Service Learning, 1999 Reading as Collective Action Nicholas Hengen Fox, 2017-10 Reading as Collective Action examines literature's power to reshape our world in very public and very active ways Whether through readers publicly posting poems of Shakespeare and Amiri Baraka to criticize the Bush administration forming a community reading program using Grapes of Wrath to organize support during the recent Great Recession or taking to public transit to talk with strangers about working class literature this book challenges dominant academic modes of reading For adherents of the civic turn it suggests how we can create more politically effective forms of service learning and community engagement grounded in commitment to tactical grassroots actions from back cover Reconceptualizing Faculty Development in

Service-Learning/Community Engagement Becca Berkey, Emily Eddins Rountree, Patrick M. Green, Cara Meixner, 2023-07-03 The role of educational developer in the realm of service learning and community engagement S LCE is multidimensional Given the potentially transformational nature for both faculty and students of the experiences and courses in whose design they may be directly or indirectly involved as well as their responsibility to the communities served by these initiatives they have to be particularly attentive to issues of identity values and roles As both practitioners and facilitators they are often positioned as third space professionals This edited volume provides educational developers and community engagement professionals an analysis of approaches to faculty development around service learning and community engagement Using an openly self reflective approach the contributors to this volume offer an array of examples and models as well as realistic strategies to empower readers to evolve their faculty development efforts in service learning and community engagement on their respective campuses It is also a call for recognition that the practice of S LCE needs to be institutionalized and improved The book further addresses the field's potential contributions to scholarship such as the scholarship of teaching and learning SoTL publicly engaged scholarship and collaborative inquiry among others The case studies provide an outline of program models and promising practices including an authentic analysis of the institutional context within which they

operate the positionality of the practitioner scholars overseeing them the resources required and the evidence related to both successes and challenges of these approaches The contributed chapters are organized under four themes the landscape of faculty development and community engagement models of faculty development in S LCE challenges and opportunities in pedagogy and partnerships and engendering change in educational development *The Bedford Guide for College Writers with Reader, Research Manual, and Handbook* X. J. Kennedy, Dorothy M. Kennedy, Marcia F. Muth, 2011-01-06 With its process oriented rhetoric provocative thematic reader up to date research manual and comprehensive handbook The Bedford Guide for College Writers gives your students the tools they need to succeed as writers all in one book Each of the book s four main components has been carefully developed to provide an engaging well coordinated guide for student writers This edition s new more open design and sharper focus on active learning do even more to help students develop transferable skills The Bedford Guide for College Writers prepares students to be the confident resourceful and independent writers they will need to be *The Role of Criticism in Understanding Problem Solving* Samuel Fee, Brian Belland, 2012-05-26 In 1991 Denis Hlynka and John Belland released *Paradigms Regained* a well received reader for graduate students in the field of educational technology The *Role of Criticism in Understanding Problem Solving* updates some of those ideas initially proposed in *Paradigms Regained* and extends the conversation into the contemporary discourse regarding problem based learning PBL *Paradigms* proposed the idea of criticism as a third method for the conduction of educational research the first two being qualitative and qualitative The concept of criticism as a tool for research is not well established in educational technology although it is well established in other educational research traditions such as Curriculum Studies Unfortunately it is not always clear how criticism can be applied This book views criticism as a way to step back and look at an educational intervention within educational technology through a particular critical lens Criticism is viewed as a valuable approach to guiding meta analyses and theoretical studies serving to prevent the proverbial spinning of the wheels that often happens in educational research By indicating new potential research questions and directions criticism approaches can invigorate educational research This book revisits the ideals of criticism in order to establish their usefulness for studying educational technology interventions to support problem based learning First a few foundational chapters set the stage for the conversations on criticism Then the role criticism can play in enhancing analysis and interpretation of the PBL literature is explored Finally case studies addressing the central concepts of the text are presented and dissected This book represents a complete overhaul and rethinking of the use of criticism as a method for understanding and furthering the research area of PBL within the field of Educational technology
