 years back is a signal of success of the free market economy It signals also the end of privileges for the Europeans It reflects entrepreneurship at its best on the part of the fast developing nations of Asia It shows that free access to know how and capital has permitted Asia to catch up at an unprecedented speed Contrary to often repeated but wrong opinions the poor of the world have benefited the most by globalization A market place of unimaginable potential is under construction in the first half of the 21st century accelerated by FDI This book should find many readers particularly among the political leaders of today and tomorrow Carl H Hahn Chairman Emeritus of Volkswagen AG This comprehensive analysis deals with the range of issues raised by the rise of transnational corporations from emerging markets This insightful book shows that foreign direct investment FDI from emerging markets has grown from negligible amounts in the early 1980s to 210 billion in 2007 with the stock of investment now being well over 1 trillion This reflects the rise of firms from these economies to become important players in the world

FDI market The contributors to this book comprehensively analyze the rise of emerging market TNCs the salient features of the transnational activities of these firms the relationship of outward FDI and the competitiveness of the firms involved their impact on host and home countries and implications for the international law and policy system The subject of this study is both topical and important and poses a number of challenges that will require considerable policy attention in the future It will appeal to academics interested in FDI as well as emerging markets Karl P Sauvant has gathered together a group of leading academics that makes this an informative and valuable read for anyone interested in the subject including academics students at all levels and private sector entities as well as government officials dealing with outward FDI
